Re: Notification of Temporary Exemption
Duval County
Stone Container Corporation
Jacksonville, FL 32229-3384
Facility ID: 31JAX160067 22, 23, 26, and 16

Dear Mr. Frey:

This letter will provide notification that Stone Container Corporation (SCC) is exercising the temporary exemption provided by F.A.C. Rule 62-210.300(4).

In preparing its Title V permit application, SCC has been performing source inventories and assembling the information necessary to be able to certify compliance of emitting units and the facility. As part of this effort, SCC's consultant, KBN Engineering and Applied Sciences, Inc.(KBN), determined that a number of emitting units which are listed in the attachment to this letter (Tables 1 and 2), did not have operating permits from the state. Until the recent work by KBN, it was not known that these units had sufficient emissions to require an operating permit. It is SCC's intention to include the attached emissions units as part of a timely and complete permit application for a Title V permit under F.A.C. Chapter 62-213.

To the best of our knowledge none of the listed emitting units on the tables individually or collectively are subject to any applicable regulation or permitting requirement under Rules 62-212.400, 62-212.500, 62-296.800, 62-296.810, 62-296.820 or 62-296.330, F.A.C. or RACT provisions under Rules 62-296.500 through 62-296.712, F.A.C. Neither do these emitting units individually or collectively cause or contribute to a significant net emissions increase under Rule 62-212.400 or 62-212.500, F.A.C., which would trigger preconstruction review. We are still preparing the Title V application, and we will notify you if we find information indicating a significant net emissions increase.

Accordingly, this will provide notification to the Florida Department of Environmental Protection exercising the exemption referenced above. We recognize the authority of the Department to inspect these emissions units at the Department's discretion.

Please let us know if you need any additional information. We believe under the rule that the exemption is exercised on a temporary basis until final action is taken on the Title V permit. We will continue to keep you abreast of any new information that develops regarding these or other units at the plant. If you have any questions or need for other information, please let me know.

Please acknowledge this notification and your concurrence with our qualification for the exemption for the listed units.

Sincerely,

David A. Buff, P.E.
Professional Engineer #19011
