

Internal Memo

DATE: September 27, 2006
TO: J. M. Stewart
FROM: C. D. Turley
CC:
RE: Riverview AFI Defluorination Scrubber

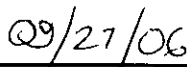

Based on my review of the present scrubber system, the plant will continue to comply the fluoride emission limit after the fan upgrade for this system. The system is to be operated at its present flow rates without recirculation of freshwater in the third stage of the scrubber as previously proposed.

Certification by Professional Engineer

Based on my review of the above information submitted, I certify, to the best of my knowledge, that there is reasonable assurance the air pollutant emission unit and the air pollution control equipment described herein, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in Florida statutes and rules of the Department. Furthermore, I certify that, to the best of my knowledge, the emission estimates and cost estimates reported or relied upon in these documents are true, accurate and complete and are based on reasonable techniques available for calculating emissions.
