BUREAU OF AIR REGULATION

Mr. Darrel J. Graziani, P.E.
Administrator, Air Program
Florida Department of Environmental Protection
400 N. Congress Ave., Suite 200
West Palm Beach, FL 33401

Subject: Compliance plan milestone, Air Operation Permit 0250476-007-AV, Miami-Dade Water and Sewer Department (MDWASD), Central District Wastewater Treatment Plant (CDWWTP)

Dear Mr. Graziani:

In accordance with the compliance plan in Appendix CP of Air Operation Permit 0250476-007-AV, MDWASD is notifying you that the installation of new EMD standby generators nos. 4 and 5 (EU # 19 – 20) was substantially complete on July 3, 2006, 181 days prior to the December 31, 2006 expiration of Air Construction Permit 0250476-004-AC that was in effect on that date. All major components of the subject units were in place on July 3, 2006. Attached, please find photographs taken on July 3, 2006 of the installation of new EMDs nos. 4 and 5 as well as of the new external radiators for the existing EMDs nos. 1 – 3 (EU # 13 – 15).

Although, the installation of new EMDs nos. 4 and 5 is substantially complete, these units will not be capable of normal operations for some time. Therefore, on June 8, 2006, MDWASD requested an extension to Air Construction Permit 0250476-004-AC of one year, to December 31, 2007, primarily to ensure compliance with the compliance plan for the subject units, Appendix CP of Air Operation Permit 0250476-007-AV. This extension was granted by the Florida Department of Environmental Protection, Bureau of Air Regulation, on July 10, 2006 (see attached).

As a designated Responsible Official of this facility, I certify this to be true, accurate, and complete based upon information and belief formed after reasonable inquiry. Please contact me at (786) 552-8116 or Mr. Richard M. O'Rourke, P.E. at (786) 552-8123 if there are any questions regarding this submittal.

Sincerely

Vicente E. Arrebola, P.E.
Assistant Director – Wastewater

VEA/BMG/RMO/JRP.

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. Vicente E. Arrebola, P.E.
Assistant Director, Wastewater
Miami-Dade Water & Sewer Department
3071 S.W. 38 Avenue
Miami, Florida 33146

Re: Extension Request/DEP File No. 0250476-004-AC
Central District Wastewater Treatment Plant

Dear Mr. Arrebola:

The Department reviewed your letter dated June 29, 2006 for an extension of the expiration date of the referenced air construction permit for the construction and installation of two new 2.685 MW diesel generators and the modification of the existing three 2.5 diesel generators at the Central District Wastewater Treatment Plant facility. The Department evaluated your request and agrees to modify the expiration date as requested.

The expiration date is hereby extended from December 31, 2006 to December 31, 2007 to allow sufficient time to meet the compliance deadlines stated in Appendix CP of the Title V permit No. 0250476-007-AV.

For a construction permit, an extension shall be granted if the applicant can demonstrate that, upon completion, the extended permit will comply with the standards and conditions required by the applicable regulations. [Rule 62-4.080(3), F.A.C.]

A copy of this letter shall be filed with the referenced permit and shall become part of the permit. This permitting decision is issued pursuant to Chapter 403, Florida Statutes.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under section 120.60(3) of the Florida Statutes must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of this notice of intent, whichever occurs first. Under section 120.60(3), however, any person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.569 and 120.57 F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code.

"More Protection. Less Process"

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the Department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. Mediation is not available in this proceeding.

In addition to the above, a person subject to regulation has a right to apply for a variance from or waiver of the requirements of particular rules, on certain conditions, under Section 120.542 F.S. The relief provided by this state statute applies only to state rules, not statutes, and not to any federal regulatory requirements. Applying for a variance or waiver does not substitute or extend the time for filing a petition for an administrative hearing or exercising any other right that a person may have in relation to the action proposed in this notice of intent.

The application for a variance or waiver is made by filing a petition with the Office of General Counsel of the Department, 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000. The petition must specify the following information: (a) The name, address, and telephone number of the petitioner; (b) The name, address, and telephone number of the attorney or qualified representative of the petitioner, if any; (c) Each rule or portion of a rule from which a variance or waiver is requested; (d) The citation to the statute underlying (implemented by) the rule identified in (c) above; (e) The type of action requested; (f) The specific facts that would justify a variance or waiver for the petitioner; (g) The reason why the variance or waiver would serve the purposes of the underlying statute (implemented by the rule); and (h) A statement whether the variance or waiver is permanent or temporary and, if temporary, a statement of the dates showing the duration of the variance or waiver requested.

The Department will grant a variance or waiver when the petition demonstrates both that the application of the rule would create a substantial hardship or violate principles of fairness, as each of those terms is defined in Section 120.542(2) F.S., and that the purpose of the underlying statute will be or has been achieved by other means by the petitioner.

Persons subject to regulation pursuant to any federally delegated or approved air program should be aware that Florida is specifically not authorized to issue variances or waivers from any requirements of any such federally delegated or approved program. The requirements of the program remain fully enforceable by the Administrator of the EPA and by any person under the Clean Air Act unless and until the Administrator separately approves any variance or waiver in accordance with the procedures of the federal program.

This permitting decision is final and effective on the date filed with the clerk of the Department unless a petition is filed in accordance with the above paragraphs or unless a request for extension of time in which to file a petition is filed within the time specified for filing a petition pursuant to Rule 62-110.106, F.A.C., and the petition conforms to the content requirements of Rules 28-106.201 and 28-106.301, F.A.C. Upon timely filing of a petition or a request for extension of time, this order will not be effective until further order of the Department.

Any party to this permitting decision (order) has the right to seek judicial review of it under section 120.68 of the Florida Statutes, by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the clerk of the Department of Environmental Protection in the Office of General Counsel, Mail Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The notice must be filed within thirty days after this order is filed with the clerk of the Department.

Executed in Tallahassee, Florida.

Trina L. Vielhauer, Chief
Bureau of Air Regulation

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. Vicente E. Arrebola, P.E.
Assistant Director, Wastewater
Miami-Dade Water & Sewer Department
3071 S.W. 38 Avenue
Miami, Florida 33146

Re: Extension Request/DEP File No. 0250476-004-AC
Central District Wastewater Treatment Plant

Dear Mr. Arrebola:

The Department reviewed your letter dated June 29, 2006 for an extension of the expiration date of the referenced air construction permit for the construction and installation of two new 2.685 MW diesel generators and the modification of the existing three 2.5 diesel generators at the Central District Wastewater Treatment Plant facility. The Department evaluated your request and agrees to modify the expiration date as requested.

The expiration date is hereby extended from December 31, 2006 to December 31, 2007 to allow sufficient time to meet the compliance deadlines stated in Appendix CP of the Title V permit No. 0250476-007-AV.

For a construction permit, an extension shall be granted if the applicant can demonstrate that, upon completion, the extended permit will comply with the standards and conditions required by the applicable regulations. [Rule 62-4.080(3), F.A.C.]

A copy of this letter shall be filed with the referenced permit and shall become part of the permit. This permitting decision is issued pursuant to Chapter 403, Florida Statutes.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under section 120.60(3) of the Florida Statutes must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of this notice of intent, whichever occurs first. Under section 120.60(3), however, any person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.569 and 120.57 F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code.

"More Protection, Less Process"

Printed on recycled paper.

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the Department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. Mediation is not available in this proceeding.

In addition to the above, a person subject to regulation has a right to apply for a variance from or waiver of the requirements of particular rules, on certain conditions, under Section 120.542 F.S. The relief provided by this state statute applies only to state rules, not statutes, and not to any federal regulatory requirements. Applying for a variance or waiver does not substitute or extend the time for filing a petition for an administrative hearing or exercising any other right that a person may have in relation to the action proposed in this notice of intent.

The application for a variance or waiver is made by filing a petition with the Office of General Counsel of the Department, 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000. The petition must specify the following information: (a) The name, address, and telephone number of the petitioner; (b) The name, address, and telephone number of the attorney or qualified representative of the petitioner, if any; (c) Each rule or portion of a rule from which a variance or waiver is requested; (d) The citation to the statute underlying (implemented by) the rule identified in (c) above; (e) The type of action requested; (f) The specific facts that would justify a variance or waiver for the petitioner; (g) The reason why the variance or waiver would serve the purposes of the underlying statute (implemented by the rule); and (h) A statement whether the variance or waiver is permanent or temporary and, if temporary, a statement of the dates showing the duration of the variance or waiver requested.

The Department will grant a variance or waiver when the petition demonstrates both that the application of the rule would create a substantial hardship or violate principles of fairness, as each of those terms is defined in Section 120.542(2) F.S., and that the purpose of the underlying statute will be or has been achieved by other means by the petitioner.

Persons subject to regulation pursuant to any federally delegated or approved air program should be aware that Florida is specifically not authorized to issue variances or waivers from any requirements of any such federally delegated or approved program. The requirements of the program remain fully enforceable by the Administrator of the EPA and by any person under the Clean Air Act unless and until the Administrator separately approves any variance or waiver in accordance with the procedures of the federal program.

This permitting decision is final and effective on the date filed with the clerk of the Department unless a petition is filed in accordance with the above paragraphs or unless a request for extension of time in which to file a petition is filed within the time specified for filing a petition pursuant to Rule 62-110.106, F.A.C., and the petition conforms to the content requirements of Rules 28-106.201 and 28-106.301, F.A.C. Upon timely filing of a petition or a request for extension of time, this order will not be effective until further order of the Department.

Any party to this permitting decision (order) has the right to seek judicial review of it under section 120.68 of the Florida Statutes, by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the clerk of the Department of Environmental Protection in the Office of General Counsel, Mail Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The notice must be filed within thirty days after this order is filed with the clerk of the Department.

Re: Response to Request for Additional Information, Extension of Air
Construction Permit No. 0250476-004-AC for the Central District
Wastewater Treatment Plant

Dear Mr. Linero:

The Miami-Dade Water and Sewer Department (MDWASD) is in receipt of your letter requesting additional information for the referenced construction permit extension request. Thank you for your assistance in securing this extension. Please find the following responses and comments to the items in your request.

1. Explain in detail the delay in the installation of the new 2.865 MW diesel generators. It is our understanding the engines were already purchased and on site, a fact confirmed during a visit to your facility by one of our staff.

Although the 2.865 MW EMD diesel generators were stored on paved area on-site, no work could be started until all the necessary FDEP air and domestic wastewater facility and the local building permits were obtained. For example, Air Construction Permit No. 0250476-004-AC was issued on January 28, 2005.

Once construction on the generator foundations began, unstable subsurface conditions were discovered which necessitated redesigning and repermitting the construction to incorporate driven pilings. This process took several months after which construction proceeded normally until interrupted by several months of intense storm activity including Hurricanes Katrina in August 2005, Rita in September, and Wilma in October. During this period and for many months afterward, and continuing into the present, MDWASD forces, local contractors, and equipment suppliers nationwide were delayed and challenged to deal with the storms and their aftermath.

Other delaying factors included needed upgrades to the plant's electrical and fuel storage and delivery infrastructures to accommodate the new units and facility upgrades performed concurrently by Florida Power and Light. Much of this work had to be done in off-peak periods to minimize disruption to plant operations. Currently construction on the new generators is substantially complete and proceeding normally with remaining tasks outlined in the following sections.

Re: Response to Request for Additional Information, Extension of Air Construction Permit No. 0250476-004-AC for the Central District Wastewater Treatment Plant

2. List any additional tasks to be performed to achieve the replacement of the radiators in the existing three 2.5 MW diesel generators and the installation of the new 2.865 MW diesel generators.

Currently the new radiators for the existing 2.5 MW EMD generators are mounted on their foundations awaiting electrical and mechanical connection. The electrical portion is already contracted to the same vendor as the new EMDs and they will begin after completing the new EMDs. The mechanical connections, i.e. coolant piping, cannot be accomplished until the new EMDS are fully online as it is necessary to take each existing EMD out of service in turn to upgrade the cooling system. These mechanical connections will be completed by MDWASD forces or by outside vendor, whichever proves most expedient.

The installation of the new 2.865 MW EMD diesel generators is substantially complete. Initial startup of EMD # 4 is anticipated to begin in the next two weeks and EMD # 5 will follow 45 – 60 days after as outlined in the following section. After both engines are thoroughly tested and integrated into the plant electrical grid and control infrastructure, initial compliance testing will be scheduled.

3. Identify the approximate dates for completing those tasks.

The table below lays out the estimated schedule of completion. This schedule assumes that construction will continue normally with no delaying events. In the below, EMDs # 1 – 3 and 4 – 5 refer to EU # 013 – 015 and 19 – 20, respectively.

Task	Estimated completion
Initial startup of EMD # 4	July 2006
Testing and integration of EMD # 4	August 2006
Initial startup of EMD # 5	September 2006
Testing and integration of EMD # 5	October 2006
Initial compliance testing EMD # 4 and # 5	November 2006
Electrical connection of new radiators EMD # 1 – # 3	September 2006
Mechanical connection of new radiators	December 2006
Full completion of all work under the permit	December 2006

4. Provide a statement (and basis for believing) that the facility will comply with the permitted emissions standards for NOx and visible emissions (i.e. vendor specifications).

The facility will comply with the permitted emissions standards for NOx and visible emissions as described in Air Construction Permit 0250476-004-AC and Air Operation Permit 0250476-007-AV.

Alvaro Linero, FDEP/TAL

June 29, 2006

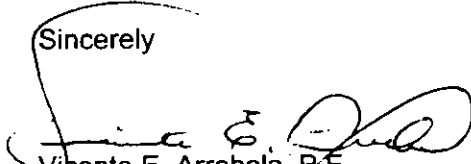

Re: Response to Request for Additional Information, Extension of Air Construction Permit No. 0250476-004-AC for the Central District Wastewater Treatment Plant

Each of the existing three 2.5 MW diesel generators last underwent annual emissions testing in April/May 2006 and were found to be in compliance with all permitted emissions standards for NOx and visible emissions. These results were submitted to FDEP/SED on June 6, 2006. Both of the new 2.865 MW diesel generators underwent emissions testing in Texas as part of pre-acceptance demonstration testing. Additionally, an identical 2.865 MW diesel generator, purchased as part of the same order as the subject units, underwent initial emissions testing at the MDWASD South District Wastewater Treatment Plant (SDWWTP) in April 2006 and was found to be in compliance with the emissions standards for NOx and visible emissions of this construction permit as well; Air Construction Permit 0250476-004-AC specifies that NOx emissions shall not exceed 2.75 lb/mmBTU and the unit at SDWWTP tested at 1.87 lb/mmBTU with zero visible emissions. These results were submitted to FDEP/SED on May 16, 2006.

In conclusion, MDWASD requests an extension to Air Construction Permit 0250476-004-AC of one year, to December 31, 2007, primarily to ensure compliance with the compliance plan for the subject units, Appendix CP of Air Operation Permit 0250476-007-AV. This compliance plan includes milestones for the subject construction that are tied to the expiration of the air construction permit. Extending the air construction permit ensures that MDWASD will meet those compliance deadlines.

As a designated Responsible Official of this facility, I certify this request to be true, accurate, and complete based upon information and belief formed after reasonable inquiry. Please contact me at (786) 552-8107 or Mr. Richard M. O'Rourke, P.E. at (786) 552-8123 if there are any questions regarding this submittal.

Sincerely

Re: Extension Request/DEP File No. 0250476-004-AC
Central District Wastewater Treatment Plant

Dear Mr. Arrebola:

The Department reviewed your request of June 6, 2006 to extend the expiration date of the construction permit from December 31, 2006 to December 31, 2007.

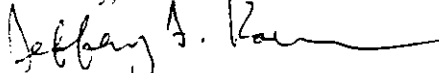

Per Rule 62-4.080(3), F.A.C., an extension for a construction permit shall be granted if the applicant can demonstrate reasonable assurances that upon completion, the extended permit will comply with the standards and conditions required by applicable regulation.

We already have fairly extensive information about this facility and its operation. To complete the reasonable assurance requirement allowing extension of the permit, please submit the following information:

1. Explain in detail the delay in the installation of the new 2.865 MW diesel generators. It is our understanding the engines were already purchased and on site, a fact confirmed during a visit to your facility by one of our staff.
2. List any additional tasks to be performed to achieve the replacement of the radiators in the existing three 2.5 MW diesel generators and the installation of the new 2.865 MW diesel generators.
3. Identify the approximate dates for completing those tasks.
4. Provide a statement (and basis for believing) that the facility will comply with the permitted emissions standards for NOx and visible emissions (i.e. vendor specifications).

According to Rule 62-4-080(3), the permit will remain in effect until the Department takes final action. Permit applicants are advised that Rule 62-4.055(1), F.A.C. now requires applicants to respond to requests for information within 90 days. If you have any questions regarding this matter, please call Teresa Heron at 850/921-9529.

Sincerely,

Fur

Re: Air Construction Permit No. 0250476-004-AC for the Central District
Wastewater Treatment Plant

Dear Mr. Linero:

The Miami-Dade Water and Sewer Department (MDWASD) requests an extension to the above-referenced permit. This permit was issued by the Florida Department of Environmental Protection (FDEP) on January 28, 2005 with an expiration date of December 31, 2006 for the purpose of installing new standby generators and modifying existing units. Construction under this permit is proceeding normally however it is necessary that MDWASD request an extension to ensure that sufficient time remains under the permit to meet the milestone dates in Appendix CP *Compliance Plan* of Title V Air Operation Permit No. 0250476-007-AV.

Therefore, and in accordance with Chapters 62-210 F.A.C. *Stationary Sources - General Requirements* and 62-4 F.A.C. *Permits*, MDWASD requests that the referenced construction permit be extended to December 31, 2007.

As a designated Responsible Official of this facility, I certify this request to be true, accurate, and complete based upon information and belief formed after reasonable inquiry. Please contact me at (786) 552-8107 or Mr. Richard M. O'Rourke, P.E. at (786) 552-8123 if there are any questions regarding this submittal.

Sincerely

Vicente E. Arrebola, P.E.
Assistant Director – Wastewater
