10311 Cement Plant Road
Brooksville, Florida 32669

Re: DEP File Nos. 0530021-021-AV
South Brooksville Cement Plant – Kiln 2
Revision of Title V Application

Dear Mr. Daniel:

On April 23, 2009 CEMEX submitted its Title V Permit Revision Application to incorporate Line 2. On April 20, the Department sent an incompleteness letter regarding matters related to the “as-built” configuration; the Department has not received a response to this letter.

Your application remains incomplete until a response to the Department’s letter of April 20, 2009 is received. Also, it is our understanding that Mr. Lucarelli, the Professional Engineer of record who sealed the Title V revision application, is no longer with CEMEX. Should any of the information contained in the Title V application need to change as a result of your responses to our April 20 request for additional information regarding the “as-built” construction permit revision, that information will need to be recertified by a Professional Engineer. Please advise our office as to the identity of the professional Engineer who will be assuming the certification responsibilities associated with the incomplete Title V permit revision application and provide replacement certification statements, as necessary.

Rule 62-4.050(3), F.A.C. requires that all applications for a Department air construction or Title V air operation permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. Please advise the professional engineer to make sure he/she uses the correct seal in compliance with the applicable requirements of the Florida Board of Professional Engineers. Permit applicants are advised that Rule 62-4.055(1), F.A.C. requires applicants to respond to requests for information within 90 days.

If you have any questions, please contact me at (850) 921-9531.

Sincerely,

Jon Holtom, P.E., CPM
Title V Program Administrator
Bureau of Air Regulation
