RE: PSD Permit Application -
Sebring Utilities (PSD-FL-071)

Dear Kent:

This is to notify you that the Bureau of Air Quality Management (BAQM) has received an application for a federal PSD permit from Sebring Utilities for construction of three slow-speed diesel generators at Sebring, Florida. The application was received by the BAQM on January 9, 1981 and is currently undergoing a completeness review.

It is our understanding that you wish to receive copies of all materials and correspondence associated with federal PSD reviews for energy and hazardous-waste related sources. In this case, the consulting firm handling the project informs us that two copies of the application package have already been sent to your office. We will copy you on any further correspondence related to this review.

For your information, the review team assigned to this application consists of Teresa Heron (review engineer) and Tom Rogers (meteorologist). Any written comments related to the application should be funneled through Tim Powell, BAQM air permit scheduler. All may be reached at (904) 488-1344.

Sincerely,

Lawrence A. George,
Environmental Administrator
