STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION

CEMEX CEMENT, INC.

Petitioner / Applicant,

v.

DOAH CASE NO.: _____
FDEP Permit No.: 0530010-030-AC

STATE OF FLORIDA, DEPARTMENT
OF ENVIRONMENTAL PROTECTION,

Respondent.

_____ /

PETITION FOR FORMAL ADMINISTRATIVE PROCEEDINGS

Petitioner/Applicant, CEMEX Cement, Inc. ("CEMEX"), by and through its undersigned counsel, files this Petition for Formal Administrative Proceeding pursuant to Sections 120.569 and 120.57(1), Florida Statutes, in combination with Section 120.54(5)(b)(4), Florida Statutes, Chapter 403 Florida Statutes, and Chapters 28 and 62, Florida Administrative Code, challenging the State of Florida Department of Environmental Protection ("DEP") Written Notice of Intent to Issue Air Permit including the Draft Permit and certain findings by the DEP in the Technical Evaluation & Preliminary Determination. In support of this Petition, CEMEX states:

Identification of the Parties

1. The Petitioner/Applicant is CEMEX Cement, Inc., 16301 Ponce De Leon Blvd, Brooksville, FL 34614-0849, telephone number 352 799-2011. For purposes of this proceeding, Petitioner's address, telephone and facsimile numbers are that of his undersigned attorneys.

2. The Respondent is Florida Department of Environmental Protection, 2600 Blair Stone Road, Tallahassee, FL 32399-2400, telephone number 850-921-9528, and the Project Engineer is Alvaro Linero. The DEP is a component of the Executive Branch of the State of

Florida having powers articulated in Florida Statutes, and the DEP's Permitting Authority is the Air Permitting Program, Bureau of Air Regulation, Division of Air Resource Management.

Respondents File Number and County

3. DEP assigned CEMEX Cement Inc., BART Project, Draft Permit No. 0530010-30-AC. The project is located in Hernando County, Florida.

Receipt of Notice of Agency Action

4. On or about December 17, 2007 CEMEX received the DEP's Written Notice of Intent to Issue Air Permit, which included the DEP's Technical Evaluation and Preliminary Determination dated December 17, 2007, with proposed Draft Permit, and the Public Notice of Intent to Issue Air Permit. The timeline relating to this notice is described below.

Substantial Interests Affected

5. CEMEX through its consultant, Koogler & Associates, Inc., submitted an application to satisfy the requirements of Best Available Retrofit Technology (BART) pursuant to Rule 62-296.340, Florida Administrative Code ("FAC") for the eligible units at the subject facility. This application was submitted on or about January 31, 2007. The entire application package, requests for additional information, other documents, and the proposed Draft Permit, Technical Evaluation and Preliminary Determination, are attached and incorporated herein as Exhibit A.

6. CEMEX submitted its application to the DEP in accordance with the provisions of Chapter 403, Florida Statutes and Chapters 62-4, and 62-296, FAC.

7. On or about December 17, 2007 CEMEX received the DEP's Written Notice of Intent to Issue Air Permit, which included the DEP's Technical Evaluation and Preliminary Determination dated December 17, 2007, with proposed Draft Permit, and the Public Notice of

Intent to Issue Air Permit. CEMEX responded in writing to the Draft Permit expressing its concerns relating to some of the provisions of the Draft Permit and Technical Evaluation & Preliminary Determination ("Technical Evaluation") on January 4, 2008, and amended January 9, 2008, as illustrated as follows:

a. The DEP determined that, while the current nitrogen oxide (NO_x) emission limit of kiln No. 1 (emission unit 003) is acceptable for BART, additional controls would be required for NO_x control for kiln No. 1.

b. A specific condition in the draft permit established an SO₂ continuous emission monitoring system (CEMS) as the method of compliance, when the method of compliance should instead be reasonably determined from stack test data; and

c. The DEP determined a reduced limit of particulate matter emissions for the Cement Storage Silos Dust unit (emission unit 009) without basis in the Technical Evaluation or the Draft Permit.

8. The administrative hearing in this case will a *de novo* review of agency action with no presumption of correctness accorded to the proposed agency action. Florida Department of Transportation v. J.W.C., 396 So.2d 778 (Fla. 1st DCA 1981). When a petition for an administrative hearing is filed pursuant to Chapter 120, Florida Statutes, that petition, until a final order is entered, renders the agency decision non-final agency action. Capeletti Bros. v. State of Florida, Department of Transportation, 362 So.2d 346 (Fla. 1st DCA 1978); McDonald v. Department of Banking and Finance, 346 So.2d 569 (Fla. 1st DCA 1979). The goal of such a proceeding is to enable the agency to come to the correct decision after hearing factual and legal arguments from the substantially affected parties with respect to the agency's decision. Capeletti

at 348. See also, Ward v. Board of Trustees of the Internal Improvement Trust Fund, 651 So.2d 1256 (Fla. 4th DCA 1995).

9. The application was supported by sufficient documentation to support the determination of BART compliance for each eligible source.

10. The facts to justify the basis for some limitation and restrictions contained in the Technical Evaluation and Draft Permit have not been articulated by DEP. Requiring CEMEX to comply with these type requirements in the DEP's Technical Evaluation and in the Draft Permit is factually, technically and legally unwarranted and unjustified and creates a serious economic and legal hardship for CEMEX.

Background

11. CEMEX operates the existing the existing Brooksville cement plant. The facility is located in Hernando County at 16301 Ponce De Leon Blvd, Brooksville, FL 34614.

12. The facility is a major source of hazardous air pollutants, a Title V major source of air pollution in accordance with Chapter 213, FAC, a major stationary source for the Prevention of Significant Deterioration of Air Quality pursuant to Rule 62-212.400, FAC, and the facility operates units subject to the Best Available Retrofit Technology ("BART") as provided in Rule 62-296.340, FAC, which requires a determination of the BART for each BART-eligible source as defined in 40 CFR 51.301.

13. On January 31, 2007, CEMEX submitted an application to satisfy the requirements of BART for the eligible units at the facility.

14. The application was deemed complete on August 30, 2007.

15. On December 17, 2007, the DEP issued, among other things, a Written Notice of Intent to Issue Air Permit, the Draft Permit, and the Technical Evaluation. The Technical

Evaluation summarizes the DEP's Bureau of Air Regulation's technical review of the application and the DEP's basis for the preliminary determination to issue a Draft Permit.

16. On January 4, 2007 and January 10, 2008, CEMEX submitted detailed, written comments regarding CEMEX concerns with the Draft Permit and Technical Evaluation. (A copy of which is attached as Exhibit "A".) However, there has been no official communication from DEP regarding the concerns of CEMEX.

17. On January 4, 2008, CEMEX submitted a Motion for Extension of Time to allow the DEP and CEMEX to address issues of concern to CEMEX relating to the Draft Permit and Technical Evaluation. On January 9, 2008, The DEP denied the extension. The DEP order denying the request allowed CEMEX until January 24, 2008 to file a petition in this matter. This petition is timely filed.

Disputed Issues of Material Fact

18. The following are the CEMEX's disputed issues of material fact. CEMEX reserves the right to amend and supplement these disputed issues of material fact, as necessary.

- a. Whether CEMEX is entitled to the permit that it applied for.
- b. Whether DEP's Bureau of Air Regulation's method to require additional NOx control on emission unit 003 is justified given the current NOx limitations are determined acceptable by DEP and CEMEX currently meets the limit using existing technology.
- c. Whether DEP's method of evaluating the CEMEX Application is different from the method used by the DEP in reviewing other BART permit applications.
- d. Whether the factual and technical basis provided in the DEP's Technical Evaluation to justify additional NOx control within of the authority to establish BART per 62-296.340, F.A.C.

- e. Whether any factual or technical basis exists to justify the installation of Selective Catalytic Reduction (SCR) to meet BART-acceptable limits.
- f. Whether the existing Selective Non-Catalytic Reduction (SNCR) system is capable of meeting BART-acceptable limits.
- g. Whether any factual or technical basis exists to justify the installation of in-direct firing to meet BART-acceptable limits.
- h. Whether the proposed benefits of Selective Catalytic Reduction (SCR) in the Technical Evaluation are not quantified and are unsubstantiated.
- i. Whether any factual or technical basis exists for DEP's specific condition in the draft permit for SO₂ method of compliance,
- j. Whether the proper method of determining SO₂ compliance with BART-derived emissions limitations should be from stack test data.
- k. Whether potential SO₂ emissions from this source are near the BART SO₂ de-minimis levels.
- l. Whether the additional SO₂ monitoring will not serve the purpose of the Regional Haze Rule (i.e. BART) to reduce visibility impact in Class I areas.
- m. Whether the additional SO₂ recordkeeping will not serve the purpose of the Regional Haze Rule (i.e. BART) to reduce visibility impact in Class I areas.
- n. Whether the additional SO₂ reporting will not serve the purpose of the Regional Haze Rule (i.e. BART) to reduce visibility impact in Class I areas.
- o. Whether the current SO₂ emission limit and control technology will allow this facility to meet BART-derived emission limits.

p. Whether the proposed particulate matter (PM) emission limits in the draft permit were established by DEP without a factual or technical basis.

q. Whether the proposed particulate matter (PM) emission limits established by DEP in the draft permit are arbitrary and capricious.

r. Whether the current technology for the control of particulate matter (PM) emissions is adequate for BART compliance.

s. Whether DEP utilized the proper methodology to review the application submitted by CEMEX.

t. Whether DEP is required to utilize a uniform methodology in reviewing petitioner's, and others', BART permit applications.

u. Whether the DEP properly determined BART in accordance with the criteria, procedures and guidelines contained in 40 CFR § 51.308(e)

v. Whether the DEP properly determined BART in accordance with the criteria, procedures and guidelines contained in 40 CFR Part 51, Appendix Y.

w. Whether the permit applicant provided reasonable assurances based on test results, pollution control equipment, and other information that the facility will not cause pollution in contravention of applicable laws, regulations, standards, and rules.

x. Whether the draft permit requires CEMEX to provide a higher degree of treatment than is necessary to effect the intent and purpose of Chapter 403, Fla. Stat.

Concise Statement of Ultimate Facts Alleged

19. CEMEX alleges the following ultimate facts which it contends warrant reversal or modification of the agency's proposed action:

a. No additional controls (SCR or in-direct firing) are required for kiln No. 1 (emission unit 003) to meet the current nitrogen oxide (NOx) emission limits or for any BART requirement.

b. No SO₂ continuous emission monitoring system (CEMS) is needed as the method of compliance; the method of compliance should instead be reasonably determined from stack test data.

c. The existing limit of particulate matter emissions for the Cement Storage Silos Dust unit (emission unit 009) in the current permit is appropriate; no factual or technical basis exists or was provided for a lower limit.

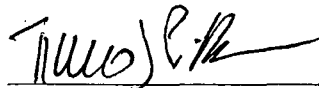

Laws Entitling Petitioner to Relief

20. The laws entitling CEMEX to relief in this action include Chapters 120 and 403, Fla. Stat., and Chapter 62, FAC, in combination with 40 CFR 51, and its associated appendices.

Request for Relief

WHEREFORE, the Petitioner respectfully requests the Department to forward this matter to the Division of Administrative Hearings, that the Division assign this petition to an Administrative Law Judge who, after conducting an appropriate proceeding, determines that the Department revise and issue the Technical Evaluation and Draft Permit to address the issues of concern identified by the applicant so that the proper BART determination is implemented, and any other relief as may be appropriate.

OGC CASE NO. 07-2731
PERMIT NO. 0530010-030-AC

STATE OF FLORIDA DEPARTMENT
OF ENVIRONMENTAL PROTECTION,

Respondent.

**ORDER DENYING REQUEST FOR EXTENSION
OF TIME TO FILE PETITION FOR HEARING**

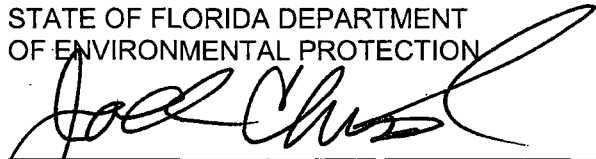

This cause has come before the State of Florida Department of Environmental Protection (Department) upon receipt of a request made by Petitioner, Cemex Cement, Inc. (Petitioner), to grant an extension of time to file a petition for administrative proceeding regarding the Intent to Issue Air Permit No. 0530010-030-AC, for its facility located in Hernando County, Florida. Due to Environmental Protection Agency deadlines imposed on the Department to submit a State Implementation Plan,

IT IS ORDERED:

The request for an extension of time to file a petition for administrative proceeding is DENIED. The Petitioner shall have fifteen (15) days from the date set forth in the certificate of service on the last page of this order to file a petition in this matter. The petition must be filed (received) in the Office of General Counsel, 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000.

DONE and ORDERED this 9th day of January, 2008, in Tallahassee, Florida.

Hey Trina,

FYI. I haven't seen it yet, so it's not attached here, but Cemex sent in a req. for ext. of time to file a petition on their BART permit. I'll send it over when I have it. Please let me know what you'd like to do.

Thanks!
