Subject: Re: TECO asphalt-coated coal

Scott, Jonathan and I spoke today by phone and it appears we are in agreement on how to proceed. EPC will respond to TECO's one-time request to burn the 2100 tons. We will do it through a letter with conditions or a CO.

By the way, TECO advises us the material is not on-site. It is in Davant< LA awaiting routing instructions. That should defuse some concerns. We will copy you.

Jerry

Talked to Scott on this and he said they hadn't denied TECO's request, but had asked for additional info, which was received in Tall'e (after a few months or so) on 10/21/02, so you and I should be getting a copy. If the request is approved, an authorization to burn the material currently there becomes moot. If the request is denied, then we'll all deal with that.
