Re: Facility No. 0530021
CEMEX Construction Materials Florida, LLC
Brooksville South Cement Plant
Kiln Nos. 1 and 2

Dear Dr. Koogler:

On February 13, 2012, you submitted a letter requesting verification that the CEMEX Brooksville South Cement Plant is authorized to continue operating under their existing permits due to the separation from the CPL Power Plant. The Department agrees that the CEMEX Brooksville South Cement Plant is authorized to operate under the existing permits. As stated in the permitting note for Condition 10 in Section 2 of Permit No. 0530380-001-AC, once construction on the biomass conversion project has commenced, the Department intends to issue a separate construction permit revision for the Brooksville South Cement Plant to remove all references to the coal-fired power plant operating individually or in combination with the cement plant. The current Title V permit No. 0530021-029-AV will be revised accordingly. This will simplify the applicable requirements, remove obsolete references, and clarify any Title V fee implications.

At your convenience, please submit an application to concurrently revise the air construction permit and Title V air operation permit. If you have any questions regarding this matter, please contact Christy DeVore at 850-717-9085.

Sincerely,

JFK/sa/scd
