**Attachments:** TE and SOB - US Sugar Title V Renewal.doc; CAM Applicability.doc

Dave and Don,

As I mentioned, I did not get much further this week due to our upcoming Annual Air Meeting. Since I will be out all next week, I will forward these two "very rough" documents for you to review. These are basically discussions of the supporting information for a draft permit. If Dave can get me the electronic files of the documents we discussed (S/S/M plan, Oxygen Meter for GCPs, etc.) that should be helpful. I did receive the application to revise the maximum heat input limits and burner configuration for Boilers 1 and 2. I'll be in touch when I return the following week.

Have a good weekend!
