Legals
Florida Crushed Stone/66435
Legal Notice
PUBLIC NOTICE OF INTENT TO ISSUE AIR CONSTRUCTION PERMIT
Florida Department of Environmental Protection
Florida Crushed Stone Company
Brooksville Cement Manufacturing Facility-Brooksville Hernando County
Draft Air Construction Permit No. 0530021-009-AC; PSD-FL-351

The Florida Department of Environmental Protection (Department) gives notice of its intent to issue an Air Construction Permit to Florida Crushed Stone Company (FCS) to authorize FCS to construct a new dry process, preheater/precaciner kiln system at the Brooksville Cement Manufacturing Facility Plant located in Brooksville in Hernando County. The applicant's name and address are: Florida Crushed Stone Company, 13011 Cement Plant Road, Brooksville, Florida 34601.

The existing facility consists of a Portland cement plant and associated quarry, power plant, and raw material and cement handling operations. The plant combines raw materials and utilizes a preheater/precaciner kiln with an in-line raw mill to produce clinker. The clinker will be milled and combined with gypsum to produce Portland cement, which will be stored in silos and shipped in bags or in bulk by truck or rail. Raw materials other than limestone and overburden, and all fuels will be brought to the site by truck or rail.

This project is for a new cement manufacturing line (line 2) at the existing facility. New emissions units for the project will include a raw mill system, a dry process preheater/precaciner kiln system, clinker handling system, finish grinding operations, cement loadout silos, and coal handling and grinding operations. This project is subject to Prevention of Significant Deterioration (PSD) Review and a Best Available Control Technology (BACT) determination for NOx, PM, PM10, SO2 CO, and VOC. The plant will be installing Selective Non-catalytic Reduction (SNCR) technology to control NOx emissions from the new line. Baghouses will be installed to control PM and PM10 emissions. SO2 emissions will be controlled by process control. Process control, process design, and combustion unit will control CO emissions. VOC emissions will be controlled by clean raw materials and combustion control. Mercury emissions will be controlled by material balance with a minimum of quarterly analysis of raw material samples and making and maintaining records of monthly and rolling 12-month mercury throughout.

An air quality impact analysis for PM10 SO2 NOx CO, and VOC was conducted. Emissions from the facility will not

Legals
significantly contribute to or cause a violation of any state or federal ambient air quality standards. The maximum predicted SO2 and NO2 impacts were insignificant in both the PSD Class I and II areas. Chassahowitzka National Wildlife Refuge and the Class II area in the vicinity of the project, so no PSD Class I or II increment consumption analysis were required for SO2 and NO2. The maximum predicted PM10 annual impacts were insignificant in the PSD Class I area, so no PSD Class I increment consumption analysis for the annual averaging time was required for PM10. The maximum predicted PM10 PSD Class I and II increments consumed by all sources in the area, including this project, will be as follows:

Total From All Sources

Increment Consumed (Hq/m3)
24-hour Class II 28.0
Annual Class II 4.8
24-hour Class I 1.30
Allowable Increment (Hq/m3)
24-hour Class II 30
Annual Class II 17
24-hour Class I 10
Increment Consumed (Percent)
24-hour Class II 93
Annual Class II 28
24-hour Class I 13

The Department will issue the Final Permit with the attached conditions unless a response received in accordance with the following procedures results in a different decision or significant change of terms or conditions. The Department will accept written comments concerning the proposed permit issuance action for a period of thirty (30) days from the date of publication of this Public Notice of Intent to Issue Air Construction Permit. Written comments should be provided to the Department's Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, FL 32399-2400. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit and require, if applicable, another Public Notice.

The Department will issue the permit with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to sections 120.569 and 120.57, F.S., before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below. Mediation is not available in this proceeding.

The Permitting Authority will accept written comments concerning the DRAFT Permit for a period of thirty (30) days from the date of publication of the "PUBLIC NOTICE OF INTENT TO ISSUE AN AIR CONSTRUCTION PERMIT." Written comments must be post-marked and all facsimile comments must be received by the close of business (5:00pm), on or before the end of this 30-day period, by the Permitting Authority at the above address or facsimile. As part of his or her

Legals
comments, any person may also request that the Permitting Authority hold a public meeting on this permitting action. If the Permitting Authority determines there is sufficient interest for a public meeting, it will publish notice of the time, date, and location on the Department's official web site for notices at <http://thor66.dep.state.fl.us/onw> and in a newspaper of general circulation in the area affected by the permitting action. For additional information, contact the Permitting Authority at the above address or phone number. If written comments or comments received at a public meeting result in a significant change to the DRAFT Permit, the Permitting Authority shall issue a Revised DRAFT Permit and require, if applicable, another Public Notice. All comments filed will be made available for public inspection.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions must be filed within fourteen (14) days of publication of this Public Notice of Intent to Issue Air Construction Permit. Under Section 120.60(3), F.S., however, petitions submitted by person(s) who asked the Department for notice of agency action must be filed within fourteen (14) days of receipt of that notice or the date of publication of the public notice whichever occurs first. A petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone numbers of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interest will be affected by the agency determination. (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A

Legals
statement of all disputed issues of material fact; there are none, the petitioner must so indicate; (e) concise statement of ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) a statement of relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action. A petitioner that does not dispute the material facts upon which the Department's action is based shall state that such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because of the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in the notice. Persons with a substantial interest will not be affected by any such final decision of the Department on the application having the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

A complete project file available for public inspection during normal business hours, 8:00a.m. to 5:00p.m., Monday through Friday, except legal holidays, at:

Department of Environmental Protection
Bureau of Air Regulation
111 S. Magnolia Drive,
Suite 4 Tallahassee, Florida, 32301
Telephone: (850) 488-0114
Fax: (850) 922-6979

Department of Environmental Protection
