

# Department of Environmental Protection Division of Air Resource Management OATION FOR AIR PERMIT - LONG FORM TOTAL TION TOTAL TON TOTAL TON

Air Construction Permit – Use this form to apply for an air construction permit for a proposed project:

- subject to prevention of significant deterioration (PSD) review, nonattainment area (NAA) new source review, or maximum achievable control technology (MACT) review; or
- where the applicant proposes to assume a restriction on the potential emissions of one or more pollutants to escape a federal program requirement such as PSD review, NAA new source review, Title V, or MACT; or
- at an existing federally enforceable state air operation permit (FESOP) or Title V permitted facility.

#### **Air Operation Permit** – Use this form to apply for:

- an initial federally enforceable state air operation permit (FESOP); or
- an initial/revised/renewal Title V air operation permit.

Air Construction Permit & Revised/Renewal Title V Air Operation Permit (Concurrent Processing Option)

- Use this form to apply for both an air construction permit and a revised or renewal Title V air operation permit incorporating the proposed project.

To ensure accuracy, please see form instructions.

#### **Identification of Facility**

1.	Facility Owner/Company Name: Jacksonv	ille E	lectric Authorit	у
2.	Site Name: St. Johns River Power Park/Nor	thsid	e Generating S	Station
3.	Facility Identification Number: 0310045			
4.	Facility Location:			
	Street Address or Other Locator: 11201 New	v Ber	lin Road	
	City: Jacksonville County: I	Duva		Zip Code: <b>32226</b>

#### **Purpose of Application**

This application for air permit is submitted to obtain: (Check one)
Air Construction Permit  ⊠ Air construction permit.
Air Operation Permit  ☐ Initial Title V air operation permit.  ☐ Title V air operation permit revision.  ☐ Title V air operation permit renewal.  ☐ Initial federally enforceable state air operation permit (FESOP) where professional engineer (PE) certification is required.  ☐ Initial federally enforceable state air operation permit (FESOP) where professional engineer (PE) certification is not required.
Air Construction Permit and Revised/Renewal Title V Air Operation Permit (Concurrent Processing)  Air construction permit and Title V permit revision, incorporating the proposed project.
Air construction permit and Title V permit renewal, incorporating the proposed project.  Note: By checking one of the above two boxes, you, the applicant, are requesting concurrent processing pursuant to Rule 62-213.405, F.A.C. In such case, you must also check the following box:
☑ I hereby request that the department waive the processing time requirements of the air construction permit to accommodate the processing time frames of the Title V air operation permit.

#### **Application Responsible Official Certification**

Complete if applying for an initial/revised/renewal Title V permit or concurrent processing of an air construction permit and a revised/renewal Title V permit. If there are multiple responsible officials, the "application responsible official" need not be the "primary responsible official."

1.	Application Responsible Official Name:  James Chansler, Vice President, Operations and Maintenance
2.	Application Responsible Official Qualification (Check one or more of the following
	options, as applicable):
	For a corporation, the president, secretary, treasurer, or vice-president of the corporation in
	charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such
	person if the representative is responsible for the overall operation of one or more
	manufacturing, production, or operating facilities applying for or subject to a permit under Chapter 62-213, F.A.C.
	For a partnership or sole proprietorship, a general partner or the proprietor, respectively.
	For a municipality, county, state, federal, or other public agency, either a principal executive officer or ranking elected official.
	☐ The designated representative at an Acid Rain source.
3.	Application Responsible Official Mailing Address
	Organization/Firm: Jacksonville electric Authority
	Street Address: 21 Church Street
	City: Jacksonville State: FL Zip Code: 32202
4.	Application Responsible Official Telephone Numbers
	Telephone: ( ) - ext. Fax: ( ) -
5.	Application Responsible Official Email Address:
6.	Application Responsible Official Certification:
	I, the undersigned, am a responsible official of the Title V source addressed in this air permit
	application. I hereby certify, based on information and belief formed after reasonable inquiry,
	that the statements made in this application are true, accurate and complete and that, to the best of my knowledge, any estimates of emissions reported in this application are based upon
	reasonable techniques for calculating emissions. The air pollutant emissions units and air
	pollution control equipment described in this application will be operated and maintained so as to
	comply with all applicable standards for control of air pollutant emissions found in the statutes of
	the State of Florida and rules of the Department of Environmental Protection and revisions thereof and all other applicable requirements identified in this application to which the Title V
	source is subject. I understand that a permit, if granted by the department, cannot be transferred
	without authorization from the department, and I will promptly notify the department upon sale or
	legal transfer of the facility or any permitted emissions unit. Finally, I certify that the facility and
	each emissions unit are in compliance with all applicable requirements to which they are subject, except as identified in compliance plan(s) submitted with this application.

	Professional Engineer Email Address: kkosky@golder.com
5.	Professional Engineer Statement:
	I, the undersigned, hereby certify, except as particularly noted herein*, that:
	(1) To the best of my knowledge, there is reasonable assurance that the air pollutant emissions unit(s) and the air pollution control equipment described in this application for air permit, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in the Florida Statutes and rules of the Department of Environmental Protection; and
	(2) To the best of my knowledge, any emission estimates reported or relied on in this application are true, accurate, and complete and are either based upon reasonable techniques available for calculating emissions or, for emission estimates of hazardous air pollutants not regulated for an emissions unit addressed in this application, based solely upon the materials, information and calculations submitted with this application.
	(3) If the purpose of this application is to obtain a Title V air operation permit (check here $\boxtimes$ , if so), I further certify that each emissions unit described in this application for air permit, when properly operated and maintained, will comply with the applicable requirements identified in this application to which the unit is subject, except those emissions units for which a compliance plan and schedule is submitted with this application.
	(4) If the purpose of this application is to obtain an air construction permit (check here $\boxtimes$ , if so) or concurrently process and obtain an air construction permit and a Title V air operation permit revision or renewal for one or more proposed new or modified emissions units (check here $\square$ , if so), I further certify that the engineering features of each such emissions unit described in this application have been designed or examined by me or individuals under my direct supervision and found to be in conformity with sound engineering principles applicable to the control of emissions of the air pollutants characterized in this application.
	(5) If the purpose of this application is to obtain an initial air operation permit or operation permit revision or renewal for one or more newly constructed or modified emissions units (check here $\square$ , if so), I further certify that, with the exception of any changes detailed as part of this application, each such emissions unit has been constructed or modified in substantial accordance with the information given in the corresponding application for air construction permit and with all provisions contained in such permit.

RE:

NORTHSIDE GENERATING STATION/SJRPP TITLE V PERMIT 0310045-008-AV; PSD-FL-10 ROTARY DUMPER BAGHOUSE REMOVAL

#### Dear Jay:

This correspondence provides emission calculations regarding the removal of the rotary dumper baghouse. Currently, there are four transfer points within the rotary dumper building that are serviced by a baghouse. However, prior to the transfer of coal from the building by conveyor, particulate matter is controlled using wet suppression. This control technique is identified in Title V and PSD permits. SJRPP desires to remove the baghouse since PM can be effectively controlled using wet suppression making the baghouse unnecessary. Wet suppression will be added to the transfer points within the building in the event additional PM control is needed.

Since the transfer points are completely enclosed within the rotary dumper building, there are no directly applicable emission factors. However, emission estimates using EPA emissions factors for outdoor activities can theoretically be used to estimate emissions by assuming controls are provided by and within the building (i.e., the combined effects of the building and wet suppression). Together particulate control from wet suppression and building enclosure would result in 97% control efficiency. This level of control was initially assumed in the PSD application for the SJRPP and is believed to represent worst case emissions. Based on the maximum potential coal unloaded from rail cars at SJRPP, the removal of the existing rotary dumper baghouse would result in conservatively estimated annual particulate emissions equal to 4.97 and 2.35 tons/year, for PM and PM<sub>10</sub> respectively. The calculations are contained in Table 1. It should be noted that these emissions are probably already included in the total PM emission allocated for the rotary dumper.

Since there is a change in the emissions and control device, a change in the existing Title V and PSD permits will be required. It should be noted however that the magnitude of PM emissions in Table 1 is less than that for a generic exemption from permitting pursuant to F.A.C. 62-210.300 (3) (b) F.A.C. and would otherwise be considered an insignificant activity.

Please call me if there are any questions on the information contained herein.

Sincerely,

GOLDER ASSOCIATES INC.

Kennard F. Kosky, P.E.

#### St. Johns River Power Park (SJRPP) - Material Handling Facilities

St. Johns River Power Park (SJRPP) requests that the Department modify certain provisions of PSD-FL-010(C) regarding PM<sub>10</sub> emissions and to address the visible emission testing requirements for emission points associated with the material handling operations. In addition, several of the emission points associated with the materials handling operations have been eliminated. As a result, SJRPP would like to have these points eliminated from further consideration.

To better describe the fugitive and minor point source emission units, Table 1 was prepared. Table 1 was based on the emission units listed in Table 6 of PSD-FL-010(C). The emission unit number identified in Table 1 was provided in the application for PSD-FL-010(C) in Figure SJRPP01 (copy attached). Table 1 includes the type of PM source, the estimated PM emissions and opacity limits, the request to eliminate  $PM_{10}$  emissions, the request for the frequency of any subsequent VE testing, and a rationale for the testing request. Also identified in Table 1 are several emission units not included in Table 6 of PSD-FL-010(C). These units are identified in *italics* in Table 1. The paragraphs that follow provide further discussion for the request.

#### PM/PM<sub>10</sub> Emissions for Fugitive Emission Units:

SJRPP requests that the Department delete the PM<sub>10</sub> emissions listed in Table 6 of PSD-FL-010(C) and not include these emissions in the Title V permit. The PM<sub>10</sub> emissions expressed in pounds/hour (lb/hr) in Table 6 are an artifact of the air dispersion modeling performed of the Northside Repowering Project when the PSD approval was modified to include several new emission units at SJRPP associated with the material handling [see PSD-FL-010(C); July 28, 1999]. SJRPP requests that the PM<sub>10</sub> emissions be deleted since PM<sub>10</sub> emissions have not been regulated at SJRPP. There were also no changes made to the material handling systems at SJRPP associated with the Northside Repowering Project and no change in the emission points that would require consideration of PM<sub>10</sub> emissions. Table 1 lists the emission points associated with the coal storage yard and transfer systems where the reference to PM<sub>10</sub> emission limits should be eliminated. The list of emission points in Table 1 includes all those listed in Table 6 of PSD-FL-010(C).

#### Visible Emission Standards:

SJRPP requests that the Department modify specific conditions of the PSD-FL-010(C) and the Title V Permit related to the performance of visible emissions (VE) tests for the coal storage yard and transfer systems. The current Title V permit for the coal storage yard and transfer systems included a VE standard of 10 percent (Condition E.4.). In the original PSD permit issued by EPA in 1982, the VE standard was the primary performance standard for these emissions units. The only exception included in the PSD approval was the requirement that a PM test using EPA Method 5 would be required if the VE standard is exceeded for emission units that exhaust through a stack or vent. Neither the original PSD approval nor the Title V Permit specifically identifies the frequency of VE testing.

Table 1 presents a list of the emission points associated with the materials handling operations and the requested frequency for VE testing. This table also includes the rationale for the requested frequency of VE testing. The request is based on the operational experience at SJRPP for over the last 15 years as well as the many inspections by the compliance authority for SJRPP (i.e., the City of Jacksonville, Environmental Resource Management Department).

Table 1 includes three categories for VE testing frequency: upon request, upon Title V permit renewal and annually. The emission locations where VE testing would be conducted upon request are fugitive sources with no stack or vent, making such observations extremely difficult. For these locations, there is no practicable way to properly view VE emissions. Indeed, many of these locations are either

enclosed (such as transfer stations) or very large areas (such as the coal pile). It is often not practicable to properly view VE emissions from these locations. In addition, emission locations associated with handling wet byproducts and with no vent, stack, and emission point would be VE tested upon request. For those emission points that have an identified vent and without a control device, VE testing is proposed to be conducted prior to renewal of the Title V application.

Since the beginning of operation, VE has been observed annually for several areas or emission points. Many of these emission points have dust collectors (fabric filters) and include fuel storage silos, limestone silos, and fly ash silos. VE measurements for these emission points would be conducted on an annual basis.

#### **Eliminated Sources:**

Table 1 lists several emission points that have been eliminated. These should be deleted from Table 6 of PSD-FL-10(C).

Table | Requested Changes to PSD-FL-010(C). St. Johns River Power Park Materials Handling Facilities

Emission Unit No.	MATERIAL HANDLING SOURCE	Type Source	PM Emission (lh/hr)	Opacity Limit (%)	Emission Changes from Table 6	Proposed VE Changes	Rationale

52	Quick Lime Silo with Filter Vent tused for water treatments	Vent	None	1.1.1.1	NA	Upon Renewal of Title Y	Minor emission source, low volume material handling, 15 min VE suggested

Indices indicates that the emission point was not included in Table 6 of PSD-FJ-010(C) but is associated with the material handling at SJRPP and the state of the state of the property of the state o

Annual testing Permit Renewal

Upon Request Source eliminated

#### **Application Responsible Official Certification**

Complete if applying for an initial/revised/renewal Title V permit or concurrent processing of an air construction permit and a revised/renewal Title V permit. If there are multiple responsible officials, the "application responsible official" need not be the "primary responsible official."

1.	Application Responsible Official Name:  James M. Chansler, P.E., D.P.A., Vice President, Operations & Maintenance
2.	Application Responsible Official Qualification (Check one or more of the following options, as applicable):
	For a corporation, the president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit under Chapter 62-213, F.A.C.
	For a partnership or sole proprietorship, a general partner or the proprietor, respectively.
	officer or ranking elected official.  x The designated representative at an Acid Rain source.
3.	Application Responsible Official Mailing Address Organization/Firm:
	Street Address:
	City: Jacksonville State: FL Zip Code: 32202
4.	Application Responsible Official Telephone Numbers  Telephone: (904) 665 - 4433 ext. Fax: (904) 665 - 7376
5.	Application Responsible Official Email Address: chanjm@jea.com
6.	Application Responsible Official Certification:
ļ	I, the undersigned, am a responsible official of the Title V source addressed in this air permit application. I hereby certify, based on information and belief formed after reasonable inquiry, that the statements made in this application are true, accurate and complete and that, to the best of my knowledge, any estimates of emissions reported in this application are based upon reasonable techniques for calculating emissions. The air pollutant emissions units and air pollution control equipment described in this application will be operated and maintained so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof and all other applicable requirements identified in this application to which the Title V source is subject. I understand that a permit, if granted by the department, cannot be transferred without authorization from the department, and I will promptly notify the department upon sale or legal transfer of the facility or any permitted emissions unit. Finally, I certify that the facility and each emissions unit are in compliance with all applicable requirements to which they are subject, except as identified in compliance plan(s) submitted with this application
,	Signature $\frac{3}{100}$

DEP Form No. 62-210.900(1) - Form

Effective: 06/16/03 5

Pre	ofessional Engineer Certification
1.	Professional Engineer Name: Kennard F. Kosky
	Registration Number: 14996
2.	Professional Engineer Mailing Address
	Organization/Firm: Golder Associates Inc.**
	Street Address: 6241 NW 23 <sup>rd</sup> Street, Suite 500
	City: Gainesville State: FL Zip Code: 32653
3.	Professional Engineer Telephone Numbers
	Telephone: (352) 336-5600 ext.516 Fax: (352) 336-6603
	Professional Engineer Email Address: kkosky@golder.com
5.	Professional Engineer Statement:
	I, the undersigned, hereby certify, except as particularly noted herein*, that:
-	(1) To the best of my knowledge, there is reasonable assurance that the air pollutant emissions unit(s) and the air pollution control equipment described in this application for air permit, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in the Florida Statutes and rules of the Department of Environmental Protection; and
	(2) To the best of my knowledge, any emission estimates reported or relied on in this application are true, accurate, and complete and are either based upon reasonable techniques available for calculating emissions or, for emission estimates of hazardous air pollutants not regulated for an emissions unit addressed in this application, based solely upon the materials, information and calculations submitted with this application.
	(3) If the purpose of this application is to obtain a Title $V$ air operation permit (check here $\square$ , if so), I further certify that each emissions unit described in this application for air permit, when properly operated and maintained, will comply with the applicable requirements identified in this application to which the unit is subject, except those emissions units for which a compliance plan and schedule is submitted with this application.
	(4) If the purpose of this application is to obtain an air construction permit (check here $\boxtimes$ , if so) or concurrently process and obtain an air construction permit and a Title $V$ air operation permit revision or renewal for one or more proposed new or modified emissions units (check here $\square$ , if so), I further certify that the engineering features of each such emissions unit described in this application have been designed or examined by me or individuals under my direct supervision and found to be in conformity with sound engineering principles applicable to the control of emissions of the air pollutants characterized in this application.
	(5) If the purpose of this application is to obtain an initial air operation permit or operation permit revision or renewal for one or more newly constructed or modified emissions units (check here , if so), I further certify that, with the exception of any changes detailed as part of this application, each such emissions unit has been constructed or modified in substantial accordance with the information given in the corresponding application for air construction permit and with all provisions contained in such permit.    Market
	(seal)
