I really appreciate your quick response on this matter. Is there any way I can be kept informed if a new application is filed? I am planning to purchase real estate in St. Joe and this project would totally alter my decision, as I feel the ecosystem in the St. Joe area would be compromised as well as the close proximity to populated areas is a danger to public health.

Thank-you again
Karn Spragg

Ms. Spragg, the air permit application for a biomass project in Port St. Joe was withdrawn on April 13th, 2010. Go to the link below for all the information on the permit application including the draft permit package, the petition of the draft permit and the letter withdrawing the application.

As of today, we have not received a new application for a biomass project in Port St Joe. However, we have received indications that a new application **may I repeat may** be submitted within the next several months. If an application is submitted, we will require that the applicant published in a local newspaper of general circulation a notice of an air permit application so that the public is informed about the **new** project.

Please feel free to call me if you have any more questions.
