CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. Daniel E. Ross, P.E.
Technical Manager
Nitram, Inc.
Post Office Box 2968
Tampa, Florida 33601

Dear Mr. Ross:

Re: Modification of Conditions AC 29-089405

The department acknowledges receipt of your February 15, 1985, letter which requested that Specific Condition No. 13 of Construction Permit No. AC 29-089405 be modified to allow temporary operation of one train of the modified nitric acid plant.

This request is acceptable and the specific condition of the construction permit is changed as follows:

Original Specific Condition

13. The nitric acid plant shall not be operated without both compressors and absorption towers in service unless prior approval has been obtained from the Department.

Revised Specific Condition

13. Prior to the expiration date of this permit to construct, Nitram, Inc. may operate the combined nitric acid plants with one compressor and one absorption tower out of service and isolated by slip blinds provided the Company performs compliance tests as specified in Specific Condition No. 6 of this construction permit on the train that is in operation. If the test results show the emissions from one train of the combined nitric acid plant complies with the emission standards of 3.0 lb NO_x/ton HNO₃ and 5 percent opacity (6 minute average), the permit to operate may authorize operation of one train of the combined plants. Otherwise, any permit to operate issued for the modified plant shall require both compressors and both absorption towers to be in service during commercial operation.

Mr. Daniel E. Ross

Attachments to be Incorporated

2. Mr. Daniel E. Ross's letter dated February 15, 1985.

This letter shall be attached to construction permit No. AC 29-089405 and shall become a part of that permit.

Sincerely,

Victoria G. Tschinkel
Secretary

Attached is a letter drafted for your signature that will modify a specific condition in the construction permit issued to Nitram, Inc. for a nitric acid plant. The modification will allow the company to operate half of the production equipment if the emissions comply with the air pollution control regulations.

The bureau recommends that the modification be approved.
