---

Hi Tiffany,

As I explained on the phone we just have two quick changes on what I submitted to you earlier. The proposed feedstock will be **90%** vegetative waste with the remaining 10% being clean woody construction and demolition (C&D) debris and the biogenic fraction of Municipal Solid Waste. This will be a change from our edits to 85% that were in the word documents I sent earlier. We also wanted to point out that the photo labeled as "Figure 6 – Fermentation at the Pilot Plant" is actually a lab fermenter and not what is in use at the pilot facility. The image used on the right in Figure 3 is the fermentation process at the pilot facility.

Thanks,

**Subject:** RE: INEOS PRE-DRAFT Permit

Good Afternoon,

Thank you for this opportunity to comment on the pre-draft permit. Please see INP BioEnergy and CDM's comments and edits in the attached word documents with tracked changes. I have also attached updated outputs from EPA TANKS 4.0.9d with the correct throughput for the product storage tank.

If you have any additional questions please do not hesitate to contact our office.

Thanks,

**Subject:** INEOS PRE-DRAFT Permit

Good Morning,

As we had discussed with INEOS, here is the unofficial, **pre-draft** permit, technical evaluation and appendices for the Indian River County facility air construction permit. In order to stay on our timeline and submit the official intent by the end of July, it would be most beneficial to have comments back by next Friday, July 23. If you have any questions, please contact myself, or Greg DeAngelo.

Thanks!

*Tiffany Miesel*
