Subject: RE: Comments on Hookers Point Draft Title V Permit

Cindy,
I reviewed the Hookers Point Title V Permit this weekend and found a misprint in section IV. This section is the Acid Rain Part. On page 20 in the paragraph above the EU's, it states:

The emissions units listed below are substitution units regulated under Acid Rain Part, Phase I for Tampa Electric Company, Big Bend Station, Facility ID No. 0570039, ORIS code: 0695.

Please make the following minor changes:
* Big Bend Station to Hookers Point Station
* Facility ID from 0570039 to 0570038
* ORIS code from 0695 to 0647

I will be faxing a copy of the Notice of Intent to you shortly. Unfortunately, I received the official copy from the plant the week before last and was able to have the Notice of Intent printed in the paper on 3/4/02.

Please let me know if this changes the Notice of Intent. Thanks.

Have a Great Day!
Shelly Castro

Shelly,

I will make the changes that you requested. I think what you actually want in condition A.33 is for me to delete the "s" at the end of "ceases" in condition A.33. because the "s" is already there.

For the sake of consistency with Subsection A, I will probably add a "B" in front of all of the numbered conditions in Subsection B.

Also, in conditions A.32 and A.33, would you have a problem with my replacing the phrase "existing emission units" with the phrase "six oil-fired boilers"? Now that the construction is completed, and the IC engines now also "exist", the phrase has become ambiguous.

-Cindy Phillips, PE
FDEP Bureau of Air Regulation
