Subject: Comments regarding Kennedy draft permit

Hi Bruce,

I wanted to get these comments to you. I'm still checking on what changes we might want to make to the the list of insignificant emissions units.

The only comments we have are:

> 1. On page 36, under D.28., "Subject to EPA approval" should probably be
> removed. Using NOx CEMS for reporting excess emissions is already listed
> in CFR. Therefore, it is understood that this has already been approved
> by EPA.

>
> 2. On page 41, under A.2., the EPA ID now labled as 15 has been changed
> to 7 to better reflect the CT 7 name. The E.U. ID No. will still remain
> 015.

> Let me know if you have any questions with regard to this.

Bruce, since the plans for the empty tanks are unclear at this time, I think we'll just leave the list alone for now. Let me know if you have any questions.

Happy Holidays!
