

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL REGULATION
NOTICE OF PERMIT

In the matter of an
Application for Permit by:

DER File No. AC 29-216544
Hillsborough County

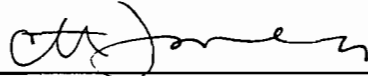

Mr. D. L. Meredith
Plant Manager
Florida Steel Corporation
Tampa Mill Division
Post Office Box 31328
Tampa, FL 33631

Enclosed is Permit Number AC 29-216544 to increase the allowable fill rate of the dust accumulation silo, which receives pneumatically conveyed dust from the electric arc furnace at Florida Steel Corporation's Tampa Mill in Hillsborough County, Florida. This permit is issued pursuant to Section(s) 403, Florida Statutes.

Any party to this Order (permit) has the right to seek judicial review of the permit pursuant to Section 120.68, Florida Statutes, by the filing of a Notice of Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400; and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The Notice of Appeal must be filed within 30 days from the date this Notice is filed with the Clerk of the Department.

Executed in Tallahassee, Florida.

Final Determination

Florida Steel Corporation-Baldwin Mill
Hillsborough County
Tampa, Florida

Construction Permit No.
AC 29-216544

Department of Environmental Regulation
Division of Air Resources Management
Bureau of Air Regulation

November 6, 1992

Final Determination

Florida Steel Corporation-Tampa Mill

Hillsborough County

AC 29-216544

The construction permit application package has been reviewed by the Department. Public Notice of the Department's Intent to Issue was published in The Tampa Tribune on October 2, 1992. The Department's Intent to Issue package was distributed on September 23, 1992, and available for public inspection at the Department's Southwest District office, the Department's Bureau of Air Regulation office, and the Environmental Protection Commission of Hillsborough County (EPCHC).

A comment was received during the public notice period. The comment was received via the phone from Mr. Jim Alves, counsel for the mill for this activity, and regarded Specific Condition No. 16 of the proposed construction permit. The condition is a canned condition made from F.A.C. Rules 17-2.220 and 17-4.055, regarding the requirements to obtain an operation permit. Since the EPCHC is just awaiting approval and signature of this modification in order to incorporate it into an operation permit, which was applied for prior to applying for this modification, then the specifics of the condition are considered to have been satisfied; and, there will be no changes made to the proposed construction permit.

Therefore, it is recommended that the construction permit be issued as drafted.

Notary Public, State of Florida
My comm. expires Mar. 22, 1996
No. CC18731

Notice of intent to issue
The Department of Environ-
mental Regulation hereby
gives notice of its intent to
issue an air construction per-
mit to Florida Steel Corpora-
tion-Tampa Mill Division, 7105
5th Avenue, Tampa, Hillsbor-
ough County, Florida 33622, to
increase the allowable PM rate
of the dust accumulation site,
which receives dust from the
electric arc furnace opera-
tions. There will be no change
in the operation of the asso-
ciated refractory dust loading
apart. Also, there will be no
change in the allowable particu-
late matter and visible
emission limiting standards
from the No. 14 baghouse
control systems, which service
the electric arc furnace opera-
tions (AC 29-159192); also,
the dust accumulation site and
associated dust loading apart
is serviced by the No. 2 bag-
house control system. A deter-
mination of Best Available
Control Technology (BACT)
was not required. The Depart-
ment is issuing this intent to
issue for the reasons stated.

A person whose substantial
interests are affected by the
Department's proposed per-
mitting decision may petition
for an administrative pro-
ceeding (hearing) in accor-
dance with Section 120.57, F.S.
The petition must contain the
information set forth below
and must be filed (received) in
the Office of General Counsel
of the Department at 2600
Blair Stone Road, Tallahassee,
Florida 32399-2400, within
fourteen (14) days of publica-
tion of this notice. Petitioner
shall mail a copy of the peti-
tion to the applicant at the
address indicated above at the
time of filing. Failure to
file a petition within this time
period shall constitute a waiver
of any right such person
may have to request an ad-
ministrative determination
(hearing) under Section
120.57, F.S.

- The Petition shall contain
the following information:
- (a) The name, address, and
telephone number of each peti-
tioner, the applicant's name
and address, the Department
Permit File Number and the
county in which the project is
proposed;
 - (b) A statement of how and
when each petitioner received
notice of the Department's ac-
tion or proposed action;
 - (c) A statement of how each
petitioner's substantial inter-
ests are affected by the De-
partment's action or proposed
action;
 - (d) A statement of the mat-
erial facts disputed by Petition-
er, if any;
 - (e) A statement of facts
which petitioner contends
warrant reversal or modifica-
tion of the Department's ac-
tion or proposed action;
 - (f) A statement of which
rules or statutes petitioner
contends require reversal or
modification of the Depart-
ment's action or proposed ac-
tion; and,
 - (g) A statement of the relief
sought by petitioner, stating
precisely the action petitioner
wants the Department to take
with respect to the Depart-
ment's action or proposed ac-
tion.

If a petition is filed, the ad-
ministrative hearing process
is designed to formulate agency
action. Accordingly, the
Department's final action
may be different from the po-
sition taken by it in this No-
tice. Persons whose substan-
tial interests will be affected
by any decision of the Depart-
ment with regard to the appli-
cation/request have the right
to petition to become a party
to the proceeding. The peti-
tion must conform to the re-
quirements specified above
and be filed (received) within
14 days of publication of this
notice in the Office of General
Counsel at the above address
of the Department. Failure to
petition within the allowed
time frame constitutes a
waiver of any right such per-
son has to request a hearing
under Section 120.57, F.S., and

to participate as a party to
this proceeding. Any subse-
quent intervention will only be
at the approval of the presid-
ing officer upon motion filed
pursuant to Rule 28-5.207,
F.S.C.

The application/request is
applicable for public inspection
during business hours, 8:00
a.m. to 5:00 p.m., Monday
through Friday, except legal
holidays, at:
Department of Environmental
Regulation
Bureau of Air Regulation
2600 Blair Stone Road
Tallahassee, Florida
32399-2400

Department of Environmental
Regulation
Southwest District
4520 Oak Fair Boulevard
Tampa, Florida 33610-7347
Environmental Protection
Commission of Hillsborough
County
1410 N. 21st Street
Tampa, Florida 33605

Any person may send writ-
ten comments on the pro-
posed action to Mr. Preston
Lewis at the Department's
Tallahassee address. All com-
ments received within 14 days
of the publication of this no-
tice will be considered in the
Department's final determina-
tion.

PERMITTEE:

Florida Steel Corporation
Tampa Mill Division
Post Office Box 23328
Tampa, Florida 33623

Permit Number: AC 29-216544
Expiration Date: July 31, 1994
County: Hillsborough
Latitude/Longitude: 27°57'18"N
82°22'34"W
Project: Dust Accumulation Silo
Modification; and, Assoc.
Dust Loading Spout

This permit is issued under the provisions of Chapter 403, Florida Statutes (F.S.), Florida Administrative Code (F.A.C.) Chapters 17-2 and 17-4, and 40 CFR (July, 1991 version). The above named permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawing(s), plans, and other documents attached hereto or on file with the Department and made a part hereof and specifically described as follows:

For the modification of the dust accumulation silo to allow an increase in the filling rate, with no increase in the allowable emission limit of particulate matter (PM). There is no change in the operation of the associated retractable dust loading spout. Dust is conveyed from the Nos. 1-4 baghouse control systems to the silo via a pneumatic system using carrier air from a positive displacement blower rated at 320 acfm. The loading spout gravity-feeds the silo dust into trucks or rail-cars located inside a building through an inner tube, which is surrounded by a concentric outer tube, thus creating an annular area through which air is moved upward (to eliminate fugitive emissions) by a blower rated at 1000 acfm. PM and visible emissions from the silo and loading spout are controlled by the No. 2 baghouse system, a Wheelabrator Model 171 with a flow rate of 91,000 acfm. The electric arc furnace operations are controlled by the Nos. 1-4 baghouse systems. The project will occur at the permittee's facility located at 7105 6th Avenue, Tampa, Florida. The UTM coordinates are Zone 17, 364.6 km East and 3093.8 km North.

The Standard Industrial Code is: Steel Production - 3312

The Standard Classification Codes are:

o Dust Accumulation Silo	3-04-007-99	Tons Produced
o Loading Spout-fugitives	3-04-888-01	Tons Product

The source shall be constructed/modified in accordance with the permit application, plans, documents, amendments, drawings, and supplementary information, except as otherwise noted in the General and Specific Conditions.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

Attachments to be Incorporated:

1. Request for a Modification received July 20, 1992, from Mr. James S. Alves.
2. Sealed request for a modification received August 10, 1992, from Mr. Tom Sack.
3. Technical Evaluation and Preliminary Determination dated September 23, 1992.

GENERAL CONDITIONS:

1. The terms, conditions, requirements, limitations, and restrictions set forth in this permit are "Permit Conditions" and are binding and enforceable pursuant to Sections 403.161, 403.727, or 403.859 through 403.861, F.S. The permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.

2. This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings, exhibits, specifications, or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.

3. As provided in Subsections 403.087(6) and 403.722(5), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations. This permit is not a waiver of or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in the permit.

4. This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.

5. This permit does not relieve the permittee from liability for harm or injury to human health or welfare, animal, or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the permittee to cause pollution in contravention of F.S. and Department rules, unless specifically authorized by an order from the Department.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

GENERAL CONDITIONS:

6. The permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed or used by the permittee to achieve compliance with the conditions of this permit, as required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to achieve compliance with the conditions of the permit and when required by Department rules.

7. The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at a reasonable time, access to the premises, where the permitted activity is located or conducted to:

- a. Have access to and copy any records that must be kept under the conditions of the permit;
- b. Inspect the facility, equipment, practices, or operations regulated or required under this permit; and,
- c. Sample or monitor any substances or parameters at any location reasonably necessary to assure compliance with this permit or Department rules.

Reasonable time may depend on the nature of the concern being investigated.

8. If, for any reason, the permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the permittee shall immediately provide the Department with the following information:

- a. a description of and cause of non-compliance; and,
- b. the period of noncompliance, including dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the non-compliance.

The permittee shall be responsible for any and all damages which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

GENERAL CONDITIONS:

9. In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the F.S. or Department rules, except where such use is proscribed by Sections 403.73 and 403.111, F.S. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.

10. The permittee agrees to comply with changes in Department rules and F.S. after a reasonable time for compliance, provided, however, the permittee does not waive any other rights granted by F.S. or Department rules.

11. This permit is transferable only upon Department approval in accordance with F.A.C. Rules 17-4.120 and 17-30.300, as applicable. The permittee shall be liable for any non-compliance of the permitted activity until the transfer is approved by the Department.

12. This permit or a copy thereof shall be kept at the work site of the permitted activity.

13. The permittee shall comply with the following:

- a. Upon request, the permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
- b. The permittee shall hold at the facility or other location designated by this permit records of all monitoring information (including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation) required by the permit, copies of all reports required by this permit, and records of all data used to complete the application for this permit. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

GENERAL CONDITIONS:

c. Records of monitoring information shall include:

- the date, exact place, and time of sampling or measurements;
- the person responsible for performing the sampling or measurements;
- the dates analyses were performed;
- the person responsible for performing the analyses;
- the analytical techniques or methods used; and,
- the results of such analyses.

14. When requested by the Department, the permittee shall within a reasonable time furnish any information required by law which is needed to determine compliance with the permit. If the permittee becomes aware that relevant facts were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be corrected promptly.

SPECIFIC CONDITIONS:

1. Permitted hours of operation are 8760.
2. The maximum fill rate of the dust accumulation silo is 4,816 lbs/hr.
3. The maximum loading rate of the retractable dust loading spout is 540,000 lbs/hr.
4. For nonattainment review purposes pursuant to F.A.C. Rule 17-2.510, there will not be any potential/allowable particulate matter (PM) emission limit assigned to the dust accumulation silo and associated dust loading spout. Pursuant to construction permit, No. AC 29-159192 (No. 4 electric arc furnace), the allowable mass PM emission limit will not be increased.
5. Any request to increase the PM allowable mass emissions (i.e., lbs/hr, TPY) related to the dust accumulation silo and associated dust loading spout, pursuant to construction permit No. AC 29-159192 and this permit, shall require a permit application for a modification and the appropriate processing fee.
6. For the No. 2 baghouse control system servicing the dust accumulation silo and associated dust loading spout, the PM and visible emissions limiting standards shall be in accordance with 40 CFR 60.272a.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

SPECIFIC CONDITIONS:

7. This construction permit and its conditions shall be incorporated into the construction permit, No. AC 29-159192, and shall become a part of the permit.

8. Compliance tests shall be conducted on the Nos.1-4 baghouse control systems with all of its associated sources operating at a minimum of 90% of their maximum permitted rates using the following test methods pursuant to F.A.C. Rule 17-2.700 and 40 CFR 60, Appendix A:

- o EPA Methods 1- 5 (including 5D) - Determination of Particulate Emissions from Stationary Sources
- o EPA Method 9 - Visual Determination of the Opacity of Emissions from Stationary Sources

Note: Other test methods may be used only if prior Departmental approval has been granted in writing pursuant to F.A.C. Rule 17-2.700(3).

9. Any change in the dust accumulation silo or associated dust loading spout pursuant to F.A.C. Rule 17-2.100, Definitions-Modification, shall be submitted for approval to the Department's Bureau of Air Regulation office, the Department's Southwest District office, and the Environmental Protection Commission of Hillsborough County (EPCHC).

10. Objectionable odors shall not be allowed off plant property pursuant to F.A.C. Rule 17-2.620(2).

11. The dust accumulation silo and associated dust loading spout are subject to all applicable provisions of F.A.C. Chapters 17-2 and 17-4 and 40 CFR (July, 1991 version).

12. The dust accumulation silo and associated dust loading spout are subject to the provisions of F.A.C. Rules 17-2.240: Circumvention; 17-2.250: Excess Emissions; and, 17-4.130: Plant Operation-Problems.

13. The Department's Southwest District and EPCHC offices shall be notified in writing 15 days prior to compliance testing and the reports are to be submitted to these offices no later than 45 days after the last test run is completed.

14. This permit supersedes all other air permits issued for the dust accumulation silo and associated dust loading spout.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

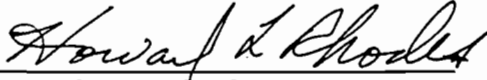

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

SPECIFIC CONDITIONS:

15. The permittee, for good cause, may request that this construction permit be extended. Such a request shall be submitted to the Department's Bureau of Air Regulation prior to 60 days before the expiration date of the permit (F.A.C. Rule 17-4.090).

16. An application for an operation permit must be submitted to the Department's Southwest District office at least 90 days prior to the expiration date of this construction permit. To properly apply for an operation permit, the applicant shall submit the appropriate application form, fee, certification that construction was completed while noting any deviations from the conditions in the construction permit, and compliance test reports as required by this permit (F.A.C. Rules 17-4.055 and 17-2.220).

Mr. D. L. Meredith
Plant Manager
Florida Steel Corporation
Tampa Mill Division
7105 6th Avenue
Post Office Box 23328
Tampa, Florida 33623

Dear Mr. Meredith:

Attached is one copy of the Department's Intent to Issue a construction permit for an increase in the allowable fill rate of the dust accumulation silo, which receives pneumatically conveyed dust from the electric arc furnace operations. There will be no change in the operation of the associated retractable dust loading spout.

Please submit any written comments you wish to have considered concerning the Department's proposed action to Mr. Preston Lewis of the Bureau of Air Regulation.

Sincerely,

C. H. Fancy, P.E.

BEFORE THE STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL REGULATION

In the Matter of
Application for Permit by:

Florida Steel Corporation
Tampa Mill Division
Post Office Box 23328
Tampa, Florida 33623

DER File No. AC 29-216544

INTENT TO ISSUE

The Department of Environmental Regulation hereby gives notice of its intent to issue an air construction permit (copy attached). The Department is issuing this Intent to Issue for the reasons stated below.

The applicant, Florida Steel Corporation, received an air construction permit on August 5, 1988, to construct a dust accumulation silo and associated retractable dust loading spout. The allowable filling rate of the silo was established. The permittee now wants to increase the allowable filling rate (2,643 lbs/hr to 4,816 lbs/hr), with no increase in the allowable particulate matter emissions (AC 29-159192). Therefore, the purpose of this agency action is to issue a construction permit to reflect the modification to the dust accumulation silo.

The Department has permitting jurisdiction under Chapter 403, Florida Statutes (F.S.), Florida Administrative Code (F.A.C.) Chapters 17-2 and 17-4, and 40 CFR (July, 1991 version). The project is not exempt from permitting procedures. The Department has determined that the issuance of an air construction permit is necessary for federal enforceable reasons.

Pursuant to Section 403.815, F.S. and DER Rule 17-103.150, F.A.C., you (the applicant) are required to publish at your own expense the enclosed Notice of Intent to Issue a Permit. The notice shall be published one time only within 30 days, in the legal ad section of a newspaper of general circulation in the area affected. For the purpose of this rule, "publication in a newspaper of general circulation in the area affected" means publication in a newspaper meeting the requirements of Sections 50.011 and 50.031, F.S., in the county where the activity is to take place. Where there is more than one newspaper of general circulation in the county, the newspaper used must be the one with significant circulation in the area that may be affected by the permitting action. If you are uncertain that a newspaper meets these requirements, please contact the
Department

at the address or telephone number listed below. The applicant shall provide proof of publication to the Department's Bureau of Air Regulation, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, within seven days of publication. Failure to publish the notice and provide proof of publication within the allotted time may result in the denial of the permit.

The Department will issue the proposed permit with the attached conditions unless a petition for an administrative proceeding (hearing) is filed pursuant to the provisions of Section 120.57, F.S.

Any person whose substantial interests are affected by the Department's proposed permitting decision may petition for an administrative proceeding (hearing) in accordance with Section 120.57, F.S. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400. Petitions filed by the permit applicant and the parties listed below must be filed within 14 days of receipt of this intent. Petitions filed by other persons must be filed within 14 days of publication of the public notice or within 14 days of receipt of this intent, whichever first occurs. Petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, F.S..

The Petition shall contain the following information;

(a) The name, address, and telephone number of each petitioner, the applicant's name and address, the Department Permit File Number and the county in which the project is proposed;

(b) A statement of how and when each petitioner received notice of the Department's action or proposed action;

(c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;

(d) A statement of the material facts disputed by Petitioner, if any;

(e) A statement of facts which petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of which rules or statutes petitioner contends require reversal or modification of the Department's action or proposed action; and,

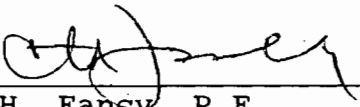

(g) A statement of the relief sought by petitioner, stating precisely the action petitioner wants the Department to take with respect to the Department's action or proposed action.

If a petition is filed, the administrative hearing process is designed to formulate agency action. Accordingly, the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any decision of the Department with regard to the application/request

have the right to petition to become a party to the proceeding. The petition must conform to the requirements specified above and be filed (received) within 14 days of publication of this notice in the Office in General Counsel at the above address of the Department. Failure to petition within the allowed time frame constitutes a waiver of any right such person has to request a hearing under Section 120.57, F.S., and to participate as a party to this proceeding. Any subsequent intervention will only be at the approval of the presiding officer upon motion filed pursuant to Rule 28-5.207, F.A.C.

Executed in Tallahassee, Florida.

CERTIFICATE OF SERVICE

The undersigned duly designated deputy clerk hereby certifies that this NOTICE OF INTENT TO ISSUE and all copies were mailed before the close of business on

9/23/92

FILING AND ACKNOWLEDGEMENT
FILED, on this date, pursuant to
§120.52(9), Florida Statutes, with
the designated Department-Clerk,
receipt of which is hereby
acknowledged.

Clerk

9/23/92
Date

State of Florida
Department of Environmental Regulation
Notice of Intent to Issue

The Department of Environmental Regulation hereby gives notice of its intent to issue an air construction permit to Florida Steel Corporation-Tampa Mill Division, 7105 6th Avenue, Tampa, Hillsborough County, Florida 33623, to increase the allowable fill rate of the dust accumulation silo, which receives dust from the electric arc furnace operations. There will be no change in the operation of the associated retractable dust loading spout. Also, there will be no change in the allowable particulate matter and visible emission limiting standards from the Nos. 1-4 baghouse control systems, which services the electric arc furnace operations (AC 29-159192); also, the dust accumulation silo and associated dust loading spout is serviced by the No. 2 baghouse control system. A determination of Best Available Control Technology (BACT) was not required. The Department is issuing this Intent to Issue for the reasons stated.

A person whose substantial interests are affected by the Department's proposed permitting decision may petition for an administrative proceeding (hearing) in accordance with Section 120.57, F.S. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, within fourteen (14) days of publication of this notice. Petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, F.S.

The Petition shall contain the following information:

- (a) The name, address, and telephone number of each petitioner, the applicant's name and address, the Department Permit File Number and the county in which the project is proposed;
- (b) A statement of how and when each petitioner received notice of the Department's action or proposed action;
- (c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;
- (d) A statement of the material facts disputed by Petitioner, if any;
- (e) A statement of facts which petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of which rules or statutes petitioner contends require reversal or modification of the Department's action or proposed action; and,

(g) A statement of the relief sought by petitioner, stating precisely the action petitioner wants the Department to take with respect to the Department's action or proposed action.

If a petition is filed, the administrative hearing process is designed to formulate agency action. Accordingly, the Department's final action may be different from the position taken by it in this Notice. Persons whose substantial interests will be affected by any decision of the Department with regard to the application/request have the right to petition to become a party to the proceeding. The petition must conform to the requirements specified above and be filed (received) within 14 days of publication of this notice in the Office of General Counsel at the above address of the Department. Failure to petition within the allowed time frame constitutes a waiver of any right such person has to request a hearing under Section 120.57, F.S., and to participate as a party to this proceeding. Any subsequent intervention will only be at the approval of the presiding officer upon motion filed pursuant to Rule 28-5.207, F.A.C.

The application/request is available for public inspection during business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Department of Environmental Regulation
Bureau of Air Regulation
2600 Blair Stone Road
Tallahassee, Florida 32399-2400

Department of Environmental Regulation
Southwest District
4520 Oak Fair Boulevard
Tampa, Florida 33610-7347

Environmental Protection Commission of Hillsborough County
1410 N. 21st Street
Tampa, Florida 33605

Any person may send written comments on the proposed action to Mr. Preston Lewis at the Department's Tallahassee address. All comments received within 14 days of the publication of this notice will be considered in the Department's final determination.

Department of Environmental Regulation
Division of Air Resources Management
Bureau of Air Regulation

September 23, 1992

I. Application

A. Applicant

Florida Steel Corporation
Tampa Mill Division
Post Office Box 23328
Tampa, Florida 33623

B. Project and Location

The applicant has requested a modification to the dust accumulation silo to allow an increase in the filling rate, with no increase in the allowable emission limit of particulate matter (PM). There will be no change in the operation of the associated retractable dust loading spout. The project will occur at the applicant's facility located at 7105 6th Avenue, Tampa, Hillsborough County, Florida. The UTM Coordinates are Zone 17, 364.6 km East and 3,093.8 km North.

C. Process and Controls

The collected dust from the electric arc furnace operations is conveyed to and stored in the dust accumulation silo via a pneumatic system using carrier air from a positive displacement blower rated at 320 acfm. The loading spout gravity-feeds the silo dust into trucks or rail-cars located inside a building through an inner tube, which is surrounded by an outer tube, thus creating an annular area which air is moved upward (to control PM fugitive emissions) by a blower rated at 1,000 acfm.

The No. 2 baghouse control system, a Wheelabrator Model 171 with flow rate of 91,000 acfm, services both the dust accumulation silo and the associated dust loading spout. Also, the Nos. 1-4 baghouse control systems service the electric arc furnace operations.

D. The Source Industrial Code is: Steel Production -3312

E. The Source Classification Codes are:

- | | | |
|---------------------------|-------------|---------------|
| o Dust Accumulation Silo | 3-04-007-99 | Tons Produced |
| o Loading Spout-fugitives | 3-04-888-01 | Tons Product |

II. Rule Applicability

The proposed project is subject to preconstruction review pursuant to Chapter 403, Florida Statutes, Florida Administrative Code (F.A.C.) Rules 17-2 and 17-4, and 40 CFR (July, 1991 version).

The application package was deemed complete on August 10, 1992.

The facility is located in an area designated nonattainment for the pollutant PM in accordance with F.A.C. Rule 17-2.410(a)1.

Even though it is assumed that there is a slight increase in actual PM emissions with the increase in the allowable dust accumulation silo's filling rate (2,643 lbs/hr to 4,816 lbs/hr), the change is assumed to be negligible (i.e., < 1 TPY). Therefore, the project is subject to review pursuant to F.A.C. Rule 17-2.520, Sources Not Subject to Prevention of Significant Deterioration or Nonattainment Requirements.

The PM and visible emission limiting standards shall be in accordance with 40 CFR 60.272a and as established in the air construction permit No. AC 29-159192 (No. 4 electric arc furnace).

The dust accumulation silo and associated retractable dust loading spout are subject to the applicable provisions of F.A.C. Chapters 17-2 and 17-4; also, F.A.C. Rules 17-2.240: Circumvention; 17-2.250: Excess Emissions; 17-2.620(2): General Pollutant Emission Limiting Standards- Objectionable Odors; 17-2.660: Standards of Performance for New Stationary Sources; and, 17-2.700: Stationary Point Source Emission Test Procedures. All applicable provisions of the 40 CFR shall be in accordance with the July, 1991 version.

This air construction permit shall be incorporated into air construction permit, No. AC 29-159192, and shall become a part of the permit.

III. Emission Limitations and Air Quality Analysis

A. Emission Limitations

There will not be any allowable PM emission assigned to the dust accumulation silo and associated dust loading spout because their emissions are incorporated into the total emissions allowed from the Nos. 1-4 baghouse control systems, which services the electric arc furnace operations and was permitted by the air construction permit No. AC 29-159192. Therefore, the PM and visible emissions limiting standards are in accordance with 40 CFR 60.272a.

B. Air Quality Analysis

Based on a technical evaluation of the request package, an air quality analysis was not required.

IV. Conclusion

Based on the information provided by Florida Steel Corporation, the Department has reasonable assurance that the proposed project, to increase the allowable fill rate of the dust accumulation silo, as described in this evaluation, and subject to the conditions proposed herein, will not cause or contribute to a violation of any air quality standard, PSD increment, or any other technical provision of Chapter 17-2 of the Florida Administrative Code.

PERMITTEE:

Florida Steel Corporation
Tampa Mill Division
Post Office Box 23328
Tampa, Florida 33623

Permit Number: AC 29-216544
Expiration Date: July 31, 1994
County: Hillsborough
Latitude/Longitude: 27°57'18"N
82°22'34"W
Project: Dust Accumulation Silo
Modification; and, Assoc.
Dust Loading Spout

This permit is issued under the provisions of Chapter 403, Florida Statutes (F.S.), Florida Administrative Code (F.A.C.) Chapters 17-2 and 17-4, and 40 CFR (July, 1991 version). The above named permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawing(s), plans, and other documents attached hereto or on file with the Department and made a part hereof and specifically described as follows:

For the modification of the dust accumulation silo to allow an increase in the filling rate, with no increase in the allowable emission limit of particulate matter (PM). There is no change in the operation of the associated retractable dust loading spout. Dust is conveyed from the Nos. 1-4 baghouse control systems to the silo via a pneumatic system using carrier air from a positive displacement blower rated at 320 acfm. The loading spout gravity-feeds the silo dust into trucks or rail-cars located inside a building through an inner tube, which is surrounded by a concentric outer tube, thus creating an annular area through which air is moved upward (to eliminate fugitive emissions) by a blower rated at 1000 acfm. PM and visible emissions from the silo and loading spout are controlled by the No. 2 baghouse system, a Wheelabrator Model 171 with a flow rate of 91,000 acfm. The electric arc furnace operations are controlled by the Nos. 1-4 baghouse systems. The project will occur at the permittee's facility located at 7105 6th Avenue, Tampa, Florida. The UTM coordinates are Zone 17, 364.6 km East and 3093.8 km North.

The Standard Industrial Code is: Steel Production - 3312

The Standard Classification Codes are:

o Dust Accumulation Silo	3-04-007-99	Tons Produced
o Loading Spout-fugitives	3-04-888-01	Tons Product

The source shall be constructed/modified in accordance with the permit application, plans, documents, amendments, drawings, and supplementary information, except as otherwise noted in the General and Specific Conditions.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

Attachments to be Incorporated:

1. Request for a Modification received July 20, 1992, from Mr. James S. Alves.
2. Sealed request for a modification received August 10, 1992, from Mr. Tom Sack.
3. Technical Evaluation and Preliminary Determination dated September 23, 1992.

GENERAL CONDITIONS:

1. The terms, conditions, requirements, limitations, and restrictions set forth in this permit are "Permit Conditions" and are binding and enforceable pursuant to Sections 403.161, 403.727, or 403.859 through 403.861, F.S. The permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.
2. This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings, exhibits, specifications, or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.
3. As provided in Subsections 403.087(6) and 403.722(5), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations. This permit is not a waiver of or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in the permit.
4. This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.
5. This permit does not relieve the permittee from liability for harm or injury to human health or welfare, animal, or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the permittee to cause pollution in contravention of F.S. and Department rules, unless specifically authorized by an order from the Department.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

GENERAL CONDITIONS:

6. The permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed or used by the permittee to achieve compliance with the conditions of this permit, as required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to achieve compliance with the conditions of the permit and when required by Department rules.

7. The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at a reasonable time, access to the premises, where the permitted activity is located or conducted to:

- a. Have access to and copy any records that must be kept under the conditions of the permit;
- b. Inspect the facility, equipment, practices, or operations regulated or required under this permit; and,
- c. Sample or monitor any substances or parameters at any location reasonably necessary to assure compliance with this permit or Department rules.

Reasonable time may depend on the nature of the concern being investigated.

8. If, for any reason, the permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the permittee shall immediately provide the Department with the following information:

- a. a description of and cause of non-compliance; and,
- b. the period of noncompliance, including dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the non-compliance.

The permittee shall be responsible for any and all damages which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

GENERAL CONDITIONS:

9. In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the F.S. or Department rules, except where such use is proscribed by Sections 403.73 and 403.111, F.S. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.

10. The permittee agrees to comply with changes in Department rules and F.S. after a reasonable time for compliance, provided, however, the permittee does not waive any other rights granted by F.S. or Department rules.

11. This permit is transferable only upon Department approval in accordance with F.A.C. Rules 17-4.120 and 17-30.300, as applicable. The permittee shall be liable for any non-compliance of the permitted activity until the transfer is approved by the Department.

12. This permit or a copy thereof shall be kept at the work site of the permitted activity.

13. The permittee shall comply with the following:

- a. Upon request, the permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
- b. The permittee shall hold at the facility or other location designated by this permit records of all monitoring information (including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation) required by the permit, copies of all reports required by this permit, and records of all data used to complete the application for this permit. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

GENERAL CONDITIONS:

c. Records of monitoring information shall include:

- the date, exact place, and time of sampling or measurements;
- the person responsible for performing the sampling or measurements;
- the dates analyses were performed;
- the person responsible for performing the analyses;
- the analytical techniques or methods used; and,
- the results of such analyses.

14. When requested by the Department, the permittee shall within a reasonable time furnish any information required by law which is needed to determine compliance with the permit. If the permittee becomes aware that relevant facts were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be corrected promptly.

SPECIFIC CONDITIONS:

1. Permitted hours of operation are 8760.

2. The maximum fill rate of the dust accumulation silo is 4,816 lbs/hr.

3. The maximum loading rate of the retractable dust loading spout is 540,000 lbs/hr.

4. For nonattainment review purposes pursuant to F.A.C. Rule 17-2.510, there will not be any potential/allowable particulate matter (PM) emission limit assigned to the dust accumulation silo and associated dust loading spout. Pursuant to construction permit, No. AC 29-159192 (No. 4 electric arc furnace), the allowable mass PM emission limit will not be increased.

5. Any request to increase the PM allowable mass emissions (i.e., lbs/hr, TPY) related to the dust accumulation silo and associated dust loading spout, pursuant to construction permit No. AC 29-159192 and this permit, shall require a permit application for a modification and the appropriate processing fee.

6. For the No. 2 baghouse control system servicing the dust accumulation silo and associated dust loading spout, the PM and visible emissions limiting standards shall be in accordance with 40 CFR 60.272a.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

SPECIFIC CONDITIONS:

7. This construction permit and its conditions shall be incorporated into the construction permit, No. AC 29-159192, and shall become a part of the permit.

8. Compliance tests shall be conducted on the Nos.1-4 baghouse control systems with all of its associated sources operating at a minimum of 90% of their maximum permitted rates using the following test methods pursuant to F.A.C. Rule 17-2.700 and 40 CFR 60, Appendix A:

- o EPA Methods 1- 5 (including 5D) - Determination of Particulate Emissions from Stationary Sources
- o EPA Method 9 - Visual Determination of the Opacity of Emissions from Stationary Sources

Note: Other test methods may be used only if prior Departmental approval has been granted in writing pursuant to F.A.C. Rule 17-2.700(3).

9. Any change in the dust accumulation silo or associated dust loading spout pursuant to F.A.C. Rule 17-2.100, Definitions-Modification, shall be submitted for approval to the Department's Bureau of Air Regulation office, the Department's Southwest District office, and the Environmental Protection Commission of Hillsborough County (EPCHC).

10. Objectionable odors shall not be allowed off plant property pursuant to F.A.C. Rule 17-2.620(2).

11. The dust accumulation silo and associated dust loading spout are subject to all applicable provisions of F.A.C. Chapters 17-2 and 17-4 and 40 CFR (July, 1991 version).

12. The dust accumulation silo and associated dust loading spout are subject to the provisions of F.A.C. Rules 17-2.240: Circumvention; 17-2.250: Excess Emissions; and, 17-4.130: Plant Operation-Problems.

13. The Department's Southwest District and EPCHC offices shall be notified in writing 15 days prior to compliance testing and the reports are to be submitted to these offices no later than 45 days after the last test run is completed.

14. This permit supersedes all other air permits issued for the dust accumulation silo and associated dust loading spout.

PERMITTEE:
Florida Steel Corporation
Tampa Mill Division

Permit Number: AC 29-216544
Expiration Date: July 31, 1994

SPECIFIC CONDITIONS:

15. The permittee, for good cause, may request that this construction permit be extended. Such a request shall be submitted to the Department's Bureau of Air Regulation prior to 60 days before the expiration date of the permit (F.A.C. Rule 17-4.090).

16. An application for an operation permit must be submitted to the Department's Southwest District office at least 90 days prior to the expiration date of this construction permit. To properly apply for an operation permit, the applicant shall submit the appropriate application form, fee, certification that construction was completed while noting any deviations from the conditions in the construction permit, and compliance test reports as required by this permit (F.A.C. Rules 17-4.055 and 17-2.220).
