Tom,

Jeff suggested that I send this to you regarding statements made in the BART permit application I am reviewing. I would like to verify as it affects the BART applicability to the facility.

"Other pollutants such as VOC and ammonia have been determined by FDEP to have no significant effect on regional haze in Florida. At present, the visibility impairing pollutants include SO, PAM and NOx."

"Fugitive PM emissions are not required to undergo BART control evaluation if the facility is more than 50 km from a Class I area."

Are these two statements correct? Thanks.

Scott
