PUBLIC NOTICE OF INTENT TO ISSUE PSD PERMIT  
 STATE OF FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION  
 Hillsborough County Resource Recovery Facility Unit 4  
 DEP File No. 0570261-007-AC (PSD-FL-369, PA83-19A)

The Department of Environmental Protection (Department) gives notice of its intent to issue a permit under the requirements for the Prevention of Significant Deterioration (PSD) of Air Quality to Hillsborough County. The permit is one of several authorizations needed to construct a nominal 600 tons per day (TPD) municipal waste combustor (MWC) at the existing Hillsborough County Resource Recovery Facility southeast of Tampa, west of I-75 and near Brandon. A PSD applicability analysis and a determination of Best Available Control Technology (BACT) were required pursuant to Rule 62-212.400(2)(a) and 10(b), Florida Administrative Code (FAC) for emissions of nitrogen oxides (NO<sub>x</sub>), carbon monoxide (CO), sulfur dioxide (SO<sub>2</sub>), MWC acid gases, and MWC organics. The applicant's address is Hillsborough County Department of Solid Waste Management, 601 East Kennedy Boulevard, Tampa, Florida 33602.

The applicant proposes to construct a new MWC Unit 4. The primary components are: a new nominal 600 TPD MWC; a new nominal 17 megawatt (MW) steam turbine-electrical generator; expansion of the ash handling and refuse building; a new transformer yard; a new lime silo; and a new settling basin. When the project is completed, the facility will be able to process approximately 1,800 TPD of solid waste and generate approximately 47 MW (net) of electricity.

The general area is in attainment with respect to all State and National Ambient Air Quality Standards. There have been approximately 200,000 tons per year (TPY) of SO<sub>2</sub> and NO<sub>x</sub> reductions since 1998 from stationary sources in the Tampa Bay area due to the natural gas repowering of the coal-fired TECO Gannon (Bayside) Station and addition of a scrubber and Low NO<sub>x</sub> burners at the TECO Big Bend Station. Dispersion modeling indicates that the proposed project will not cause or contribute to a violation of the ambient air quality standards or allowable increases (increments). All of the modeled ground-level pollutant impacts are less than the respective significant impact levels that would otherwise require applications of more involved multiple-source dispersion models.

The proposed project is subject to 40CFR60, Subpart Eb-Standards of Performance for New Stationary Sources and Emission Guidelines (including hazardous air pollutants) for Existing Sources Municipal Waste Combustors as revised and published by the Environmental Protection Agency (EPA) on May 10, 2006.

To meet the requirements of Subpart Eb and BACT, the applicant will install: a spray dryer (SD) with lime injection to absorb MWC acid gases; an activated carbon injection (ACI) system to adsorb MWC organics and mercury (Hg) a fabric filter (FF) baghouse to remove particulate matter, including absorption/adsorption reagent; a flue gas recirculation (FGR) to limit NO<sub>x</sub> formation; and a urea-based selective non-catalytic reduction (SNCR) system to destroy NO<sub>x</sub>. Continuous emissions monitoring systems (CEMS) are required for CO, NO<sub>x</sub>, SO<sub>2</sub> and Hg are required as well as a continuous opacity monitoring system (COMS).

The Department has determined that emissions for several key pollutants, particularly those that are affected by reagent use, can be lower than required by Subpart Eb. The Department has determined that BACT for NO<sub>x</sub> is 110 parts per million by volume, dry corrected to 7 percent oxygen (ppmvd @7% O<sub>2</sub>) of NO<sub>x</sub> on a 24-hour average and 90 ppmvd @7% O<sub>2</sub> on a 12-month average, rolled monthly. This is the most stringent BACT for NO<sub>x</sub> issued for a large MWC in the United States.

Mercury (Hg) emissions will be limited to 28 micrograms per dry standard cubic meter (µg/dscm). Compliance will be determined in accordance with the existing procedures in 40CFR60, Subpart Eb. However, the Department has determined that by the second year of operation, reliable Hg-CEMS will be available and requires that one be installed to measure actual emissions. This instrument represents the first Hg-CEMS required on an MWC in the United States. This instrument will provide much better information on short term and long term Hg emissions and insure that annual emissions are less than the threshold requiring a BACT determination pursuant to PSD.

The following table summarizes the estimated annual emissions and pollutant concentration limits in accordance with the Department's BACT determination, Subpart Eb, or to avoid PSD. Because of the degree of control, some pollutants are emitted at levels less than the thresholds requiring emissions limits.

Pollutant	Emissions TPY	Emission Limit	Measurement Basis	Limit Basis
NO <sub>x</sub>	210	110/90 ppmvd	24-hr/12-month CEMS	BACT

insure that annual emissions are less than the threshold requiring a BACT determination pursuant to PSD.

The following table summarizes the estimated annual emissions and pollutant concentration limits in accordance with the Department's BACT determination, Subpart Eb, or to avoid PSD. Because of the degree of control, some pollutants are emitted at levels less than the thresholds requiring emissions limits.

Pollutant	Emissions TPY	Emission Limit	Measurement Basis	Limit Basis
NO <sub>x</sub>	210	110/90 ppmvd	24-hr/12-month CEMS	BACT
CO	113	100/80 mg/dscm	4-hr/30-day CEMS	BACT/Eb
MWC Acid Gases (SO <sub>2</sub> +HCl)	84+111=195	26/25 ppmvd*	24-hr CEMS/Stack Test	BACT/Eb
MWC Metals/PM/PM <sub>10</sub>	14.6	12 mg/dscm	Stack Test	Avoid PSD
Ozone as VOC	12	NA	NA	NA
Sulfuric Acid Mist	<<7	NA	NA	NA
Fluorides (F)	<<3	NA	NA	NA
Lead (Pb)	0.17	140 µg/dscm	Stack Test	Subpart Eb
Mercury (Hg)	<0.10	28 µg/dscm*	Stack Test	Avoid PSD
Cadmium (Cd)	0.01	10 µg/dscm	Stack Test	Subpart Eb
MWC Organics (dioxin/furan)	1.6x10 <sup>-6</sup>	13.0 ng/dscm	Stack Test	BACT/Eb
Opacity	NA	10 percent	6-minute COMS	BACT/Eb
Ammonia (NH <sub>3</sub> )	<15	15/10 ppmv	Stack Tests based on load	PM, Opacity

\* Alternative percent (%) removal requirements apply if values exceeded. SO<sub>2</sub> (80%), HCl (95%), Hg (85%)

The Department will issue the FINAL Permit, in accordance with the conditions of the DRAFT Permit, unless a response received in accordance with the following procedures results in a different decision or significant change of terms or conditions. The Department will accept written comments and requests for a public meeting concerning the proposed permit issuance action for a period of 30 (thirty) days from the date of publication of this Public Notice of Intent to Issue PSD Permit. Written comments or requests for public meetings should be provided to the Department's Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, FL 32399-2400 or the e-mail address provided below. Any written comments filed shall be made available for public inspection. If comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit and require, if applicable, another Public Notice.

The Department will issue the permit with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to sections 120.569 and 120.57 F.S., before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below. This PSD permitting action is being coordinated with a certification under the Power Plant Siting Act (Sections 403.501-518, F.S.). If a petition for an administrative hearing on the Department's Intent to Issue is filed by a substantially affected person, that hearing shall be consolidated with the certification hearing (if one is held), as provided under Section 403.507(3). Mediation is not available in this proceeding.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under section 120.60(3) of the Florida Statutes must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of this notice of intent, whichever occurs first. Under section 120.60(3), however, any person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.569 and 120.57 F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code.

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the Department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

A complete project file is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Dept. of Environmental Protection Bureau of Air Regulation 111 S. Magnolia Drive, Suite 4 Tallahassee, Florida 32399-2400 Telephone: 850/488-0114 Fax: 850/921-9533	Dept. of Environmental Protection Southwest District Office 13051 North Telecom Parkway Temple Terrace, Florida 33637-0926 Telephone: 813/632-7600 Fax: 813/744-6458	Hillsborough County Environmental Protection Commission 3629 Queen Palm Drive Tampa, Florida 33619-1309 Telephone: 813/627-2600 Fax: 813-627-2660
--	---	--

The complete project file includes the application, technical evaluations, Draft Permit, and the information submitted by the authorized representative, exclusive of confidential records under Section 403.111, F.S. Interested persons may contact Scott Sheplak or Debbie Nelson of the Bureau of Air Regulation at 111 South Magnolia Drive, Suite 4, Tallahassee, Florida 32301, or call 850/488-0114 for additional information. Key correspondence, draft permit and technical evaluation can be accessed by clicking on "Hillsborough County Resource Recovery Facility" under the "Waste-to-Energy" tab at the following web page:

PUBLIC NOTICE OF INTENT TO  
 STATE OF FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION  
 Hillsborough County Resource Recovery Facility  
 DEP File No. 0570261-007-AC (P)

Department of Environmental Protection (Department) give requirements for the Prevention of Significant Deterioration (PSD) is one of several authorizations needed to construct a nonferrous metal (MWC) at the existing Hillsborough County Resource Recovery Facility near Brandon. A PSD applicability analysis and a determination (CT) were required pursuant to Rule 62-212.400(2)(a) and 11.000(1) of the Florida Administrative Code (FAC) for emissions of nitrogen oxides (NO<sub>x</sub>), carbon monoxide (CO), sulfur dioxide (SO<sub>2</sub>), and particulate matter (PM). The applicant's address is Hillsborough County Department of Environmental Protection, 33602.

The applicant proposes to construct a new MWC Unit 4. The project includes: a new nominal 17 megawatt (MW) steam turbine-electric generator building; a new transformer yard; a new lime silo; and a new facility will be able to process approximately 1,800 TPD of solid waste and produce approximately 1,800 TPD of electricity.

The project area is in attainment with respect to all State and National Ambient Air Quality Standards (NAAQS) for SO<sub>2</sub> and NO<sub>x</sub> at approximately 200,000 tons per year (TPY) of SO<sub>2</sub> and NO<sub>x</sub> in the Tampa Bay area due to the natural gas repowering of the coal-fired power plant and the installation of a scrubber and Low NO<sub>x</sub> burners at the TECO Big Bend project will not cause or contribute to a violation of the NAAQS (increments). All of the modeled ground-level pollutant concentrations are below the NAAQS levels that would otherwise require applications of more stringent controls.

The proposed project is subject to 40CFR60, Subpart Eb-Standard Emission Guidelines (including hazardous air pollutants) for Existing and New Sources of Air Pollution, promulgated and published by the Environmental Protection Agency (EPA). To meet the requirements of Subpart Eb and BACT, the applicant will install: a wet scrubber to remove acid gases; an activated carbon injection (ACI) system to remove volatile organic compounds (VOC); a fabric filter (FF) baghouse to remove particulate matter; including a low NO<sub>x</sub> burner (LNB) to limit NO<sub>x</sub> formation; and a urea-based selective catalytic reduction (SCR) system to reduce NO<sub>x</sub>. Continuous emissions monitoring systems (CEMS) will be installed as well as a continuous opacity monitoring system (COMS).

The Department has determined that emissions for several key pollutants, such as SO<sub>2</sub>, CO, and PM, can be lower than required by Subpart Eb. The Department has determined that emissions of SO<sub>2</sub> per million by volume, dry corrected to 7 percent oxygen (ppmv) @7% O<sub>2</sub> on a 12-month average, rolled monthly. This is the same as the SO<sub>2</sub> MWC in the United States.

Mercury (Hg) emissions will be limited to 28 micrograms per dry standard cubic meter (dscm) in accordance with the existing procedures in 40CFR60. The Department has determined that by the second year of operation, reliable Hg-CEMS will be installed to measure actual emissions. This instrument represents the best available technology (BAT) for Hg emissions. This instrument will provide much better information than the current method of estimating annual emissions that annual emissions are less than the threshold requiring more stringent controls.

The following table summarizes the estimated annual emissions at the Resource Recovery Facility, the Department's BACT determination, Subpart Eb, or to avoid, prevent, or compensate for adverse effects (APC) if emissions are emitted at levels less than the thresholds requiring more stringent controls.

Pollutant	Emissions (TPY)	Emission Limit (TPY)
SO <sub>2</sub>	200,000	200,000
NO <sub>x</sub>	200,000	200,000
CO	200,000	200,000
PM	200,000	200,000
VOC	200,000	200,000
Hg	28	28

The Hillsborough County Board of Commissioners and the Solid Waste Management Board at a public meeting will be held on [redacted] at a public meeting will be held on [redacted] to discuss the proposed expansion of Hillsborough County Resource Recovery Facility. The meeting will begin at 2 p.m. at the Facility, which is located at 601 E. Kennedy Boulevard.

The Facility currently consists of 10 (10) MWC units and each unit burns approximately 100 tons of municipal solid waste (MSW). The County is currently in the process of purchasing a fourth MWC unit, which will process approximately 100 tons of MSW per day. This will increase the Facility's total MSW processing capacity to approximately 1,000 tons per day.

The County has prepared an analysis of the potential impacts of the expansion of the Facility (Facility) on the surrounding environment, including air quality, noise, and vegetation. The County also has prepared a Resource Recovery Plan (Plan), which describes the County's strategy for the use of waste reduction, recycling, and energy recovery. The Plan and the Siting Analysis and the Plan have been reviewed and approved by the County Board of Commissioners. The requirements of 40 Code of Federal Regulations (CFR) are part of the County's efforts to obtain federal approval for the expansion of the Facility. The Plan and the Siting Analysis and the Plan have been reviewed and approved by the County Board of Commissioners. The requirements of 40 CFR are part of the County's efforts to obtain federal approval for the expansion of the Facility. The Plan and the Siting Analysis and the Plan have been reviewed and approved by the County Board of Commissioners. The requirements of 40 CFR are part of the County's efforts to obtain federal approval for the expansion of the Facility.

Agenda for the Public Meeting

- 1. Introduction
- 2. The proposed expansion of Hillsborough County Resource Recovery Facility.

**NFL  
 OVERTURE**

Continued From Page 1

han anything else, he would bring a work ethic and leadership qualities to the job that would benefit any organization," said Tilley, now head of Tallahassee public relations and government communications firm.

Executive recruiter Steve McMahan said corporate America typically opts for a square-peg-in-a-square-hole succession strategy — one company's chief executive vacancy might be filled by someone in that same role at a similar company.

But "what's the square peg equivalent of commissioner of the NFL?" asked McMahan, chief sales officer at Kforce Professional Staffing in Tampa. "There isn't one. You end up looking at some unconventional candidates."

The state constitution limits Bush to two terms, and his eight-year tenure ends with the swearing-in of a new governor in January. Publicly, he has said only that he intends to return to his Miami home. Speculation about his future has been intense.

Bush acknowledged to the South Florida Sun-Sentinel on Tuesday that he had a meeting with Patrick Rooney Sr., owner of the Palm Beach Kennel Club racetrack and brother of Pittsburgh Steelers owner Dan Rooney.

Dan Rooney heads the NFL's selection committee in searching for a successor to Paul Tagliabue, who is stepping down as commissioner this summer. Patrick Rooney
