RE: Mosaic Fertilizer, LLC, Riverview Facility  
Sulfuric Acid Plants - Catalyst

Dear Mr. Waters:

This letter provides information on the use of cesium promoted catalyst at Riverview. As referenced in our January 24, 2008 Comments on Draft BART Permit, cesium promoted catalyst is only used in the No. 9 Sulfuric Acid Plant. Approximately 90,000 liters of cesium promoted catalyst was introduced to the Plant in December 2000. During a September 2006 turnaround the 4<sup>th</sup> pass was screened and approximately 17,000 liters of cesium promoted catalyst was added to make up the screening losses. We are not aware of cesium promoted catalyst in SAPs 7 or 8.

If you have any questions, please call me at 813-671-6369 or email at [jeff.stewart@mosaicco.com](mailto:jeff.stewart@mosaicco.com).

Sincerely,

Jeffrey M. Stewart  
Environmental Superintendent
