RE: Separation Technologies, Inc.

Dear Syed:

As you know, I represent Separation Technologies, Inc. ("STI"), in its effort to permit a flyash beneficiation project to be located at the St. Johns River Power Park. Currently, STI's PSD permit application for this project is being processed by your office. As we discussed yesterday, STI does not object to a limited waiver of the permit processing time period specified in Rule 62-4.055(5), Florida Administrative Code.

STI agrees as follows: for purposes of calculating the 90 days specified in Rule 62-4.055(5), F.A.C., the "clock will be off" for the month of March 2000. The clock will "restart" on April 1, 2000. Of course, this limited waiver relates only to the F.A.C. section specified above, and only for the time period specified. No waiver of any other rights is intended or agreed to. If you have any questions, please contact me directly at 425-5427.

Sincerely,

William H. Hollimon

RE: Letter of Authorization for Proposed STI Construction
PSD Permit No. PSD-FL-010
Request for Permit Modification Dated December 9, 1999

PSD-FL-010d

Dear Mr. Linero:

The purpose of this letter is to acknowledge the overall environmental compliance responsibilities of JEA for the proposed flyash beneficiation facility to be installed at the Northside Generating Station/St. Johns River Power Park, Permit No. 0310045, by Separation Technologies, Inc. (STI). While STI will be the owner and operator of the proposed facility, the facility will be incorporated into the existing federal Title V operating permit referenced above.

I, the undersigned, am the Responsible Official for the Northside Generating Station/St. Johns River Power Park, Permit No. 0310045. I certify that, based on information and belief formed after reasonable inquiry, that statements made in the application for the Flyash Beneficiation Facility are true, accurate, and complete, and to the best of my knowledge, any estimates of emissions reported in the application are based upon reasonable techniques for calculating emissions. The air pollution emissions units and air pollution control equipment described in this application will be operated and maintained so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the department of Environmental Protection and revisions thereof.

If you have any questions, please do not hesitate to contact either Bert Gianazza, the JEA environmental contact at (904) 665-6247, or the STI facility contact, Frank Hrach at (781) 455-6600 ext. 311.

Sincerely,

A handwritten signature in black ink, appearing to read 'Walter P. Bussells', is written over a horizontal line. The signature is fluid and cursive.
