

12/03/2003

Dear Yi,

Thanks for your guidance this morning. I believe that I have completed the ARMS updates for the above referenced projects. Please check the data for accuracy and advise. As always, many thanks.

The upload of the inventory data is complete. Sorry for the delay. Usha worked on this and it took me some time to finish it. Thanks.

INTEROFFICE MEMORANDUM

TO: Joe Kahn

FROM: Bruce Mitchell *BM*

THRU: Scott Sheplak *SS*
Trina Vielhauer *T*

SUBJECT: FINAL Title V Air Operation Permit Revision No.: 0530021-007-AV
Florida Crushed Stone Company
Brooksville Cement and Power Plants

DATE: July 3, 2003

The attached FINAL Title V Air Operation Permit Revision is being issued to incorporate the revised throughput rates for the Raw Meal Transfer (EU 004), the two Blend Storage Silos (EU 006), and the Kiln Feed Surge Bin (EU 007) to match the throughput rates (138 TPH) of their subsequent in-series processing emissions units. The particulate matter emissions from each of the subject emissions units are controlled with a baghouse. No construction is required for this correction to the internal inconsistencies. In addition, the company intends to install a baghouse control system for the clinker transfer from the clinker cooler to the deep bucket conveyor (L-03), which conveys clinker to clinker storage. The permit will contain the proposed changes and recognize the baghouse installation. Florida Crushed Stone Company's Brooksville Cement and Power Plants are located in Hernando County, Florida.

There were no comments received during the U.S. EPA, Region 4's 45-day comment period (July 5 is Day 45: spoke with Gracy Danois, today, and she said that they were **not** going to comment on the PROPOSED Permit (Day 55 is July 15)). This permitting action should not be considered controversial. Therefore, it is recommended that the attached FINAL Title V Air Operation Permit Revision, No. 0530021-007-AV, be signed as noticed and posted.

Joe,
Bruce & Scott tell me this is more of an administrative correction -- it is NOT a debate-
needing or physical modification.
