Thanks George.

We'll just withdraw it (the pending application) if that is what you are saying.

I'll have Scott review the additional tank and let you know.

Al Linero.

**Subject:** RAI Finish Mill No. 2 Used Oil 0530021-045-AC

Due to the potential costs associated with the modification and/or replacement of the existing burner in the hot gas generator at finish mill No. 2, to burn used oil, and the low volume usage of No. 2 fuel oil. CEMEX will not pursue the permit modification to burn used oil on finish mill No. 2. We will install and register a separate smaller tank to supply diesel fuel for the hot gas generator at finish mill No. 2; prior to accepting used oil for kiln No. 2 fuel tank.

Al, please let me know if anything additional is required.

George Townsend
