Subject: RE: Table changed?
Attachments: Projected Actual SAM Emissions.doc

I've attached an updated table with based on the **3.30 SO₂ lb/mmBtu** fuel. Please note that this table doesn't include the Cr 6 Turbine update impacts which is +1.9 tons due to an increase in heat input from the project. The table also includes all bypass operations. Call or email me on any questions. I'm at Plant Scholz. Dwain

Subject: Table changed?

Is this the same? Thank you.

Table C. Projected Actual SAM Emissions with High Sulfur Coal (3.35 lb SO₂/MMBtu)

Projected Actual SAM Emissions (TPY)	Baseline Period	Unit 4	Unit 5	Unit 6	Unit 7	Total
Before SCR Systems		18.73	18.2	111.34	179.30	327.57
After SCR Systems		18.73	18.2	207.74	334.51	579.18
After HLI Systems		6.89	6.71	75.54	122.38	211.51
After FGD Systems		5.41	5.27	59.04	95.91	165.62
