RE: FDER Letter December 24, 1991  
Construction Permit Application "GSPA Plant"

Dear Mr. Fancy:

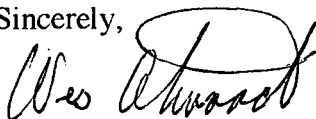

The original application dated November 25, 1991 included a facility location at Occidental's Swift Creek Chemical Complex. For engineering reasons it was decided later to install it at the Suwannee River Chemical Plant, which is also the location of the "B" Sulfuric Acid Plant, the subject of the NO<sub>x</sub> offset referred to in your letter.

The revised application was stamped in December 19, 1991 at the Northeast District Office by Johnny Cole.

We believe this change in location predated, and hence resolved, the concern expressed in the reference letter and understand, therefore, that the application was completed in December 1991.

Thank you for your cooperation.

Sincerely,

Wesley W. Atwood  
Environmental Special  
Projects Manager

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Mr. J. B. Munroe  
Vice President, Operations  
Occidental Chemical Corporation  
P. O. Box 300  
White Springs, Florida 32096

Dear Mr. Munroe:

RE: Construction Permit Application for GSPA Plant  
Submitted November 25, 1991

The subject application was filed with the Department's Northeast District office on November 25, 1991, and forwarded to Tallahassee for preliminary analysis. After consideration of the requested emission offset credits, we believe that the two facilities being separate will preclude avoidance of PSD review. Therefore, please resubmit the revised application to the Department's Tallahassee office for processing.

Sincerely,

C. H. Fancy, P.E.  
Chief  
Bureau of Air Regulation

1/2

This looks like it would change the situation to where they could look at contemporaneous increases and decreases and might set out of PSD.
