RE: Jacksonville Lime, LLC

Draft Air Construction Permit No. 0310583-001-AC

PSD-FL-426, Facility ID No. 0310583

Ms. Crandall,

By the e-mail correspondence received by Jacksonville Lime on December 31, 2013, the Florida Department of Environmental Protection advised us of the intent to issue an air construction permit for the aforementioned manufacturing facility located in Duval County. We have reviewed the intent to issue the construction permit as well as the proposed conditions of the permit and are currently working with the staff at FDEP to resolve several issues regarding rule applicability to some nuisance source dust collectors to be constructed on site.

In an effort to accommodate further discussion with the Department, we request that the time for Jacksonville Lime to petition for a formal administrative hearing be extended to the close of business on January 28, 2014. Jacksonville Lime believes that this time will be sufficient to amicably resolve the issues without the necessity of an administrative hearing.

Thank you for your consideration of this request. Please feel free to contact me if you have any questions or comments upon your review of this information. I can be reached at 205-612-6770.

Best Regards,

Nick Caggiano
