Barbara – Attached is the signed Intent package for draft/proposed Title V renewal for the referenced facility. It can be clerked and issued. The permit summary page has been done.

Jeff - This Title V permit renewal cleans up the Cemex Brooksville plant by removing the CP&L portion of the previous renewal and incorporates the recent AC re-permitting for Kilns 1 and 2. The application request was initially submitted as a revision but we recommended that it should be done as a renewal. This avoided all the underline and strike-through which would have made the draft/proposed permit unreadable. The applicant changed the application to a renewal based on our recommendation.

David – Please replace all your word documents in your project folder with the ones attached with this email.

Thanks,
Syed
