**Re: Tampa Electric Company (TEC)
F.J. Gannon Station
Air Operation Permit Renewal Application
Combustion Turbine Permit No. AO29-160272**

Gentlemen:

Please find enclosed the application package for the permit renewal to operate the above air source. Included in this permit package is an updated Operation and Maintenance Plan for this source and a letter of authorization for the applicant.

Additionally, since the permit renewal form does not have a section for a Professional Engineer's seal, TEC has attached a form with wording appropriate for this submittal which is in accordance with Chapter 17-4.05(3)F.A.C.

Enclosed are three (3) copies of this application with the Profession Engineer certification to the Department and one (1) signed and sealed copy to EPCHC.

Mr. Roger P. Stewart
Richard D. Garrity, Ph.D
