Subject: PSD-FL-026 Gardinier Inc. Phosphate Complex

Dear Mr. Williams:

This is to update the current status of work subject to this permit.

- a. No. 5 Diammonium Phosphate Plant will undergo performance testing on April 6 and 7, 1982.
- b. No. 7 Sulfuric Acid Plant began operations on October 9, 1981 and was shut down on December 10, 1981, due to boiler problems. The plant was operated for five days from February 12, 1982, to February 17, 1982, to obtain data on the problem. The plant was then shut down and remains down. We have no idea at this time when operations will be resumed. We will inform you when the problem is resolved.
- c. No. 4 Phosphoric Acid Plant is currently scheduled for start up on June 1, 1982.
- d. No. 3 Phosphoric Acid Plant is currently scheduled for start up on March 1, 1983.

Please contact me if you have any questions.

Very truly yours,

G. E. Wilkinson
