Okahumpka, Florida 34762

Re: Request for Additional Information
Project Nos. 0690046-008-AC (PSD-FL-113H) and 0690046-009-AV
Covanta Lake II, Inc., Lake County Resource Recovery Facility
Municipal Solid Waste Combustor (MSWC) Units 1 and 2, Request to Burn International Regulated Garbage

Dear Mr. Main:

On August 24, 2009, we received your application for an air construction permit and a Title V air operation permit revision. A request was made to allow the facility to process international regulated garbage in MSWC Units 1 and 2 and to change the averaging period of the segregated loads weight limitation. The existing Lake County Resource Recovery Facility is located at 3830 Rogers Industrial Park Road in Okahumpka, Lake County, Florida. The application indicates that the project is subject to general preconstruction review pursuant to Rule 62-210.300 of the Florida Administrative Code (F.A.C.). The application is considered to be incomplete. In order to continue processing your application, please provide the additional information requested below. Should your response to any of the requested items require new calculations, please submit the new calculations, assumptions, reference material and appropriate revised pages of the application form.

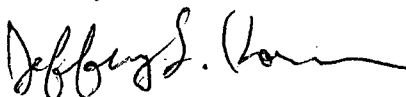

1. You have implied that your facility has had to divert segregated loads of solid waste materials to other processing facilities due to a permit restriction on the percentage of a segregated load that can be processed on a monthly basis. Please identify the segregated loads diverted from your facility over the last 12 months to other processing facilities due to the averaging period for segregated loads weight limitation in your permit.
2. The definition of regulated garbage includes the term "interstate movements", which is assumed to be domestic flights. Since you left this term in the description of "international regulated garbage" (see Appendix B of the application), is it your intention to include regulated garbage from domestic flights as part of this evaluation? If so, please provide how much (tons) of domestic regulated garbage will be processed monthly and annually for each MSWC and describe how this material will be handled (receiving, storage and processing) at this facility. Also, please complete and submit a Segment Description and Rate information part for each MSWC for this waste stream if you intend to process this type of material.
3. Complete and submit a Segment Description and Rate information part that represents the "international regulated garbage" proposed for this project for each MSWC. As stated in EPA's Source Classification Code Manual, EPA 450/4-90-003, specifically under Source Classification Code 1-01-012-01, you are to "specify the waste material", which should be stated as "international regulated garbage combustion" in the Segment Description area. This information is necessary for submitting the Annual Operating Report.
4. In the Addendum to Compliance Agreement, June 2009, the use of a roll-off container is mentioned in paragraph "i." under Process. Will these roll-off containers be rigid leak-proof containers with tight-fitting lids and capable of being locked? If not, please explain.
5. Explain in detail how the operator knows how the municipal solid waste will be comingled with other approved waste to meet the 5% segregated load restriction.

REQUEST FOR ADDITIONAL INFORMATION

The above information is requested pursuant to the following F.A.C. regulations: Rule 62-4.050 (Procedures to Obtain Permits and Other Authorizations; Applications); 62-4.055 (Permit Processing); 62-4.070 (Standards for Issuing or Denying Permits; Issuance; Denial); 62-4.120 (Construction Permits); 62-204.800 (Federal Regulations Adopted by Reference); 62-212.300 (Permits Required); 62-210.370 (Emissions Computations and Reporting); 62-210.900 (Forms and Instructions); 62-212.300 (General Preconstruction review); and 62-212.400 (Preventions of Significant Deterioration). All applications for a Department permit must be certified by a professional engineer registered in the State of Florida pursuant to Rule 62-4.050(3), F.A.C. This requirement also applies to responses to Department requests for additional information of an engineering nature. For any material changes to the application, please include a new certification statement by the authorized representative or responsible official.

We will resume processing your application after receipt of the requested information. You are reminded that Rule 62-4.055(1), F.A.C. requires applicants to respond to requests for information within 90 days or to provide a written request for an additional period of time to submit the information. If you have any questions regarding this matter, please contact the project engineer, Bruce Mitchell, at (850)413-9198.

Sincerely,

Jeffery F. Koerner, Administrator
New Source Review Section
