**Re: Tampa Electric Company  
H.L. Culbreath Bayside Power Station Unit 5 & 6  
Notification of Certification and Performance Testing Dates  
Air Permit No. 0570040-026-AC**

Dear Ms. Vielhauer and Ms. Danois:

On February 3, 2009, TEC submitted the Monitoring Plan and Test Protocol for BPS Unit 5 and Unit 6. TEC is required by 40 CFR Part 60.8 and 40 CFR Part 75.61 respectively to perform and notify of performance and CEM certification testing. TEC is hereby submitting notification that the anticipated performance and CEM certification testing will be conducted during the week of April 6, 2009 for BPS Unit 6 and the week of April 13 for Unit 5. CEM shelter work for Unit 6 will begin during the week of March 23, 2009 and the week of March 30, 2009 for Unit 5. The CEM shelter work consists of the cycle response time, 7-day drift, linearity, calibrations and DAHS certification. The performance testing that will be held in April will consist of the RATA and stratification testing.

As the schedule changes TEC will keep the FDEP and EPCHC updated. TEC appreciates your cooperation in this matter and if you have any questions, please call me at (813) 228-4457.

Sincerely,

Laurie Pence  
Environmental Specialist  
Air Programs  
Environmental, Health & Safety
