

FINAL DETERMINATION

White Springs Agricultural Chemicals, Inc.
Permit No. 0470002-049-AC
Phosphoric Acid Storage Tanks

An Intent to Issue an air construction permit to White Springs Agricultural Chemicals, Inc., to install two phosphoric acid storage tanks at the Swift Creek complex in Hamilton County was distributed on June 22, 2004. The Notice of Intent was published in the Jasper News on September 2, 2004. Copies of the draft construction permit were available for public inspection at the Department offices in Jacksonville and Tallahassee.

The applicant noticed that the capacities of the phosphoric acid tanks had been incorrectly stated in the application and requested that the capacities be changed from 40,000 gallons each to 50,000 gallons each. The applicant also requested that the expiration date be extended to December 31, 2005. No other comments were received following publication of the Notice.

The final action of the Department is to issue the permit with the applicant's requested changes.

DEP File No. 0470002-049-AC

Enclosed is the FINAL Permit Number 0470002-049-AC for installing two Phosphoric Acid Storage Tanks at the existing Swift Creek Complex in Hamilton County. This permit is issued pursuant to Chapter 403, Florida Statutes and in accordance with Rule 62-296.403, F.A.C.

Any party to this order (permit) has the right to seek judicial review of the permit pursuant to Section 120.68, F.S., by the filing of a Notice of Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Legal Office; and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The Notice of Appeal must be filed within 30 (thirty) days from the date this Notice is filed with the Clerk of the Department.

Executed in Tallahassee, Florida.

Trina L. Vielhauer, Chief
Bureau of Air Regulation

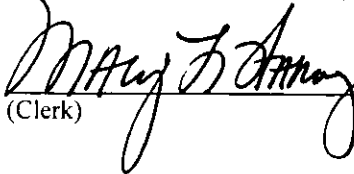

CERTIFICATE OF SERVICE

The undersigned duly designated deputy agency clerk hereby certifies that this NOTICE OF FINAL PERMIT (including the FINAL permit) was sent by certified mail (*) and copies were mailed by U.S. Mail before the close of business on 10/14/04 to the person(s) listed:

Paul H. Barrett
General Manager

DEP Permit No.:	0470002-049-AC
Project:	Install Two Phosphoric Acid Aging Tanks/Swift Creek
SIC No.:	2874
Expiration:	December 31, 2005

PROJECT AND LOCATION:

Permit to install two phosphoric acid aging tanks in the acid clarification section of the existing tank farm for the Swift Creek Complex.

The facility is located E of SR 137, E of US 41, N of White Springs in Hamilton County, Florida.

The UTM coordinates are: Zone 17; 328.3 km E and 3368.8 km N.

STATEMENT OF BASIS:

This construction permit is issued under the provisions of Chapter 403 of the Florida Statutes (F.S.), and Chapters 62-4, 62-204, 62-210, 62-212, 62-296, and 62-297 of the Florida Administrative Code (F.A.C.). The above named permittee is authorized to construct the facility in accordance with the conditions of this permit and as described in the application, approved drawings, plans, and other documents on file with the Department of Environmental Protection (Department).

ATTACHED APPENDICES MADE A PART OF THIS PERMIT:

Appendix GC General Conditions

Michael G. Cooke, Director
Division of Air Resource
Management

AIR CONSTRUCTION PERMIT 0470002-049-AC
SECTION III. EMISSIONS UNIT(S) SPECIFIC REQUIREMENTS

FACILITY DESCRIPTION

White Springs Agricultural Chemicals, Inc. (WSAC) operates a phosphate fertilizer manufacturing facility near White Springs, Hamilton County, Florida, producing sulfuric acid, wet-process phosphoric acid, ammoniated phosphate fertilizers and related products. WSAC is applying for a non-PSD permit to install two additional phosphoric acid aging tanks in the acid clarification section of the existing tank farm for the Swift Creek Complex. This permit addresses only the Acid Clarification Plant and does not supersede any provisions of any other permit affecting the Swift Creek Complex.

REGULATORY CLASSIFICATION

Phosphate rock processing plants are listed as a Major Facility Category in Table 62-212.400-1, F.A.C., "Major Facility Categories." Therefore, stack and fugitive emissions of over 100 TPY of a regulated pollutant are sufficient to classify the installation as a "Major Facility" per the definitions in Rule 62-210.200, F.A.C., subject to the Significant Emission Rates given in Table 62-212.400-2, F.A.C. and the requirements of Rule 62-212.400, F.A.C., Prevention of Significant Deterioration (PSD) and Best Available Control Technology (BACT) if applicable.

This facility is classified as a "Major or Title V Source" per Rule 62-210.200, F.A.C., because it has the potential to emit at least 100 tons per year of particulate matter. This facility in its entirety is also a major source of hazardous air pollutants (HAPs).

Rule 62-296.403(2), F.A.C. requires that existing phosphate processing plants or plant sections processing or handling phosphoric acid or products of phosphoric acid processing shall not exceed 0.4 pounds per ton of P_2O_5 . This rule applies to the Acid Clarification Plant including the two phosphoric acid aging tanks to be installed under this permit.

PERMIT SCHEDULE:

- 04-06-04: Date of Receipt of Application
- 04-06-04: Application Complete
- 06-22-04: Issued Intent to Issue Permit
- 09-02-04: Notice of Intent published

RELEVANT DOCUMENTS:

The documents listed below are specifically related to this permitting action and form the basis of the permit. They are on file with the Department:

- Application received April 6, 2004

AIR CONSTRUCTION PERMIT 0470002-049-AC
SECTION III. EMISSIONS UNIT(S) SPECIFIC REQUIREMENTS

Regulating Agencies: All documents related to applications for permits to operate, reports, tests, minor modifications and notifications shall be submitted to the Department's Northeast District Office, 7825 Baymeadows Way, Suite 200B, Jacksonville, Florida 32256-7590. All applications for permits to construct or modify an emissions unit(s) *subject to the Prevention of Significant Deterioration or Nonattainment (NA) review requirements* should be submitted to the Bureau of Air Regulation (BAR), Florida Department of Environmental Protection (FDEP), 2600 Blair Stone Road, MS 5505, Tallahassee, Florida 32399-2400 (phone number 850/488-0114).

General Conditions: The owner and operator is subject to and shall operate under the attached General Permit Conditions G.1 through G.15 listed in Appendix GC of this permit. General Permit Conditions are binding and enforceable pursuant to Chapter 403 of the Florida Statutes. [Rule 62-4.160, F.A.C.]

Terminology: The terms used in this permit have specific meanings as defined in the corresponding chapters of the Florida Administrative Code.

Applicable Regulations, Forms and Application Procedures: Unless otherwise indicated in this permit, the construction and operation of the subject emissions unit shall be in accordance with the capacities and specifications stated in the application. The facility is subject to all applicable provisions of Chapter 403, F.S. and Florida Administrative Code Chapters 62-4, 62-110, 62-204, 62-212, 62-213, 62-296, 62-297 and the Code of Federal Regulations Title 40, Part 60, adopted by reference in the Florida Administrative Code (F.A.C.) regulations. The facility is subject to all applicable provisions of the Code of Federal Regulations Title 40, Part 63, Subpart BB. The permittee shall use the applicable forms listed in Rule 62-210.900, F.A.C. and follow the application procedures in Chapter 62-4, F.A.C. Issuance of this permit does not relieve the facility owner or operator from compliance with any applicable federal, state, or local permitting or regulations. [Rules 62-204.800, 62-210.300 and 62-210.900, F.A.C.]

Expiration: This air construction permit shall expire on **December 31, 2005** [Rule 62-210.300(1), F.A.C.]. The permittee may, for good cause, request that this construction permit be extended. Such a request shall be submitted to the Bureau of Air Regulation prior to 60 days before the expiration of the permit. However, the permittee shall promptly notify the Department's Northeast District Office of any delays in completion of the project, which would affect the startup day by more than 90 days. [Rule 62-4.090, F.A.C.]

Application for Title V Permit: An application for a Title V operating permit, pursuant to Chapter 62-213, F.A.C., must be submitted to the Department's Northeast District Office at least ninety days before expiration of this construction permit, but no later than 180 days after commencing operation. [Chapter 62-213, F.A.C.]

Permit Approval: Approval to construct shall become invalid if construction is not commenced within 18 months after receipt of such approval, or if construction is discontinued for a period of 18 months or more, or if construction is not completed within a reasonable time. The Department may extend the 18-month period upon a satisfactory showing that an extension is justified. [40 CFR 52.21(r)(2)].

Annual Reports: Pursuant to Rule 62-210.370(2), F.A.C., Annual Operation Reports, the permittee is required to submit annual reports on the actual operating rates and emissions from this facility. Annual operating reports using DEP Form 62-210.900(4) shall be sent to the DEP's Northeast District office by March 1st of each year.

Stack Testing Facilities: Stack sampling facilities shall be installed in accordance with Rule 62-297.310(6), F.A.C.

Quarterly Reports: Quarterly excess emission reports, in accordance with 40 CFR 60.7 (a)(7) (c) (1997 version), shall be submitted to the DEP's Northeast District office.

New or Additional Conditions: For good cause shown and after notice and an administrative hearing, if requested, the Department may require the permittee to conform to new or additional conditions. The Department shall allow the permittee a reasonable time to conform to the new or additional conditions and on application of the permittee, the Department may grant additional time. [Rule 62-4.080, F.A.C.]

SUBSECTION A. Acid Clarification Plant

The Specific Conditions listed in this section apply to the following emission units:

EMISSION UNIT NO.	EMISSION UNIT DESCRIPTION
071	Acid Clarification Plant

The Acid Clarification Plant is permitted to handle phosphoric acid containing up to 90.18 tons per hour of 100 percent P₂O₅ input on a monthly rolling average or 100 tons per hour of 100 percent P₂O₅ input on a daily rolling average. There are currently four aging tanks with a total capacity of about 2,000,000 gallons. This permit allows two additional aging tanks with a capacity of 50,000 gallons each for a total of six aging tanks in the modified Acid Clarification Plant having a total capacity of 2,100,000 gallons. Although there will be additional holding capacity, the permitted throughput capacity for the Acid Clarification Plant will not increase. The effect of the new tanks will be to improve product clarification by providing more settling and polishing capability. The four existing aging tanks are vented to a pond water scrubber for fluoride control. The two new tanks will be vented to the same fluoride scrubber.

CONSTRUCTION

1. Addition of Two Phosphoric Acid Aging Tanks:

The permittee is authorized to modify the Acid Clarification Plant by installing two new 50,000 gallon phosphoric acid aging tanks. The tanks will be vented to the existing fluoride scrubber.

[Application dated April 6, 2004]

EMISSION AND PERFORMANCE REQUIREMENTS

2. Production:

The phosphoric acid throughput rate for the Acid Clarification Plant shall not exceed 90.18 tons of 100 percent P₂O₅ input per hour based on a monthly rolling average or 100 tons of 100 percent P₂O₅ input per hour based on a daily rolling average.

[Application dated April 6, 2004; Permit 0470002-034-AC, Rule 62-296.403(2), and 62-210.200(PTE), F.A.C.; Permit 0470002-033-AV]

3. Hours of Operation:

Operation of the modified Acid Clarification Plant shall be permitted for up to 8760 hours/year.

[Application dated April 6, 2004; Rules 62-4.160(2) and 62-210.200(PTE), F.A.C.; Permit 0470002-033-AV]

4. Emissions:

Total Fluoride emissions from the Acid Clarification Plant shall not exceed 4.51 lb/hr; 0.05 lb/ton P₂O₅ input; and 18.26 TPY.

[Application dated April 6, 2004; BACT from AC24-2722 issued 02-28-78; Rule 62-296.403(2), Permit 0470002-033-AV]

TEST METHODS AND PROCEDURES

5. The compliance test procedures for Total Fluorides shall be in accordance with EPA Methods 13A or 13B as published in 40 CFR 60, Appendix A.

[Rule 62-297.401(13), F.A.C.]

6. Before this construction permit expires, and annually, the subject emissions units shall be tested for compliance with the applicable emission limits. For the duration of all tests the emission units shall be operating at permitted capacity. Permitted capacity is defined as 90-100 percent of the maximum operating rate allowed by the permit. If it is impracticable to test at permitted capacity, then the emission unit may be tested at less than permitted capacity (i.e., 90% of the maximum operating rate allowed by the permit); in this case, subsequent emission unit operation is limited to 110 percent of the test load until a new test is conducted. Once the emission unit is so limited, then operation at higher capacities is allowed for no more than 15 consecutive days for the purposes of additional compliance testing to regain the permitted capacity in the permit.

[Rule 62-297.310, F.A.C.]

7. The Department's Northeast District office shall be notified in writing at least 15 days prior to compliance testing. Written reports of the test results shall be submitted to that office within 45 days of test completion.

[Rule 62-297.310, F.A.C.]

APPENDIX GC
GENERAL PERMIT CONDITIONS [F.A.C. 62-4.160]

- G.1 The terms, conditions, requirements, limitations, and restrictions set forth in this permit are "Permit Conditions" and are binding and enforceable pursuant to Sections 403.161, 403.727, or 403.859 through 403.861, Florida Statutes. The permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.
- G.2 This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings or exhibits, specifications, or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.
- G.3 As provided in Subsections 403.087(6) and 403.722(5), Florida Statutes, the issuance of this permit does not convey and vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations. This permit is not a waiver or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in the permit.
- G.4 This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.
- G.5 This permit does not relieve the permittee from liability for harm or injury to human health or welfare, animal, or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department.
- G.6 The permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed or used by the permittee to achieve compliance with the conditions of this permit, as required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to achieve compliance with the conditions of the permit and when required by Department rules.
- G.7 The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at a reasonable time, access to the premises, where the permitted activity is located or conducted to:
- a) Have access to and copy and records that must be kept under the conditions of the permit;
 - b) Inspect the facility, equipment, practices, or operations regulated or required under this permit, and,
 - c) Sample or monitor any substances or parameters at any location reasonably necessary to assure compliance with this permit or Department rules.
- Reasonable time may depend on the nature of the concern being investigated.
- G.8 If, for any reason, the permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the permittee shall immediately provide the Department with the following information:
- a) A description of and cause of non-compliance; and
 - b) The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the non-compliance.
- The permittee shall be responsible for any and all damages, which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.
- G.9 In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the Florida Statutes or Department rules, except where such use is prescribed by Sections 403.73 and 403.111, Florida

APPENDIX GC
GENERAL PERMIT CONDITIONS [F.A.C. 62-4.160]

Statutes. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.

- G.10 The permittee agrees to comply with changes in Department rules and Florida Statutes after a reasonable time for compliance, provided, however, the permittee does not waive any other rights granted by Florida Statutes or Department rules.
- G.11 This permit is transferable only upon Department approval in accordance with Florida Administrative Code Rules 62-4.120 and 62-730.300, F.A.C., as applicable. The permittee shall be liable for any non-compliance of the permitted activity until the transfer is approved by the Department.
- G.12 This permit or a copy thereof shall be kept at the work site of the permitted activity.
- G.13 This permit also constitutes:
- a) Determination of Best Available Control Technology ()
 - b) Determination of Prevention of Significant Deterioration ()
 - c) Compliance with New Source Performance Standards ()
 - d) Compliance with National Emission Standards for Hazardous Air Pollutants ()
- G.14 The permittee shall comply with the following:
- a) Upon request, the permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
 - b) The permittee shall hold at the facility or other location designated by this permit records of all monitoring information (including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation) required by the permit, copies of all reports required by this permit, and records of all data used to complete the application or this permit. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule.
 - c) Records of monitoring information shall include:
 - 1. The date, exact place, and time of sampling or measurements;
 - 2. The person responsible for performing the sampling or measurements;
 - 3. The dates analyses were performed;
 - 4. The person responsible for performing the analyses;
 - 5. The analytical techniques or methods used; and
 - 6. The results of such analyses.
- G.15 When requested by the Department, the permittee shall within a reasonable time furnish any information required by law, which is needed to determine compliance with the permit. If the permittee becomes aware that relevant facts were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be corrected promptly.

FINAL DETERMINATION

White Springs Agricultural Chemicals, Inc.

However, the permittee shall promptly notify the Department's Northeast District Office of any delays in completion of the project, which would affect the startup day by more than 90 days. [Rule 62-4.090, F.A.C.]

Application for Title V Permit: An application for a Title V operating permit, pursuant to Chapter 62-213, F.A.C., must be submitted to the Department's Northeast District Office at least ninety days before expiration of this construction permit, but no later than 180 days after commencing operation. [Chapter 62-213, F.A.C.]

Permit Approval: Approval to construct shall become invalid if construction is not commenced within 18 months after receipt of such approval, or if construction is discontinued for a period of 18 months or more, or if construction is not completed within a reasonable time. The Department may extend the 18-month period upon a satisfactory showing that an extension is justified. [40 CFR 52.21(r)(2)].

Annual Reports: Pursuant to Rule 62-210.370(2), F.A.C., Annual Operation Reports, the permittee is required to submit annual reports on the actual operating rates and emissions from this facility. Annual operating reports using DEP Form 62-210.900(4) shall be sent to the DEP's Northeast District office by March 1st of each year.

Stack Testing Facilities: Stack sampling facilities shall be installed in accordance with Rule 62-297.310(6), F.A.C.

Quarterly Reports: Quarterly excess emission reports, in accordance with 40 CFR 60.7 (a)(7) (c) (1997 version), shall be submitted to the DEP's Northeast District office.

New or Additional Conditions: For good cause shown and after notice and an administrative hearing, if requested, the Department may require the permittee to conform to new or additional conditions. The Department shall allow the permittee a reasonable time to conform to the new or additional conditions and on application of the permittee, the Department may grant additional time. [Rule 62-4.080, F.A.C.]

SUBSECTION A. Acid Clarification Plant

The Specific Conditions listed in this section apply to the following emission units:

EMISSION UNIT NO.	EMISSION UNIT DESCRIPTION
071	Acid Clarification Plant

The Acid Clarification Plant is permitted to handle phosphoric acid containing up to 90.18 tons per hour of 100 percent P₂O₅ input on a monthly rolling average or 100 tons per hour of 100 percent P₂O₅ input on a daily rolling average. There are currently four aging tanks with a total capacity of about 2,000,000 gallons. This permit allows two additional aging tanks with a capacity of 50,000 gallons each for a total of six aging tanks in the modified Acid Clarification Plant having a total capacity of 2,100,000 gallons. Although there will be additional holding capacity, the permitted throughput capacity for the Acid Clarification Plant will not increase. The effect of the new tanks will be to improve product clarification by providing more settling and polishing capability. The four existing aging tanks are vented to a pond water scrubber for fluoride control. The two new tanks will be vented to the same fluoride scrubber.

CONSTRUCTION

1. Addition of Two Phosphoric Acid Aging Tanks:

The permittee is authorized to modify the Acid Clarification Plant by installing two new 50,000 gallon phosphoric acid aging tanks. The tanks will be vented to the existing fluoride scrubber.

[Application dated April 6, 2004]

EMISSION AND PERFORMANCE REQUIREMENTS

2. Production:

The phosphoric acid throughput rate for the Acid Clarification Plant shall not exceed 90.18 tons of 100 percent P₂O₅ input per hour based on a monthly rolling average or 100 tons of 100 percent P₂O₅ input per hour based on a daily rolling average.

[Application dated April 6, 2004; Permit 0470002-034-AC, Rule 62-296.403(2), and 62-210.200(PTE), F.A.C.; Permit 0470002-033-AV]

3. Hours of Operation:

Operation of the modified Acid Clarification Plant shall be permitted for up to 8760 hours/year.

[Application dated April 6, 2004; Rules 62-4.160(2) and 62-210.200(PTE), F.A.C.; Permit 0470002-033-AV]

4. Emissions:

Total Fluoride emissions from the Acid Clarification Plant shall not exceed 4.51 lb/hr; 0.05 lb/ton P₂O₅ input; and 18.26 TPY.

[Application dated April 6, 2004; BACT from AC24-2722 issued 02-28-78; Rule 62-296.403(2), Permit 0470002-033-AV]

TEST METHODS AND PROCEDURES

5. The compliance test procedures for Total Fluorides shall be in accordance with EPA Methods 13A or 13B as published in 40 CFR 60, Appendix A.

[Rule 62-297.401(13), F.A.C.]

6. Before this construction permit expires, and annually, the subject emissions units shall be tested for compliance with the applicable emission limits. For the duration of all tests the emission units shall be operating at permitted capacity. Permitted capacity is defined as 90-100 percent of the maximum operating rate allowed by the permit. If it is impracticable to test at permitted capacity, then the emission unit may be tested at less than permitted capacity (i.e., 90% of the maximum operating rate allowed by the permit); in this case, subsequent emission unit operation is limited to 110 percent of the test load until a new test is conducted. Once the emission unit is so limited, then operation at higher capacities is allowed for no more than 15 consecutive days for the purposes of additional compliance testing to regain the permitted capacity in the permit.

[Rule 62-297.310, F.A.C.]

7. The Department's Northeast District office shall be notified in writing at least 15 days prior to compliance testing. Written reports of the test results shall be submitted to that office within 45 days of test completion.

[Rule 62-297.310, F.A.C.]

APPENDIX GC
GENERAL PERMIT CONDITIONS [F.A.C. 62-4.160]

- G.1 The terms, conditions, requirements, limitations, and restrictions set forth in this permit are "Permit Conditions" and are binding and enforceable pursuant to Sections 403.161, 403.727, or 403.859 through 403.861, Florida Statutes. The permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.
- G.2 This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings or exhibits, specifications, or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.
- G.3 As provided in Subsections 403.087(6) and 403.722(5), Florida Statutes, the issuance of this permit does not convey and vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations. This permit is not a waiver or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in the permit.
- G.4 This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.
- G.5 This permit does not relieve the permittee from liability for harm or injury to human health or welfare, animal, or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department.
- G.6 The permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed or used by the permittee to achieve compliance with the conditions of this permit, as required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to achieve compliance with the conditions of the permit and when required by Department rules.
- G.7 The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at a reasonable time, access to the premises, where the permitted activity is located or conducted to:
- a) Have access to and copy and records that must be kept under the conditions of the permit;
 - b) Inspect the facility, equipment, practices, or operations regulated or required under this permit, and,
 - c) Sample or monitor any substances or parameters at any location reasonably necessary to assure compliance with this permit or Department rules.
- Reasonable time may depend on the nature of the concern being investigated.
- G.8 If, for any reason, the permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the permittee shall immediately provide the Department with the following information:
- a) A description of and cause of non-compliance; and
 - b) The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the non-compliance.
- The permittee shall be responsible for any and all damages, which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.
- G.9 In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the Florida Statutes or Department rules, except where such use is prescribed by Sections 403.73 and 403.111, Florida

APPENDIX GC
GENERAL PERMIT CONDITIONS [F.A.C. 62-4.160]

Statutes. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.

- G.10 The permittee agrees to comply with changes in Department rules and Florida Statutes after a reasonable time for compliance, provided, however, the permittee does not waive any other rights granted by Florida Statutes or Department rules.
- G.11 This permit is transferable only upon Department approval in accordance with Florida Administrative Code Rules 62-4.120 and 62-730.300, F.A.C., as applicable. The permittee shall be liable for any non-compliance of the permitted activity until the transfer is approved by the Department.
- G.12 This permit or a copy thereof shall be kept at the work site of the permitted activity.
- G.13 This permit also constitutes:
- a) Determination of Best Available Control Technology ()
 - b) Determination of Prevention of Significant Deterioration ()
 - c) Compliance with New Source Performance Standards ()
 - d) Compliance with National Emission Standards for Hazardous Air Pollutants ()
- G.14 The permittee shall comply with the following:
- a) Upon request, the permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
 - b) The permittee shall hold at the facility or other location designated by this permit records of all monitoring information (including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation) required by the permit, copies of all reports required by this permit, and records of all data used to complete the application or this permit. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule.
 - c) Records of monitoring information shall include:
 - 1. The date, exact place, and time of sampling or measurements;
 - 2. The person responsible for performing the sampling or measurements;
 - 3. The dates analyses were performed;
 - 4. The person responsible for performing the analyses;
 - 5. The analytical techniques or methods used; and
 - 6. The results of such analyses.
- G.15 When requested by the Department, the permittee shall within a reasonable time furnish any information required by law, which is needed to determine compliance with the permit. If the permittee becomes aware that relevant facts were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be corrected promptly.

Environmental Protection

Memorandum

TO: Michael Cooke
THRU: Trina Vielhauer *TV*
THRU: Jim Pennington *JKP*
FROM: Syed Arif SA *SA 10/12*
DATE: October 12, 2004
SUBJECT: White Springs Agricultural Chemicals, Inc.
DEP File No. 0470002-049-AC

Attached for your approval and signature is the final construction permit to install two phosphoric acid storage tanks at the Swift Creek Complex in Hamilton County operated by White Springs Agricultural Chemicals, Inc.

There will be no increase in production or product throughput resulting from this modification. The purpose of the two additional tanks is to increase clarification and polishing capacity for the current level of production. There will be no measurable increase in actual emissions or potential emissions resulting from this modification since the tanks will be vented to a 99+ percent efficient fluoride scrubber.

No comments were received during the public comment period. I recommend your approval and signature.

The permit clock is currently on Day 85.
