SEWER

Dear Mr. Pennington:

In accordance with the EPA final rule published in the Federal Register dated July 8, 2004 revising the standards of performance for stationary gas turbines (40 CFR 60, subpart GG), we request a revision to specific condition D.30 of the above referenced permit to remove the requirement for nitrogen testing of diesel fuel. A NOx CEMs is used on this unit to show compliance with the NOx limits, and the allowance for fuel bound nitrogen is not claimed.

If you have any questions, please don't hesitate to call me at 665-6247.

Sincerely,

A handwritten signature in black ink, appearing to read 'N. Bert Gianazza'.
