Re: FPL Fort Myers Combustion Turbine (CT) Peaker Project  
FDEP Facility 0710002  
Air Construction/PSD Permit Application

Dear Mr. Koerner:

Please find enclosed an Air Construction/PSD Application for the Fort Myers CT Peaker Project (Project) that would replace the generation of 10 existing gas turbines (GTs) with two highly efficient and lower emitting CTs at the Fort Myers Power Plant. Also enclosed is a \$7,500 check (No. 5000367749) for processing a PSD Application.

Applications for three CTs were submitted in July 2013 to FDEP for an Air Construction/PSD Permit for non-greenhouse gases (GHG) and to EPA Region IV for PSD review of GHG (Reference FDEP Project Number 0710002-019-AC/PSD-FL-424.) These applications were withdrawn in December 2013. FPL plans to go forward with two CTs at the Fort Myers Plant to replace the generation of 10 gas turbines. In addition, FPL has selected the CT vendor (General Electric). Two of the existing GTs at the Fort Myers Plant will be retained for black start capability and generation. The black start diesel generators originally contemplated in 2013 will not be part of this application.

We look forward to working with FDEP on this Project. If you have any comments or questions regarding the attached application, please feel free to contact Ken Proctor at (561) 691-7068. You may also contact John Hamp at (561) 691-2894 for technical questions.

Sincerely,  
Florida Power & Light Company
