# Interoffice Memorandum

TO: Permit File  
FROM: Pradeep Raval   
SUBJ: Soda ash storage and handling system review, Occidental Chemical Corporation, Permit No. AC 24-165588  
DATE: June 19, 1989

In a telephone discussion with Charles Pults of Occidental, the hours of operation for the storage silo vacuum pump and the ready bin blower/fan were revised to 1800 and 2700 hours/year respectively. It was discussed that the emission estimates would also be revised to reflect the increase in operating hours. The revision was made to allow greater flexibility in the operating hours in the permit.
