Re: Second Request for Additional Information  
Payne Creek Generating Station  
Peaker Project  
File No. 0490340-003-AC; PSD-FL-344; PA 89-25

Dear Mr. Halpin:

I am assisting Seminole Electric Cooperative, Inc. (Seminole) in preparing a response to the referenced request for additional information (RAI). Item No. 6 in the RAI indicates that the Department intends to internally estimate cost effectiveness of Hot SCR based on "all information at its disposal." In order to assist Seminole in responding to the RAI, I am requesting access to the information that the Department will utilize in estimating cost effectiveness.

Please confirm that you will be providing copies of the referenced materials.

Very truly yours,

James S. Alves
