**RE: AC Permit Application for Short Term Trial Test of Alternative Fuel Materials in Kiln
Cemex Construction Material Florida LLC; Facility ID: 0530021
Request to Install Injection Porthole During Kiln Outage**

Dear Mr. Koerner:

On behalf of CEMEX I am sending you this letter to request approval to install portholes in the base of the precalciner at the CEMEX Construction Materials Florida LLC, Brooksville South, Kiln 2 Cement Plant. The portholes are requested to be installed during the upcoming kiln outage in anticipation for future trial testing of alternative materials/fuels. The request is made to install during the kiln outage which is expected to occur beginning March 14, 2011 to last for 8 days. As you are aware, the kiln must be down for the ports to be installed. If the ports are not installed during this time frame, the kiln is not expected to come down for a scheduled outage until some time later this year, e.g., fall season of 2011. CEMEX fully understands that these portholes shall not be used until permit authorization is final from the Department.

I sincerely appreciate your extra effort to help us work out the timing of this installation. I am available at your convenience to discuss this request, if needed. Please feel free to contact me at (352) 377-5822 or mlee@koozlerassociates.com or George Townsend, CEMEX Construction Materials Florida LLC at (352) 799-7881 or gtownsend@cemexusa.com, if you have any questions regarding this request.

Regards,

Max Lee, PhD., P.E.
