SUBJ: Correction of Error in Previous Comments
Draft Permit No. 0690046-014-AC/PSD-FL-113I
Lake County Resource Recovery Facility

Dear Mr. Sheplak:

On February 15, 2013 we submitted correspondence to your attention providing comments on Draft Permit No. 0690046-014-AC/PSD-FL-113I. That correspondence contained an error related to the baseline emissions for the pollutant NOx. In particular, we incorrectly stated that the emissions baseline was 478 tons per year. In reviewing the previously submitted Major Source Annual Emissions Fee for calendar years 2011 and 2012, the correct baseline should be 496 tons per year. Accordingly, the new facility-wide not to exceed limit for NOx should be 535 tons per year.

We apologize for any confusion that our error caused. If you have any questions, please do not hesitate to contact me at (352) 365-1611, ext 226.

Sincerely,

A handwritten signature in black ink that reads "Gary Main". The signature is fluid and cursive, with the first name "Gary" and last name "Main" clearly distinguishable.

Gary Main
Facility Manager
Covanta Lake II, Inc.
