Central Power and Lime
10311 Cement Plant Road
Brooksville, Florida 34601

Re: Permit No. 0530021-029-AV
Title V Air Operation Permit Renewal
Request for Additional Information

Dear Mr. Daniel and Mr. Woodard:

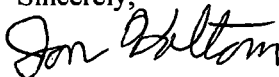

The Florida Department of Environmental Protection has reviewed your application for a Title V Air Operation Permit Renewal for the Brooksville South Cement and Power Plant. However, we must deem your application *incomplete*, because we need further information relative to the following items:

1. If this facility operates stationary reciprocating internal combustion engines, it is subject to regulation under 40 CFR 63, Subpart ZZZZ - National Emissions Standards For Hazardous Air Pollutants For Stationary Reciprocating Internal Combustion Engines. In addition, please specify if any of the facility's generators or other emissions units are subject to 40 CFR 60 Subpart IIII, Standards of Performance for Stationary Compression Ignition (CI) Internal Combustion Engines (ICE), or 40 CFR 60 Subpart JJJJ, Standards of Performance for Stationary Spark Ignition (SI) Internal Combustion Engines. If applicable,
 - a. Please specify how the facility is complying with the applicable subpart(s).
 - b. Please provide the following information for each emission unit subject to the referenced subparts: make and model of engine, fuel, in-service date, manufacture date, horsepower, cylinder displacement, operating hours per year and rule applicability.
2. In many cases the underlying air construction permit (or permits) reference is omitted from the Allowable Emissions part of the Emissions Unit section of the application. Please provide these references.
3. Please provide more detail concerning the items listed in Attachment 2010-FCB-FTV1 (List of Insignificant Activities). This listing should be comprehensive covering all areas of the cement and power plants. The application did not list any unregulated units. Please indicate if there are any at the facility and add a description if warranted.
4. Please provide a current compliance assurance monitoring (CAM) applicability determination chart for control devices for all pollutants organized by emissions unit. The chart should utilize updated historical operational data for the most recent five year period. Any existing CAM

plans proposed for renewal in the application should be revised if necessary using the most current data. Plans should be based on actual test data.

When we receive this information, we will continue processing your application. If you have any questions, please contact Project Engineer Tom Cascio at 850-921-9526. Rule 62-4.050(3), F.A.C., requires that all applications for a Department permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. Permit applicants are advised that Rule 62-4.055(1), F.A.C., requires applicants to respond to requests for information within 90 days, unless the applicant has requested in writing, and has been granted, additional time within 90 days.

Sincerely,

Jonathan K. Holtom, P.E., CPM
Program Administrator
Title V Section
