Re: Final National Emission Standards for Hazardous Air Pollutants (NESHAP) – Metal Can Coating

Dear Mr. Bishop:

The 112(j) notification that was submitted last year indicated that Metal Container Corporation may be subject to the NESHAP (40 CFR 63 Subpart KKKK) for Metal Can Coating. You may be interested in knowing that the USEPA published the **final** NESHAP regulation for this source category in the Federal Register on November 13, 2003. Therefore, 112(j) requirements no longer apply to metal can coating activities.

If you are interested in reading the final standards, the NESHAP and a Fact Sheet explaining the standards may be accessed through the USEPA website at <http://www.epa.gov/ttn/atw/mcan/mcanpg.html>. If you do not have access to the Internet, and would like to receive a paper copy of the final standards in the mail, please contact Mr. Bobby Bull at (850) 921-9585 or Robert.Bull@dep.state.fl.us.

“Existing” affected sources must be in compliance with Subpart KKKK standards by November 13, 2006. For the purposes of Subpart KKKK, affected sources are “existing” if construction or reconstruction of the affected source commenced before January 16, 2003. For compliance dates for “new” affected sources, please refer to section 63.3483 of the standards.

Since the submitted 112(j) notification also indicated that Metal Container Corporation may be subject to Subpart DDDDD-I/C/I Boilers and Process Heaters, the facility may still be required to submit a 112(j) MACT Title V permit revision application for this subpart by April 28, 2004, unless this proposed subpart is final by then.

If you have any questions concerning this information, please contact me at (850)921-9534 or Cindy.Phillips@dep.state.fl.us.

Sincerely,

Cindy L. Phillips, P.E., Bureau of Air Regulation

**RE: MACT HAMMER PART 1 APPLICATION - 112(j) NOTIFICATION
METAL CONTAINER CORPORATION
JACKSONVILLE, FLORIDA**

Dear Ms. Phillips:

Enclosed is the MACT Hammer Part 1 Application, the notification required per Section 112(j) of the CAAA, for Metal Container Corporation located in Jacksonville, Florida.

If you have any questions regarding this application please contact me at (314) 957-0714 or Bob Lanham at (314) 957-0769.

Sincerely,
ANHEUSER-BUSCH PACKAGING GROUP

GENERAL INFORMATION

1. Source Name: Metal Container Corporation		2. State Source ID: 0310097	
3. Contact Name and Telephone Number: Tim Schoening; (904) 695-7664			
4. Physical Location of this source			
Address: 1100 North Ellis Road		County: Duval	
City: Jacksonville		State: FL	ZIP Code: 32254-2200
5. Provide the Mailing Address for this source			
Address: 1100 North Ellis Road			
City: Jacksonville		State: FL	ZIP Code: 32254-2200

SOURCE DESCRIPTION AND RELEVANT SOURCE CATEGORY

6. Applicability Determination
The facility is currently a major source of hazardous air pollutant emissions. However, MCC may not be subject to the Metal Can MACT in the future for the following reasons: <ul style="list-style-type: none">• Approval of the 2-piece beverage can delisting petition; and/or,• Approval of the EGBE (ethylene glycol monobutyl ether; CAS No. 111-76-2) delisting petition
7. Brief description of the major source
Manufactures 2-piece aluminum beverage can bodies.
8. List of each relevant source category
40 CFR 63 Subpart KKKK - Metal Can Coating 40 CFR 63 Subpart DDDDD - Boilers/Process Heaters

TYPES OF EMISSION POINTS

9. Identification of types of emission points for each relevant source category
Subpart KKKK - Coating application operations for 2-piece beverage cans including basecoat, bottom varnish, over varnish, decorative ink application equipment, inside spray equipment, curing equipment, and equipment cleanup. Subpart DDDDD - Boilers Refer to Attachment 1 for supplemental emission point information.

112(a) Determinations

10. Identification of any affected source for which a 112(g) determinations has been made
None.

CERTIFICATION AND SIGNATURE

Based on information and belief formed after reasonable inquiry, I certify the statements and information contained in this application are true, accurate, and complete.

ATTACHMENT 1

SUPPLEMENTAL EMISSION POINT INFORMATION

The types of emission points listed on the 112(j) Part 1 application for the Metal Can MACT source category fall within the affected source subcategories **CHECKED** below:

1. One- and two-piece D&I can body coatings
 - 2-Piece Beverage
 - 2-Piece Food
 - 1-Piece Aerosol

2. Sheetcoating
 -

3. Three-piece can assembly coatings
 - Inside spray
 - Aseptic side seam stripe
 - Non-aseptic food side seam strip
 - General line side seam stripe
 - Aerosol side seam stripe

4. End lining coatings
 - Aseptic end seal compounds
 - Non-aseptic end seal compounds

These subcategories represent the draft MACT source subcategories presented by the U.S. Environmental Protection Agency (EPA) at the November 2, 2001 Metal Can MACT stakeholder meeting. EPA has indicated that the MACT rule will include an emission limit (expressed in pounds of HAP per gallon of coating solids applied) for the coatings used in each of these subcategories (e.g., 2-piece beverage, 2-piece food, 1-piece aerosol, sheetcoating, 3-piece inside spray, etc.)

Note: EPA has indicated that cleaning materials will not be included in the subcategory emission limits but rather will be covered by workplace practices/housekeeping requirements.

Re: 112(j) Notification Information Submittal
Metal Container Corporation
Jacksonville, Florida

Dear Ms. Mahaffey:

Thank you for submitting the referenced information in your letter dated May 7, 2002. Your information submittal appears to meet our current 112(j) requirements.

Please be aware that, although your letter refers to this information submittal as a "MACT Hammer Part 1 Application," the Department does not recognize your submittal as a state permit application and has no plans to process it as such.

No further 112(j) information is needed from you at this time.

If you have any questions, please call me at 850/921-9534.

Sincerely,

A handwritten signature in cursive script that reads 'Cindy L. Phillips'.
