PUBLIC NOTICE OF INTENT TO ISSUE AIR CONSTRUCTION PERMIT

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
DPP File No. 0200407-000-AC

Nalite International, Inc.
Miami-Dade County

The Department of Environmental Protection (Department) gives notice of its intent to issue an air construction permit issued to Nalite International, Inc. revising certain conditions in the original construction permit issued to Nalite in September 2000. That permit (DPP File No. 0200407-000-AC, PSD-FL-289) provided for installation of a new panel spray coating line at 1111 NW 108th Street and relocation of an existing epoxy coating line from its former location at 1201 NW 108th Street to a new location at 1111 NW 108th Street, Miami, Dade County. The applicant's mailing address is: Nalite International, Inc., 1111 NW 185th Street, Miami, Florida 33142.

The original construction permit considered the new line as a modification of an existing major facility since the two locations were considered adjacent and thus the same facility under the Department's Prevention of Significant Deterioration rules (Rule 62-212.400, F.A.C.) A Best Available Control Technology (BACT) Determination was required in the original permit for emissions of volatile organic compounds (VOC) from the new line pursuant to Rule 62-212.400, F.A.C. and 40 CFR 62.61, Prevention of Significant Deterioration (PSD). A Maximum Achievable Control Technology (MACT) determination was required for hazardous air pollutants (HAPs) pursuant to Rule 62-204.800, F.A.C. and 40 CFR 63, National Emission Standards for Hazardous Air Pollutants (NESHAP), Subpart B, Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j).

This revision stems from the company's ongoing efforts to convert its processing technology from spray coating to non-spray pigment injection. Nalite currently manufactures and coats plastic shrinkage molders from polypropylene pellets. This process conversion is expected to significantly reduce long term emissions of VOCs currently permitted to be emitted. In conjunction with the conversion, the applicant has applied to the Department for revision of certain requirements in its existing air permit. The most important permitting change is an extension of the shutdown duty for the old coating line (Emission Unit 001) from December 31, 2002 to December 31, 2003, after which the old line will be permanently shut down. The additional year of operation of the old line will be carried out in such a manner that the total emissions from the facility, including EU-001 and the new line (EU-004), will be substantially less than the major source threshold of 250 tons per year, making Nalite a "synthetic minor facility" under Department PSD rules. Also required by this permitting revision is additional emissions testing to establish emission limits that will apply permanently for the new line and for the CY 2003 operation of the old line. MACT applicability for the new line is unchanged from the original permit because the quantities of hazardous air pollutants (HAPs) exceed the threshold of 10 tons per year of a single HAP and 25 tons per year of total HAPs. Emissions of pollutants from the new line shall not exceed the following rules in tons per year: VOC/HAP, 130.5; NOx, 0.46; CO, 0.120; PM10, 4.84; SO2, 0.0008.

An air quality impact analysis was conducted for the original permit. That analysis found that emissions from the facility will not significantly contribute to or cause a violation of any state or federal ambient air quality standards or PSD increments.

The Department will issue a Revised BACT/MACT Determination along with the FINAL Permit, in accordance with the conditions of the DRAFT permit, unless a response received in accordance with the following procedures results in a different decision or significant change of terms or conditions.

The Department will accept written comments and request for public meetings concerning the proposed permit issuance within the period of fourteen (14) days from the date of publication of this Public Notice of Intent to Issue Air Construction Permit. Written comments and requests for public meetings should be provided to the Department's Bureau of Air Regulation at 2900 West Orange Road, Mail Station 95305, Tallahassee, FL 32309-2400. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit and reissue, if appropriate, another Public Notice.

The Department will issue the permit with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to sections 120.680 and 120.57 F.S., before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below. Motion is not available in this proceeding.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.680 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 938, Tallahassee, Florida, 32309-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under section 120.680(3) of the Florida Statutes must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of the notice of intent, whichever occurs first. Under section 120.680(3), however, any person who asked the Department for action on the petition shall mail a copy of the petition to the applicant of the address indicated above at the time of filing. The failure of any party to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.680 and 120.57 F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 6A-406.206 of the Florida Administrative Code.

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by sub 2A-106.201 of the Florida Administrative Code.

Because the administrative hearing process is designed to facilitate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. A complete project file is available for public inspection during normal business hours, 9:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Dept. of Environ. Protection Bureau of Air Regulation Suite 4, 111 S.
