10311 Cement Plant Road
Brooksville, Florida 32669

Re: DEP File Nos. 0530021-021-AV
South Brooksville Cement Plant Line 2
Revision of Title V Application

Dear Mr. Daniel:

On July 9, 2009 the Department sent you an incompleteness letter regarding the Title V Permit Revision Application to incorporate Cement Line 2. On September 9, the Department received a response letter from Koogler & Associates on behalf of CEMEX addressing the Department's concerns.

This letter is to remind you that your application for the Title V permit revision remains incomplete until a satisfactory response to the Department's letter of July 9, 2009 is received. In addition, as it was agreed previously, this Title V revision also remains incomplete until the matters concerning the "as built" and related issues of the construction permit applications are resolved.

1. Compliance Assurance Monitoring (CAM) Plan: Please submit an applicability review for a CAM plan for the kiln/cooler/raw mill and the finish mill baghouse systems and for any other unit that will have uncontrolled emissions greater than 100 tons per year. It appears that both (kiln and finish mill) have uncontrolled emissions greater than 100 tons per year. Please refer to CAM applicability, 40 CFR 64, for each control device for Cement Line 2. This issue was discussed by phone with Mrs. Fawn Bergen and Mr. George Townsend on September 17, 2009.
2. Compliance Plan (CP): The Department acknowledges, as stated by CEMEX, that initial compliance testing has been completed under PSD-FL-351 (0530021-009-AC). Also, that if compliance testing is deemed necessary after the issuance of the modified Cement Line 2 air construction permit, CEMEX will submit the necessary compliance plan.
3. Concurrent Processing of Title V Revision and Air Construction Permit Modification: The Department acknowledges CEMEX's September 9, 2009 response which withdraws the request to do concurrent processing. The construction permit expiration date will be extended to insure that the TIM construction will be completed within a reasonable time.

Cement Line 2 will continue to operate under the new modified construction permit.

4. Professional Engineer (P.E.) of Record: It is our understanding that Mrs. Fawn W. Bergen, the CEMEX professional engineer of record for the AC permit modification application and subsequent response letters related to both AC and TV projects (including previous work of Mr. Lawrence Lucarelli, P.E. for the Title V revision application) would be leaving Koogler & Associates. Should any of the information contained in the Title V/AC application need to change as a result of your responses to our requests for additional information, that information will need to be recertified by a Professional Engineer. Please advise our office as to the identity of the new professional Engineer who will be assuming the certification responsibilities associated with the incomplete Title V permit revision/AC modification and provide replacement certification statements, as necessary.

Rule 62-4.050(3), F.A.C. requires that all applications for a Department air construction or Title V air operation permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. Please advise the professional engineer to make sure he/she uses the correct seal in compliance with the applicable requirements of the Florida Board of Professional Engineers. Permit applicants are advised that Rule 62-4.055(1), F.A.C. requires applicants to respond to requests for information within 90 days.

If you have any questions, please contact me at (850) 921-9531.

Sincerely,

Jon Holtom, P.E., CPM
Title V Program Administrator
Bureau of Air Regulation
