Re: Hillsborough County - AP  
DER File No. AC29-197823

Dear Mr. Rigg:

Please be advised that the Environmental Protection Commission of Hillsborough County (EPCHC) and the Florida Department of Environmental Regulation (FDER) have completed their initial review of the above application and found it to be incomplete. In order to complete the review process the following additional information is being requested pursuant to Chapter 17-4.070, F.A.C.:

1. Calculations of the loading rack emissions submitted with the application identify a "Control Efficiency Term" and a "Collection Efficiency". In reviewing the calculations it appears as though the "Collection Efficiency" was not used to determine emission levels. Please recalculate the emission levels and resubmit the calculations and Section III:C. of the application.

Actual = (1-.98) (Uncontrolled) + (.98) (Uncontrolled) (1-.98)

2. Please complete Section III:A and B of the application specifying the total maximum throughput (gpm) of the loading racks.

3. In Section III:D. of the application you have identified the control equipment as a John Zink Model GV-LH-8400-2 (Gasoline Vapor Combustion Unit) which is clearly guaranteed to meet 35 mg/L of product (April 9, 1990 and June 10, 1988). It is unclear as to what unit John Zink has guaranteed in their May 11, 1990 letter. As such, potential (allowable) emissions should be calculated based on 35 mg/L of product proposed to be loaded. Please recalculate the emission levels and resubmit the calculations and Section III.C. of the application.

Mr. Tom Rigg  
July 19, 1991  
Page 2

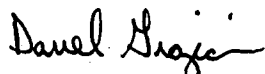

4. On November 2, 1988 the Department issued permit No. AC29-151060 for the construction of this loading rack. This permit was issued in accordance with Rule 17-2.520, F.A.C. by capping VOC emissions below 100 TPY. However, since that time the facility has become major (emissions greater than 100 TPY) as such the requirements of Rule 17-2.510, F.A.C. may apply to this modification. Please provide documentation as to why relaxation of the restrictions in permit No. AC29-151060 will not trigger new source review requirements.

"NOTICE! Pursuant to the provisions of Section 120.600 F.S., if the Department does not receive a response to this request for information within 90 days of the date of this letter, the Department will issue a final order denying your application. You need to respond within 30 days after you receive this letter, responding to as many of the information requests as possible and indicating when a response to any unanswered question will be submitted. If the response will require longer than 90 days to develop, an application for new construction should be withdrawn and resubmitted when completed information is available. Or for operating permits, you should develop a specific time table for the submission of the requested information for Department review and consideration. Failure to comply with a time table accepted by the Department will be grounds for the Department to issue a Final Order of Denial for lack of timely response. A denial for lack of information or response will be unbiased as to the merits of the application. The applicant can reapply as soon as the requested information is available."

In your response, please submit the original to the undersigned and a copy to Jim McDonald of the Southwest District of the FDER.

If you have any questions, please feel free to contact me at (813) 272-5530.

Sincerely,

Darrel Graziani  
Chief, Air Permitting Section

CERTIFIED MAIL—RETURN RECEIPT REQUESTED

Ms. Caren I. Lennie  
Environmental Coordinator  
GATX Terminals Corporation  
100 GATX Drive  
Tampa, Florida 33605

Dear Ms. Lennie:

On May 31, 1991, the Bureau of Air Regulation received air construction permit applications for sources at GATX Terminals in Hillsborough County and Central Florida Pipeline in Orange County. These applications were submitted with processing fee of \$200 per application (\$1,400 total for GATX and \$200 for Central Florida Pipeline). Since the \$200 fee was increased to \$1,000 beginning May 30, additional fees will be required to continue processing these applications.

As you requested, \$1,000 of the fees already paid have been applied to the application for Tanks 80-3 and 80-4 at the GATX Terminal, and processing has begun. The remaining \$400 has been applied to the Truck Loading Rack T/T#1 application at GATX. An additional \$600 will be required for that application, plus \$6,000 total for the remaining six GATX applications and \$800 for the Central Florida Pipeline application. Since the GATX applications are being sent to the DER Southwest District in Tampa and the Central Florida Pipeline application to the DER Central District in Orlando for processing, please remit the fees to the appropriate district office. If you have any questions, please call me at (904)488-1344.

Sincerely,

*Patty Adams*

Re: Central Florida Pipeline Corporation  
FDER Permit No. A048-116200  
Tank No. 1055

Dear Mr. Fancy:

Central Florida Pipeline Corporation (CFPL) was issued Florida Department of Environmental Regulation (FDER) Permit No. A048-116200 on April 21, 1986 for the operation of petroleum storage Tank No. 1055 at its Taft, Florida terminal. In a correspondence dated December 14, 1989, CFPL requested modification to this permit to allow for increased throughput. As a result of its intent to remove this tank from service, however, CFPL withdrew this request in a correspondence dated March 20, 1990. For this same reason, CFPL did not submit an application for operation permit renewal at least 60 days prior to the permit expiration date of April 10, 1991.

In an attempt to immediately repair unforeseen complications with the pontoons of the internal floating roof (IFR) of Tank 80-3, CFPL was forced to transfer product from Tank No. 80-3 to the available capacity of Tank No. 1055, thus causing CFPL to operate Tank No. 1055 up to, and beyond the operating permit expiration date.

Efforts to remedy the IFR problems are continuing as expeditiously as possible, however, it appears that the repairs and subsequent inspections and testing may require an additional two to four weeks.

Mr. C. H. Fancy  
April 11, 1991  
Page 2

CFPL, therefore, respectfully requests authorization from FDER to operate Tank No. 1055 beyond its permit expiration date, to no later than May 15, 1991.

Your immediate attention in this matter is sincerely appreciated.

Should you have any questions regarding this request, please contact me at (813) 241-1125.

Sincerely,  
CENTRAL FLORIDA PIPELINE CORPORATION

Re: GATX Terminals Corporation  
Operating Permit Modifications  
for Air Pollution Sources

Dear Mr. Fancy:

GATX Terminals Corporation (GATX) is hereby submitting three (3) sets each of applications to modify operating permits for air pollution sources. GATX's intent is to revise the Tampa Terminal's air operating permits based on projected growth over the next five (5) years.

The following is a summary of the FDER Permit Nos. and the proposed throughput changes:

<u>FDER Permit No.</u>	<u>Product Stored</u>	<u>Tank No.</u>	<u>Proposed Annual Thruput (Bbls)</u>	<u>Presently Permitted Thruput (Bbls).</u>
AO29-183847	Jet Fuel	70-1	3,360,000	1,250,000
AO29-183847	Jet Fuel	70-2	3,360,000	1,250,000
AO29-183847	Jet Fuel	42-1	2,016,000	210,000
AO29-183847	Jet Fuel	42-2	2,016,000	210,000
AO29-183847	Jet Fuel	42-3	2,016,000	210,000
AO29-183847	Jet Fuel	42-4	2,016,000	210,000
AO29-183850	Gasoline	80-1	2,880,000	800,000
AO29-183840	Gasoline	55-2	1,980,000	190,000

Please find enclosed a check in the amount of \$800 for the operating permit modification applications.

Should you have any questions or concerns, please contact me at (813) 248-2148 or 241-1139.

Sincerely,  
GATX TERMINALS CORPORATION

RE: Hillsborough County  
FDER Permit Nos. AC29-149635, AC29-159753

1031

Dear Mr. Fancy:

GATX Terminals Corporation (GATX), in support of negotiation of a Consent Order with Hillsborough County Environmental Protection Commission (EPC), herewith provides applications to modify an air pollution source for Tank Nos. 40-1, 80-2, 80-3, and 80-4 at its Tampa Terminal.

These modifications are requested to accurately reflect an allowance for deck seam loss. Relative calculations are provided with each application.

Herewith provided are three (3) full sets of applications signed and sealed by a Professional Engineer registered in the State of Florida. By a copy of this letter, GATX is also forwarding one set of signed and sealed applications to EPC and a set of copies of applications to FDER-Tampa.

GATX respectfully requests FDER's review of these permit modifications as quickly as possible as the modifications requested herein are minor and when received will satisfy conditions of the pending Consent Order. GATX has previously filed a Waiver of 90 day time limit under § 120.60(2) and 403.0876, F.S. with EPC which expires on June 15, 1991. If necessary, GATX will provide an additional waiver, but will await response from FDER.

Should you have any questions or concerns regarding these applications, please contact Elaine Macinski at (813) 214-1125.

Sincerely,  
GATX TERMINALS CORPORATION

RE: Central Florida Pipeline Corporation  
A048-182682 - Tank 40-1  
A048-160623 - Tank 60-1

Dear Mr. Fancy:

Central Florida Pipeline Corporation (CFPL), a subsidiary of GATX Terminals Corporation (GATX) hereby advises per telephone conversation with Mr. Willard Hanks on January 31, 1991 maintenance on two (2) Internal Floating Roof (IFR) tank seals at the Taft, Florida terminal.

The maintenance consists of replacing a single seal in Tank No. 40-1, reference FDER permit no. A048-182682, with a double wiper seal. Additionally, Tank No. 60-1, reference FDER permit no. A048-160623, existing double wiper seal will be replaced with a new double wiper seal.

Upon delivery of seal material, as well as cleaning and gas-freeing each tank, CFPL anticipates seal replacement to commence the week of February 12, 1991.

Please contact me at (813)248-2148 with any questions or concerns.

Sincerely,  
Central Florida Pipeline Corporation
