Re: Request for Additional Information
DEP File Number: 0450012-002-AC
55.4 Megawatt (MW, net) Biomass-Based Electrical Power Plant

Dear Mr. Davis:

The Department received your application for an Air Construction Permit on February 1, 2011. The application is to construct a 55.4 MW (net) electrical power plant based on biomass gasification and combined cycle in Port St. Joe, Florida.

Pursuant to Rule 62-4.055(1), Florida Administrative Code (F.A.C.), the Department reviewed the application and requests submittal of the following additional information.

Should your response to any of the below items require new calculations, please submit the new calculations, assumptions, reference material and appropriate revised pages of the application form.

1. **Rule Applicability, "Subpart JJJJJJ":** The U.S. District Court for the District of Columbia recently denied a request by the U.S. EPA to extend a deadline of January 21, 2011 to promulgate final National Emissions Standards for Hazardous Air Pollutants (NESHAP) applicable to certain boilers including those located at area sources of hazardous air pollutants (HAP). EPA is required to issue the final rule at 40 Code of Federal Regulations (CFR), Part 63, Subpart JJJJJJ by February 21, 2011. If the rule is actually promulgated, please include an applicability evaluation and (if applicable) provide reasonable assurance of compliance with the requirements contained therein. For reference the draft version of the rule is available at:

www.epa.gov/ttn/atw/boiler/fr04jn10ap.pdf

The relevant court decision is available at:

https://ecf.dcd.uscourts.gov/cgi-bin/show_public_doc?2001cv1537-150

[Rule 62-4.070 (Standards of Issuing or Denying Permits), Florida Administrative Code (F.A.C.)]

2. **Rule Applicability, "Subpart Db":** The char combustor is rated at 155 million British thermal units per hour (mmBtu/hr) and produces some of the heat for the gasification step by heating the sand (olivine) used in both the gasification and combustor fluidized beds. Heat from the char combustor exhaust gas is ultimately recovered in heat exchangers and provides some of the heat used to generate steam and electricity. For the char combustor, please include an applicability evaluation of 40 CFR 60, Subpart Db, Standards of Performance (NSPS) for Industrial-Commercial-Institutional Steam Generating Units. Subpart Db is available at: [Link to Subpart Db](#)

[40 CFR 60, Subpart Db; Rule 62-4.070, F.A.C. and 62-210.800(b)3., F.A.C.]

3. Rule Applicability, "Subpart Eb": Per the application (Page 25) and with relation to gasifier feedstock, a small percentage of the fuel consists of municipal solid waste (MSW) such as yard trimmings. Please provide (as suggested in the application) documentation that the project is a "Qualifying Facility" (QF) pursuant to the Federal Energy Act and thus not subject to 40 CFR 60, Subpart Eb – NSPS for Large Municipal Waste Combustors for Which Construction is Commenced After September 20, 1994. Section 60.50b(e) of Subpart Eb states:

"A qualifying small power production facility, as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. 796(17)(C)), that burns homogeneous waste (such as automotive tires or used oil, but not including refuse-derived fuel) for the production of electric energy is not subject to this subpart if the owner or operator of the facility notifies EPA of this exemption and provides data documenting that the facility qualifies for this exemption." Please provide such referenced documentation.

Subpart Eb is available at:

[Link to Subpart Eb](#)

[40 CFR 60, Subpart Eb; Rule 62-4.070, F.A.C. and 62-210.800(b)7., F.A.C.]

4. Details Regarding Char Combustor: Please provide additional detail regarding the temperature profile of the char combustor exhaust gas through the cyclone(s), heat recovery equipment and air pollution control equipment. Comment on the measures incorporated that will control dioxin and furan (D/F).

[Rule 62-4.070, F.A.C.]

5. Syngas Flare System: It appears from the air permit application report that during emergency shutdown events and possibly other shutdown events, synthetic gas (syngas) generated in the gasifier will not go the syngas cleanup system prior to being combusted in the flare system. Based on the hydrogen sulfide (H₂S) content of the syngas, emission estimates given in Table 3-8 of the application report appear to be based on "cleaned" syngas. Please review and update the sulfur dioxide (SO₂) emission estimates if some untreated syngas will also be flared.

[Rule 62-4.070, F.A.C.]

6. Municipal Solid Waste (Yard Trimmings) Description: Yard waste is defined per § 60.51b (NSPS Subpart Eb - Standards of Performance for Large Municipal Waste Combustors) as follow:

"Yard waste means grass, grass clippings, bushes, shrubs, and clippings from bushes and shrubs that are generated by residential, commercial/retail, institutional, and/or industrial sources as part of maintenance activities associated with yards or other private or public lands. Yard waste does not include construction, renovation, and demolition wastes, which are exempt from the definition of municipal solid waste in this section. Yard waste does not include clean wood, which is exempt from the definition of municipal solid waste in this section."

Does this definition of yard waste accurately reflect the yard waste that will be gasified at the proposed NWFREC? If not, please provide a detailed description (in tabular form if possible) of the types of "yard waste" that will be gasified at the NWFREC.

[Rule 62-4.070, F.A.C.]

7. Biomass Feedstock Description: On Page 18 of the application report, hogged fuel, processed but cuts and fuel crops are indicated as some of the biomass feedstocks that will be gasified at the NWFREC. Please provide a more extensive list (in tabular form if possible) of the types of biomass feedstocks that may be gasified at the NWFREC so that the feedstock fuel slate can be accurately described. Also clarify what types of fuels crops are being considered for use at the NWFREC.

[Rule 62-4.070, F.A.C.]

8. Construction Plan to Minimize Fugitive Dust Emissions: Describe measures to minimize emissions during the construction of the facility. In particular, please describe reasonable precautions to minimize evolution of dust related to scraping of the former coal storage area and during earth moving activities.

[Rules 62-4.070, F.A.C. and 62-296.320(4)(c), F.A.C.]

The Department will resume processing your application after receipt of the requested information. Rule 62-4.050(3), F.A.C., requires that all applications for a construction permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. For any material changes to the application, please include a new certification statement by the authorized representative or responsible official. Rule 62-4.055(1), F.A.C., also requires applicants to respond to requests for information within 90 days or provide a written request for an additional period of time to submit the information.

If you should have any questions, please contact me, David Read (850-717-9075) or Melody Lovin at 850-717-9092.

Sincerely,

A.A. Linero, Program Administrator
Bureau of Air Regulation
Special Projects Section
1-850-717-9076

Dear Sir/Madam:

The DEP Bureau of Air Regulation is distributing documents electronically in lieu of hard copies through the United States Postal System, to provide greater service to the applicant and the community. **Please send a "reply" message verifying receipt of the attached document(s);** this may be done by selecting "Reply" on the menu bar of your e-mail software, *noting that you can view the documents*, and then selecting "Send". We must receive verification of receipt and your reply will preclude subsequent e-mail transmissions to verify receipt of the document(s). The document(s) may require immediate action within a specified time frame. Please open and review the document(s) as soon as possible.

Please advise this office of any changes to your e-mail address or that of the Engineer-of-Record.

Information on this project, such as departmental contacts, application documents, and a map showing the location of the project can be found at the following website:

http://www.dep.state.fl.us/air/emission/bioenergy/northwest_renewable.htm

For those copied on this communication that wish to be removed from the notification list for this air construction permit application, please contact the DEP Bureau of Air Regulation at (850) 717-9000 or note it in the response to this e-mail.

Thank you,

Elizabeth Walker

Dear Sir/Madam:

The DEP Bureau of Air Regulation is distributing documents electronically in lieu of hard copies through the United States Postal System, to provide greater service to the applicant and the community. **Please send a "reply" message verifying receipt of the attached document(s);** this may be done by selecting "Reply" on the menu bar of your e-mail software, *noting that you can view the documents*, and then selecting "Send". We must receive verification of receipt and your reply will preclude subsequent e-mail transmissions to verify receipt of the document(s). The document(s) may require immediate action within a specified time frame. Please open and review the document(s) as soon as possible.

Please advise this office of any changes to your e-mail address or that of the Engineer-of-Record.

Information on this project, such as departmental contacts, application documents, and a map showing the location of the project can be found at the following website:

http://www.dep.state.fl.us/air/emission/bioenergy/northwest_renewable.htm

For those copied on this communication that wish to be removed from the notification list for this air construction permit application, please contact the DEP Bureau of Air Regulation at (850) 717-9000 or note it in the response to this e-mail.

Thank you,

Elizabeth Walker

Bureau of Air Regulation

Division of Air Resource Management (DARM)

(850)717-9093
