Many thanks!

Bruce

INTEROFFICE MEMORANDUM

TO: Trina Vielhauer
FROM: Bruce Mitchell *RAM*
THRU: Scott Sheplak
SUBJECT: Title V Air Operation Permit Revision
PROPOSED Permit No.: 0530021-007-AV
Florida Crushed Stone Company
Brooksville Cement and Power Plants
DATE: May 20, 2003

The attached PROPOSED Permit (Title V Air Operation Permit Revision) is being issued to: 1) remove the Chemical Lime Plant operation from the Title V permit; 2) remove the beryllium limit and test method from the Power Plant Boiler in Subsection I; 3) revise the throughput rates for the Raw Meal Transfer (EU 004), the two Blend Storage Silos (EU 006), and the Kiln Feed Surge Bin (EU 007), to match the throughput rates (138 TPH) of their subsequent in-series processing emissions units; and, 4) incorporate the Operation Maintenance Plan (see Appendix O & M) pursuant to 40 CFR 63.1350(a). The particulate matter emissions from each of the subject emissions units are controlled with a baghouse. Even though no construction is required for this correction to the internal inconsistencies, an air construction permit was required (AC/AV dual Public Notice). In addition, the company intends to install a baghouse control system for the clinker transfer from the clinker cooler to the deep bucket conveyor (L-03), which conveys clinker to clinker storage; and, the air construction permit and the PROPOSED Permit contain the proposed changes and recognize the baghouse installation. Florida Crushed Stone Company's Brooksville Cement and Power Plants are located in Hernando County, Florida.

There were no comments received during the 30-day Public Comment period. Therefore, the DRAFT Permit becomes the PROPOSED Permit. It is recommended that the cover letter be signed.
