Re: Tampa Electric Co. - Information Request

Dear DEP Staff:

This is a formal request to review all documents, including applications, meeting notes and other records relating to Tampa Electric Co.'s compliance with nitrogen oxide, ozone and/or particulate matter requirements of federal and state law for 2000 and subsequent years.

It is my understanding that Tampa has filed a Phase II NOx compliance plan for Big Bend and Gannon plants and related documents (eg., evaluation of NOx controls for Tampa's group II wet bottom and cyclone boilers).

Please let me know when it would be convenient for me to review these documents.

Sincerely,

A handwritten signature in cursive script that reads "Gail Kamaras".

Gail Kamaras, Director
Energy Advocacy Program
