Re: Title V Air Operation Permit Revision
DRAFT/PROPOSED Permit Project No.: 0830104-006-AV
Revision to Title V Air Operation Permit No.: 0830104-004-AV
A.S.A. Manufacturing, Inc.

Dear Mr. DuPlessis:

One copy of the DRAFT/PROPOSED Permit for a Title V Air Operation Permit Revision for the fiberglass products manufacturing facility located at 14879 SW 111th Street, in Dunnellon, Marion County, is enclosed. The permitting authority's "INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION" and the "PUBLIC NOTICE OF INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION" are also included.

An electronic version of the DRAFT/PROPOSED Permit will be posted on the Division of Air Resource Management's world wide web site for the United States Environmental Protection Agency (USEPA) Region 4 office's review. The web site address is:

<http://www.dep.state.fl.us/air/eproducts/ards/default.asp>

The "PUBLIC NOTICE OF INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION" must be published as soon as possible. Proof of publication, i.e., newspaper affidavit, must be provided to the permitting authority's office within 7 (seven) days of publication pursuant to Rule 62-110.106(5), F.A.C. Failure to publish the notice and provide proof of publication within the allotted time may result in the denial of the permit pursuant to Rule 62-110.106(11), F.A.C.

Please submit any written comments you wish to have considered concerning the permitting authority's proposed action to Mara Grace Nasca, at the above letterhead address. If you have any other questions, please contact the project engineer, Nancy E. Knight, at 813/632-7600 extension 120.

Sincerely,

Mara Grace Nasca
District Air Program Administrator
Southwest District

DRAFT/PROPOSED Permit Project No.: 0830104-006-AV
Revision to Title V Air Operation Permit No.: 0830104-004-AV
Marion County

INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION

The Florida Department of Environmental Protection Southwest District (permitting authority) gives notice of its intent to issue a Title V Air Operation Permit Revision (copy of DRAFT/PROPOSED Permit attached) for the Title V source specified above, for the reasons stated below.

This is a Department-initiated Air Operation Permit Revision for the A.S.A. Manufacturing, Inc., facility located at 14879 SW 111th Street in Dunnellon, Marion County.

The purpose of the revision is to incorporate the revised National Emissions Standards for Hazardous Air Pollutants (NESHAP, also referred to as a MACT standard) for Reinforced Plastic Composites Production, 40 CFR 63 Subpart WWWW, into the facility's Title V operation permit.

The permitting authority has permitting jurisdiction under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210 and 62-213. This source is not exempt from Title V permitting procedures. The permitting authority has determined that a Title V Air Operation Permit Revision is required to commence or continue operations at the described facility.

The permitting authority intends to issue this Title V Air Operation Permit Revision based on the belief that reasonable assurances have been provided to indicate that operation of the source will not adversely impact air quality, and the source will comply with all appropriate provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-213, 62-256, 62-257, 62-281, 62-296, and 62-297, F.A.C.

Pursuant to Sections 403.815 and 403.087, F.S., and Rules 62-110.106 and 62-210.350(3), F.A.C., you (the applicant) are required to publish at your own expense the enclosed "PUBLIC NOTICE OF INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION." The notice shall be published one time only as soon as possible in the legal advertisement section of a newspaper of general circulation in the area affected. For the purpose of these rules, "publication in a newspaper of general circulation in the area affected" means publication in a newspaper meeting the requirements of Sections 50.011 and 50.031, F.S., in the county where the activity is to take place. If you are uncertain that a newspaper meets these requirements, please contact the permitting authority at the address or telephone number listed below. The applicant shall provide proof of publication to the Florida Department of Environmental Protection Southwest District, 13051 N. Telecom Parkway, Temple Terrace, FL 33637-0926 (Telephone: 813/632-7600, Fax: 813/632-7668), within 7 (seven) days of publication pursuant to Rule 62-110.106(5), F.A.C. Failure to publish the notice and provide proof of publication may result in the denial of the permit pursuant to Rule 62-110.106(11), F.A.C.

EPA has agreed to treat the DRAFT Title V Permit as a PROPOSED Title V Permit and to perform its 45-day review provided by the law and regulations concurrently with the public comment period. Although EPA's 45-day review period will be performed concurrently with the public comment period, the deadline for submitting a citizen petition to object to the EPA Administrator will be determined as if EPA's 45-day review period is performed after the public comment period has ended. The FINAL Title V Air Operation Permit Revision will be issued after the conclusion of the 45-day EPA review period so long as no adverse comments are received that results in a different decision or significant change of terms or conditions.

The status regarding EPA's 45-day review of this project and the deadline for submitting a citizen petition can be found at the following website address:

<http://www.epa.gov/region4/air/permits/Florida.htm>

The permitting authority will accept written comments concerning the proposed permit issuance action for a period of 30 (thirty) days from the date of publication of the "PUBLIC NOTICE OF INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION." Written comments should be provided to the permitting authority office. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in this DRAFT/PROPOSED Permit, the permitting authority shall issue a Revised DRAFT Permit and require, if applicable, another Public Notice.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, FL 32399-3000 (Telephone 850/488-9730, Fax: 850/487-4928). Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of this notice of intent, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the permitting authority for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the permitting authority's action is based must contain the following information:

- (a) The name and address of each agency affected and each agency's file or identification number, if known;
- (b) The name, address, and telephone number of the petitioner; the name, address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;
- (c) A statement of how and when each petitioner received notice of the agency action or proposed action;
- (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
- (e) A concise statement of the ultimate facts alleged, as well as the rules and statutes which entitle the petitioner to relief;
- (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and,
- (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the permitting authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the permitting authority's final action may be different from the position taken by it in this notice of intent. Persons whose substantial interests will be affected by any such final decision of the permitting authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation will not be available in this proceeding.

Finally, pursuant to 42 United States Code (U.S.C.) Section 7661d(b)(2), any person may petition the Administrator of the EPA within 60 (sixty) days of the expiration of the Administrator's 45 (forty-five) day review period as established at 42 U.S.C. Section 7661d(b)(1), to object to issuance of any Title V permit. Any petition shall be based only on objections to the Title V permit that were raised with reasonable specificity during the 30 (thirty) day public comment period provided in this notice, unless the petitioner demonstrates to the Administrator of the EPA that it was impracticable to raise such objections within the comment period or unless the grounds for such objection arose after the comment period. Filing of a petition with the Administrator of the EPA does not stay the effective date of any Title V permit properly issued pursuant to the provisions of Chapter 62-213, F.A.C. Petitions filed with the Administrator of EPA must meet the requirements of 42 U.S.C. Section 7661d(b)(2) and must be filed with the Administrator of the EPA at: U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460.

PUBLIC NOTICE OF INTENT TO ISSUE TITLE V AIR OPERATION PERMIT REVISION

Florida Department of Environmental Protection
Southwest District

DRAFT/PROPOSED Permit Project No.: 0830104-006-AV
Revision to Title V Air Operation Permit No. 0830104-004-AV
A.S.A. Manufacturing, Inc.
Dunnellon, Marion County

The Florida Department of Environmental Protection Southwest District (permitting authority) gives notice of its intent to issue a Title V Air Operation Permit Revision to A.S.A. Manufacturing, Inc., for their facility located at 14879 SW 111th Street in Dunnellon, Marion County. This is a revision to Title V Air Operation Permit No. 0830104-004-AV. The permittee's name and address are: A.S.A. Manufacturing, Inc., 14879 SW 111th Street, Dunnellon, FL 34432, to the attention of Mr. Todd DuPlessis, President.

The purpose of this Department-initiated revision is to incorporate the revised National Emissions Standards for Hazardous Air Pollutants (NESHAP, also referred to as a MACT standard) for Reinforced Plastic Composites Production, 40 CFR 63 Subpart WWWW, into the facility's Title V operation permit.

EPA has agreed to treat the DRAFT Title V Permit as a PROPOSED Title V Permit and to perform its 45-day review provided by the law and regulations concurrently with the public comment period. Although EPA's 45-day review period will be performed concurrently with the public comment period, the deadline for submitting a citizen petition to object to the EPA Administrator will be determined as if EPA's 45-day review period is performed after the public comment period has ended. The FINAL Title V Air Operation Permit Revision will be issued after the conclusion of the 45-day EPA review period so long as no adverse comments are received that results in a different decision or significant change of terms or conditions.

The status regarding EPA's 45-day review of this project and the deadline for submitting a citizen petition can be found at the following website address:

<http://www.epa.gov/region4/air/permits/Florida.htm>

The Permitting Authority will accept written comments concerning the DRAFT/PROPOSED Title V Air Operation Permit Revision for a period of thirty (30) days from the date of publication of this Public Notice. Written comments must be post-marked and all facsimile comments must be received by the close of business (5:00 pm), on or before the end of this 30-day period, by the Permitting Authority at 13051 N. Telecom Parkway, Temple Terrace, FL 33637-0926 or facsimile 813/632-7668. As part of his or her comments, any person may also request that the Permitting Authority hold a public meeting on this permitting action. If the Permitting Authority determines there is sufficient interest for a public meeting, it will publish notice of the time, date, and location in the Florida Administrative Weekly (<http://faw.dos.state.fl.us/>) and in a newspaper of general circulation in the area affected by the permitting action. For additional information, contact the Permitting Authority at the above address or phone number. If written comments or comments received at a public meeting result in a significant change to the DRAFT/PROPOSED Permit, the Permitting Authority shall issue a Revised DRAFT Permit and require, if applicable, another Public Notice. All comments filed will be made available for public inspection.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57 of the Florida Statutes (F.S.). The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department of Environmental Protection, 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000 (Telephone: 850/488-9730, Fax: 850/487-4938). Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within fourteen days of publication of the public notice or within fourteen days of receipt of the notice of intent, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the permitting authority for notice of agency

action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the applicable time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code (F.A.C.).

A petition that disputes the material facts on which the permitting authority's action is based must contain the following information:

- (a) The name and address of each agency affected and each agency's file or identification number, if known;
- (b) The name, address and telephone number of the petitioner; name address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how petitioner's substantial rights will be affected by the agency determination;
- (c) A statement of how and when the petitioner received notice of the agency action or proposed action;
- (d) A statement of all disputed issues of material fact. If there are none, the petition must so state;
- (e) A concise statement of the ultimate facts alleged, as well as the rules and statutes which entitle petitioner to relief;
- (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and,
- (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the permitting authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the permitting authority's final action may be different from the position taken by it in this notice of intent. Persons whose substantial interests will be affected by any such final decision of the permitting authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation is not available for this proceeding.

In addition to the above, pursuant to 42 United States Code (U.S.C.) Section 7661d(b)(2), any person may petition the Administrator of the EPA within 60 (sixty) days of the expiration of the Administrator's 45 (forty-five) day review period as established at 42 U.S.C. Section 7661d(b)(1), to object to issuance of any Title V permit. Any petition shall be based only on objections to the Title V permit that were raised with reasonable specificity during the 30 (thirty) day public comment period provided in this notice, unless the petitioner demonstrates to the Administrator of the EPA that it was impracticable to raise such objections within the comment period or unless the grounds for such objection arose after the comment period. Filing of a petition with the Administrator of the EPA does not stay the effective date of any Title V permit properly issued pursuant to the provisions of Chapter 62-213, F.A.C. Petitions filed with the Administrator of EPA must meet the requirements of 42 U.S.C. Section 7661d(b)(2) and must be filed with the Administrator of the EPA at: U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460.

A complete project file is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Permitting Authority:

DRAFT/PROPOSED

Permit No.: 0830104-006-AV
Facility ID No.: 0830104
SIC No(s): 30, 3089
Project: Fiberglass Products Manufacturing

This permit revision is being issued for the purpose of incorporating the revised NESHAP (MACT) 40 CFR 63 Subpart WWWW and other administrative changes into the permit for the operation of A.S.A. Manufacturing, Inc. This permit is for the operation of a fiberglass products manufacturing facility. This facility is located at 14879 SW 111th Street, Dunnellon, Marion County; UTM Coordinates: Zone 17, 368.31 km East and 3215.45 km North; and, Latitude: 29°03'44" North and Longitude: 82°21' 59" West.

This Title V Air Operation Permit revision is issued under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210, and 62-213. The above named permittee is hereby authorized to operate the facility shown on the application and approved drawing(s), plans, and other documents, attached hereto or on file with the permitting authority, in accordance with the terms and conditions of this permit.

Referenced attachments made a part of this permit:

- Appendix I-1, List of Insignificant Emissions Units and/or Activities
- APPENDIX TV-46, TITLE V CONDITIONS (version dated 02/12/2006/23/06)

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

Section I. Facility Information.
Subsection A. Facility Description,

The facility is a fiberglass products manufacturing facility that consists of production of fiberglass drains/sumps for swimming pools, fiberglass wall panels for water parks and other miscellaneous fiberglass products. The facility is classified as a Title V facility, since it is major for hazardous air pollutants and subject to the requirements of 40 CFR 63, Subpart WWWW - National Emission Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production as an existing facility.

Also included in this permit are miscellaneous insignificant emissions units and/or activities.

Based on the initial Title V permit application received October 4, 2004, this facility is a major source of hazardous air pollutants (HAPs).

Compliance Assurance Monitoring (CAM) is not applicable at this facility, since there are no control devices.

Subsection B. Summary of Emissions Unit ID No(s). and Brief Description(s).

<u>E.U. ID No.</u>	<u>Brief Description</u>
001	Fiberglass Products Manufacturing

Please reference the Facility Name, Permit No., Facility ID No., and appropriate Emissions Unit(s) ID No(s). on all correspondence, test report submittals, applications, etc.

Subsection C. Relevant Documents.

The documents listed below are not a part of this permit; however, they are specifically related to this permitting action.

These documents are provided to the permittee for information purposes only:
Appendix A-1, Abbreviations, Acronyms, Citations, and Identification Numbers
Appendix H-1, Permit History
Statement of Basis

These documents are on file with the permitting authority:
Initial Title V Permit Application received: October 4, 2004
Additional Information Request dated: November 5, 2004
Additional Information Response received: December 20, 2004
A.S.A. Manufacturing, Inc.: NESHAP Applicable Requirements response letter dated 03/05/07

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

(Specific Condition Effective Date Note: Unless otherwise noted, the effective date of all conditions in this permit is 07/31/05, the original Initial Effective Date of permit 0830104-004-AV, as shown on page 1 of this permit.)

Section II. Facility-wide Conditions.

The following conditions apply facility-wide:

1. APPENDIX TV-46, TITLE V CONDITIONS, is a part of this permit.

[Effective Date xx/xx/07]

{Permitting note: APPENDIX TV-46, TITLE V CONDITIONS, is distributed to the permittee only. Other persons requesting copies of these conditions shall be provided a copy when requested or otherwise appropriate.}

2. General Pollutant Emission Limiting Standards. Objectionable Odor Prohibited. No person shall cause, suffer, allow, or permit the discharge of air pollutants, which cause or contribute to an objectionable odor. Objectionable Odor is defined as, "Any odor present in the outdoor atmosphere which by itself or in combination with other odors, is or may be harmful or injurious to human health or welfare, which unreasonably interferes with the comfortable use and enjoyment of life or property, or which creates a nuisance."

[Rules 62-296.320(2) and 62-210.200(181), F.A.C.; construction permit 0830104-003-AC; Effective date xx/xx/07]

3. General Particulate Emission Limiting Standards. General Visible Emissions Standard.

Except for emissions units that are subject to a particulate matter or opacity limit set forth or established by rule and reflected by conditions in this permit, no person shall cause, let, permit, suffer or allow to be discharged into the atmosphere the emissions of air pollutants from any activity, the density of which is equal to or greater than that designated as Number 1 on the Ringelmann Chart (20 percent opacity). EPA Method 9 is the method of compliance pursuant to Chapter 62-297, F.A.C.

[Rules 62-296.320(4)(b)1. & 4., F.A.C.]

4. Prevention of Accidental Releases (Section 112(r) of CAA).

- A. The permittee shall submit its Risk Management Plan (RMP) to the Chemical Emergency Preparedness and Prevention Office (CEPPO) RMP Reporting Center when, and if, such requirement becomes applicable. Any Risk Management Plans, original submittals, revisions or updates to submittals, should be sent to:

RMP Reporting Center
Post Office Box 1515
Lanham-Seabrook, MD 20703-1515
Telephone: 301/429-5018

and,

- B. The permittee shall submit to the permitting authority Title V certification forms or a compliance schedule in accordance with Rule 62-213.440(2), F.A.C. [40 CFR 68]

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV

PROJECT: Fiberglass Products Manufacturing

5. Insignificant Emissions Units and/or Activities. Appendix I-1: List of Insignificant Emissions Units and/or Activities, is a part of this permit.

[Rules 62-213.440(1), 62-213.430(6) and 62-4.040(1)(b), F.A.C.]

6. General Pollutant Emission Limiting Standards. Volatile Organic Compounds (VOC) Emissions or Organic Solvents (OS) Emissions. The permittee shall allow no person to store, pump, handle, process, load, unload or use in any process or installation, volatile organic compounds (VOC) or organic solvents (OS) without applying known and existing vapor emission control devices or systems deemed necessary and ordered by the Department. The permittee shall comply with the following:

- A. Resin/gel coating activities shall be conducted inside the manufactured/shop building, with the exception of manual touch-up activities.
- B. All equipment, pipes, hoses, lids, fittings, etc., shall be operated/maintained in such a manner as to minimize leaks, fugitive emissions, and spills of solvent materials.
- C. All solvent from solvent washings (equipment clean-up) shall be directed into containers that prevent evaporation in the atmosphere.
- D. All materials containing VOC/OS's shall be stored in closed containers and/or in small automatic closing safety cans.
- E. The two axial flow exhaust fans in the three sided booth shall have no device that restricts the exhaust exiting the stacks, i.e., rain cap.
- F. The wall mounted exhaust fans located on both ends of the manufactured/shop building shall have no device that restricts the exhaust exiting the stack, i.e., rain cap.
- G. An exhaust fan shall be operating during any time materials containing VOCs and/or Styrene is being used in the section (area of the building) being exhausted by that fan. The fan shall remain operating for at least 1 hour after usage of such material(s).
- H. All exhaust fan intakes shall not be obstructed, except for fiber filters that are used.
- I. Tightly cover or close all VOC containers when they are not in use.
- J. Prevent excessive air turbulence across exposed VOC/OS.
- K. Immediately confine and clean up VOC/OS spills and make sure wastes are placed in closed containers for reuse, recycling or proper disposal.

[Rule 62-296.320(1)(a), F.A.C.; and, ~~construction permit~~ 0830104-003-AC; ~~Effective date xx/xx/07~~]

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

7. Emissions of Unconfined Particulate Matter. Pursuant to Rules 62-296.320(4)(c)1., 3., & 4., F.A.C., reasonable precautions to prevent emissions of unconfined particulate matter at this facility include the following requirements (see Condition No. 57 of Appendix TV-46, Title V Conditions):

- A. Application of water to paved and unpaved areas accommodating vehicular traffic, as necessary.
- B. Daily remove particulate matter from buildings or work areas. The collected particulate shall be transferred to a trash bin in a manner so that it will not become airborne.
- C. Enclosure or covering of activities or equipment where necessary.
- D. Filters shall be used on all the three sided booth exhaust fans that vent air to the atmosphere. The filters shall be changed (replaced) as necessary to ensure proper ventilation.
- E. Unconfined particulate emissions from trimming and other similar activities such as: cutting, shaping, and sanding operations performed by hand tools and tabletop equipment shall be controlled by normal "good housekeeping" procedures.

[Rule 62-296.320(4)(c)2., F.A.C.; and, construction permit 0830104-003-AC, Effective Date xx/xx/07]

8. As an indicator that the precautions to control unconfined particulate emission are adequate, visible emissions from each building, shed, and at the property line shall not exceed 5% opacity. If this value is exceeded it will not be considered a violation in and of itself, but may be a violation of the precautions stated above and serve as justification to the Department to require additional controls or work practices.

[Rule 62-4.070(3), F.A.C.; and construction permit 0830104-003-AC, Effective date xx/xx/07]

9. Special Compliance Tests - When the Department, after investigation, has good reason (such as complaints, increased visible emissions or questionable maintenance of control equipment) to believe that any applicable emission standard contained in a Department rule or in a permit issued pursuant to those rules is being violated, it shall require the owner or operator of the emissions unit to conduct compliance tests which identify the nature and quantity of pollutant emissions from the emissions unit and to provide a report on the results of said tests to the Department. [Rule 62-297.310(7)(b), F.A.C.]

10. When appropriate, any recording, monitoring, or reporting requirements that are time-specific shall be in accordance with the effective date of the permit, which defines day one.

[Rule 62-213.440, F.A.C.]

11. Statement of Compliance. The annual statement of compliance pursuant to Rule 62-213.440(3)(a)2., F.A.C., shall be submitted to this office and the EPA within 60 (sixty) days after the end of the calendar year using DEP Form No. 62-213.900(7), F.A.C.

[Rules 62-213.440(3) and 62-213.900, F.A.C.]

{Permitting Notes: This condition implements the requirements of Rules 62-213.440(3)(a)2. and 3., F.A.C. (see Condition No. 51 of Appendix TV-46, Title V Conditions). See additional semiannual monitoring report requirement in 40 CFR 63, Subpart WWWW §63.5910}

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV

PROJECT: Fiberglass Products Manufacturing

Section III. Emissions Unit(s) and Conditions.

Subsection A. This section addresses the following emissions unit(s).

<u>E.U. ID No.</u>	<u>Brief Description</u>
001	Fiberglass Products Manufacturing

Fiberglass drains/sumps are manufactured in a three-sided booth which is located within the manufacturing building. Molds are prepared using wax-like paste as a releasing agent. Gel coat and resin are applied to the molds using hand layout as well as chop gun (spray) application. Acetone is used for chop gun flushing and cleaning of tools. ASA uses a non-atomized chop gun for reduced emissions. These materials are applied within the booth and emissions are exhausted by means of two axial flow exhaust fans, which discharge horizontally from the manufacturing building through gravity louvers. The booth is equipped with a Pre-Baffle System designed to reduce particulate matter emissions. The drains/sumps are then transferred to a covered area outside the manufacturing building where trimming and grinding of parts is performed using hand held electric tools. Touch-up of the gel coat using a small brush is also performed.

Fiberglass wall panels are manufactured on vacuum tables which are located in the open shop area of the manufacturing building. One coat of vinyl ester resin and three coats of general purpose resin are applied by hand, (I.E. rollers or brush). A small amount of styrene is also applied by hand for cleaning and softening of the wall panels. All emissions are fugitive emissions and exhaust the building through two roll-up doors on either end of the building. There are two exhaust fans located directly over each roll-up door, two roof mounted exhaust fans and roof vents located along the peak of the roof. The wall panels are transferred to an outside covered area where cutting, drilling and polishing is performed using hand held electric tools.

Based on the processes involved in manufacturing fiberglass products, Styrene is considered the highest possible individual hazardous air pollutant (HAP) that can be emitted. Thus, the VOC and Styrene emission limitations will ensure that no individual HAP emission or total of all HAP emissions will exceed the Title V permitting thresholds.

{Permitting Notes: This emission unit is regulated under: 40 CFR 63, Subpart WWWW – National Emissions Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production. Compliance Assurance Monitoring (CAM) is not applicable for this emission unit, since there is no control device.}

The following specific conditions apply to the emissions unit(s) listed above:

Essential Potential to Emit (PTE) Parameters

A.1. Hours of Operation: This emissions unit is allowed to operate continuously, i.e., 8,760 hours/year. [Rules 62-4.160(2), 62-210.200(PTE), F.A.C. and construction permit 0830104-003-AC; Effective date xx/xx/07]

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

A.2. Operation Limitations: The permittee shall comply with the following:

- A. The two axial flow exhaust fans in the three sided booth shall have no device that restricts the exhaust exiting the stacks, i.e., rain cap.
- B. The wall mounted exhaust fans located on both ends of the manufactured/shop building shall have no device that restricts the exhaust exiting the stack, i.e., rain cap.
- C. All exhaust fan intakes shall not be obstructed, except for fiber filters that are used.

[Rule 62-296.320(1), F.A.C.; 0830104-003-AC]

Emission Limitations and Standards

A.3. In lieu of establishing this emission unit's potential to emit by limiting material usage, throughput, or production, emissions shall not exceed the following:

- A. 34.1 tons per any consecutive 12-month period of individual hazardous air pollutants (HAPs)
- B. 35.8 tons per any consecutive 12-month period of total hazardous air pollutants (HAPs)
- C. 48.7 tons per any consecutive 12-month period of total volatile organic compounds (VOCs), which includes styrene

[Rules 62-4.050, 62-296.320(1), and 62-210.200(PTE), F.A.C.; and 0830104-003-AC]

Recordkeeping Requirements

A.4. In order to document compliance with Condition Nos. 7.D., 24 in TV-46, and A.3, the permittee shall keep monthly logs (electronic logs are allowed) for the facility. The logs may be based on the beginning and ending inventories, deliveries, shipments, etc. Once implemented, the chosen option shall not change without prior written approval of the Department. Implementation of the monthly logs (recordkeeping system) shall begin upon startup of the facility. Note, if any month results in total HAPs, and/or total VOCs and or Styrene emissions being within 10% of its associated allowable emission limit for the prior consecutive 12-month period, the monthly log required below shall be then kept daily. The daily logs shall include a cumulative total to demonstrate compliance with the emission limitations. At a minimum, the logs shall contain the following:

- A. For Specific Condition No. 7.D., a log documenting the date each fan's filter was changed. In addition to the date, be sure each fan's log includes the facility name, signature of the person changing the filter, and Emission Unit ID (0830104 001).

The following are requirements per Specific Condition Nos. 24 in TV-46 and A.3:

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

A.4. (continued)

- B. Each log shall include the Facility Name, Facility ID No., Emission Unit ID (0830104 001) and description.
- C. Month, Year and method used for records.
- D. Identify and quantify each resin, coating, solvent, chemical, etc. used at the facility that contains Styrene and/or VOC emissions, per application method. Usage of materials may be based upon an inventory at the beginning of the month, receipt of material during the month and inventory of the materials at the end of the month.
- E. Show the appropriate emission factor(s) along with the application method(s) used to determine Styrene and/or VOC emissions.
- F. The total tons of Styrene emissions for the month.
- G. The total tons of VOC (including Styrene) emissions for the month.
- H. The total tons of Styrene emissions for the most recent consecutive 12-month period.
- I. The total tons of VOC (including Styrene) emissions for the most recent consecutive 12-month period.
- J. Documentation of the HAP emission calculation shall be determined by using the emission factors in the Table 1 of 40 CFR Part 63, Subpart WWWW or Unified Emission Factor for Open Molding of Composites (UEF) Table. The current calculation shall use the formula:

$$\text{Emissions}_{\text{styrene}} \text{ tons} = ((\chi \text{ tons of resin or gel coat}) \times (\text{EF} * \text{lb/ton})) / 2000 \text{ lbs/ton}$$

*EF = the appropriate emission factor from 40 CFR 63, Subpart WWWW, Table 1 (See Attachment 1) or Unified Emission Factors for Open Molding of Composites, UEF Table (See Attachment 2). All applicable terms, conditions, and definitions, in regards to Table 1 apply, such as:

Atomized mechanical application means application of resin or gel coat with spray equipment that separates the liquid into a fine mist. This fine mist may be created by forcing the liquid under high pressure through an elliptical orifice, bombarding a liquid stream with directed air jets, or a combination of these techniques.

Nonatomized mechanical application means the use of application tools other than brushes to apply resin and gel coat where the application tool has documentation provided by its manufacturer or user that this design of the application tool has been organic HAP emissions tested, and the test results showed that use of this application tool results in organic HAP emissions that are no greater than the organic HAP emissions predicted by the applicable

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

A.4.J. (continued)

nonatomized application equation(s) in Table 1 to this subpart. In addition, the device must be operated according to the manufacturer's directions, including instructions to prevent the operation of the device at excessive spray pressures. Examples of nonatomized application include flow coaters, pressure fed rollers, and fluid impingement spray guns.

- K. Documentation of the VOC used shall be determined by a mass balance method, or appropriate emission factors.
1. Each log shall have the appropriate footnotes listing emission factors used in calculation.
 2. Each log, where applicable, shall have attached the documentation for all chemicals removed from the facility if the permittee seeks emission credits for the wastes.
 3. The emission factors used to calculate HAP and VOC emissions for the logs shall be updated upon receiving more accurate emission data, such as updates to Subpart WWWW, AP-42, UEF Table, or other references or methods approved by the Department.

Documentation of each chemical reclaimed will use a mass balance method to determine usage/emissions (amount used minus amount collected for disposal or recycle). Supporting documentation such as Styrene/HAP/VOC content, Styrene/HAP/VOC emission factors used, MSDS sheets, purchase orders, "As Supplied" data sheets, etc. shall be kept for each chemical and associated products, which includes sufficient information to determine emissions. The monthly logs shall be completed within 30 days after the end of each month. Daily logs (if required) shall be completed within 3 business days.

[Rule 62-4.070(3), F.A.C.; construction permit 0830104-003-AC, Effective Date xx/xx/07]

Test Methods and Procedures

A.5. Other Tests. If the Department of Environmental Protection has reason to believe that any applicable emission standard is being violated, the Department may require the permittee to conduct compliance tests which identify the nature and quantity of emissions and to provide a report on the results of the tests. [Rule 62-297.310(7)(b), F.A.C.]

A.6. Excess Emissions: Excess Emissions which are caused entirely or in part by poor maintenance, poor operation, or any other equipment or process failure which may reasonably be prevented during startup, shutdown, or malfunction shall be prohibited. [Rule 62-210.700(4), F.A.C.]

{Permitting note: The Excess Emissions Rule at Rule 62-210.700, F.A.C., cannot vary any requirement of a NESHAPS provision.}

A.7. Process Changes: The permittee shall report any proposed process changes, including, but not limited to, (a) any proposed significant change of VOC/OS species, or (b) any proposed increase in the production rate, to the Air Programs of the Southwest District Office of the Department for proper processing. Any physical change in, change in the method of operation of, or addition to a stationary source or facility, which increases the actual emissions of any air pollutant may be considered a "Modification". [Rule 62-210.300, F.A.C.]

PERMITTEE:
A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

PERMIT No.: 0830104-006-AV
PROJECT: Fiberglass Products Manufacturing

A.8. Record Retention: All recordkeeping information, supporting documentation, monitoring data, and all compliance test information required by this permit shall be maintained on site for a minimum of the most recent five (5) year period and shall be made available to the Florida Department of Environmental Protection (the Department) upon request. [Rule 62-4.070(3),F.A.C.]

MACT - 40 CFR 63, Subparts A and WWWW, Requirements

~~A.9. As a major source of HAP emissions, the source will be subject to the emission limiting standards and work practice requirements contained in Tables 3 and 4 of the promulgated MACT Standard for 40 CFR Part 63, Subpart WWWW— National Emissions Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production, and shall comply with these standards and requirements by compliance date three years from permit issuance. The 40 CFR Part 63, Subpart WWWW applicable to this facility is attached as a part of this permit. (See Attachment 1) [Rules 62-204.800(11), 62-212.300(1), and 62-213.400, F.A.C.]~~

A.9. This emission unit shall comply with the applicable provisions* of 40 CFR 63, Subpart WWWW - National Emission Standards for Hazardous Air Pollutants (NESHAP): Reinforced Plastic Composites Production, as adopted and incorporated by reference in Rule 62-204.800(11)(b), F.A.C. These provisions are shown in their entirety in ATTACHMENT 1, which is a part of this permit. ATTACHMENT 1 includes the applicable provisions of 40 CFR 63, Subpart A – General Provisions. This ATTACHMENT 1 replaces the previous ATTACHMENT 1 and includes the revisions made to 40 CFR 63, Subpart WWWW in the August 25, 2005 Federal Register and the revisions made to 40 CFR 63, Subparts A and WWWW in the April 20, 2006 Federal Register. Note, there is currently no centrifugal casting, continuous lamination/continuous casting, polymer casting, closed-molding, SMC Manufacturing, BMC Manufacturing/mixing, filament winding, or pultrusion operations performed at this facility. If at a future date, the permittee decides to add any of these operations, or use an add-on control device, the permittee may be required to obtain a construction permit and/or Title V permit revision.

* The following applicability references are partially based upon a letter dated March 5, 2007, from the A.S.A. Manufacturing, Inc., General Manager, Ms. Julie Zurich. Therefore, any change in operations may change the applicable provisions.

Appendix I-1, List of Insignificant Emissions Units and/or Activities.

A.S.A. Manufacturing, Inc.

DRAFT/PROPOSED

Permit No.: 0830104-006-AV

Facility ID No.: 0830104

The facilities, emissions units, or pollutant-emitting activities listed in Rule 62-210.300(3)(a), F.A.C., Categorical Exemptions, or that meet the criteria specified in Rule 62-210.300(3)(b)1., F.A.C., Generic Emissions Unit Exemption, are exempt from the permitting requirements of Chapters 62-210 and 62-4, F.A.C.; provided, however, that exempt emissions units shall be subject to any applicable emission limiting standards and the emissions from exempt emissions units or activities shall be considered in determining the potential emissions of the facility containing such emissions units. Emissions units and pollutant-emitting activities exempt from permitting under Rules 62-210.300(3)(a) and (b)1., F.A.C., shall not be exempt from the permitting requirements of Chapter 62-213, F.A.C., if they are contained within a Title V source; however, such emissions units and activities shall be considered insignificant for Title V purposes provided they also meet the criteria of Rule 62-213.430(6)(b), F.A.C. No emissions unit shall be entitled to an exemption from permitting under Rules 62.210.300(3)(a) and (b)1., F.A.C., if its emissions, in combination with the emissions of other units and activities at the facility, would cause the facility to emit or have the potential to emit any pollutant in such amount as to make the facility a Title V source.

The below listed emissions units and/or activities are considered insignificant pursuant to Rule 62-213.430(6), F.A.C.

Brief Description of Emissions Unit and/or Activities

1. Manually operated equipment used for trimming, grinding, cutting, drilling and polishing operations
2. Woodworking shop for constructing pallets for shipping purposes
3. Propane-fueled forklift operations

APPENDIX SS-1, STACK SAMPLING FACILITIES (version dated 10/07/96)

Stack Sampling Facilities Provided by the Owner of an Emissions Unit. This section describes the minimum requirements for stack sampling facilities that are necessary to sample point emissions units. Sampling facilities include sampling ports, work platforms, access to work platforms, electrical power, and sampling equipment support. Emissions units must provide these facilities at their expense. All stack sampling facilities must meet any Occupational Safety and Health Administration (OSHA) Safety and Health Standards described in 29 CFR Part 1910, Subparts D and E.

(a) Permanent Test Facilities. The owner or operator of an emissions unit for which a compliance test, other than a visible emissions test, is required on at least an annual basis, shall install and maintain permanent stack sampling facilities.

(b) Temporary Test Facilities. The owner or operator of an emissions unit that is not required to conduct a compliance test on at least an annual basis may use permanent or temporary stack sampling facilities. If the owner chooses to use temporary sampling facilities on an emissions unit, and the Department elects to test the unit, such temporary facilities shall be installed on the emissions unit within 5 days of a request by the Department and remain on the emissions unit until the test is completed.

(c) Sampling Ports.

1. All sampling ports shall have a minimum inside diameter of 3 inches.
2. The ports shall be capable of being sealed when not in use.
3. The sampling ports shall be located in the stack at least 2 stack diameters or equivalent diameters downstream and at least 0.5 stack diameter or equivalent diameter upstream from any fan, bend, constriction or other flow disturbance.

4. For emissions units for which a complete application to construct has been filed prior to December 1, 1980, at least two sampling ports, 90 degrees apart, shall be installed at each sampling location on all circular stacks that have an outside diameter of 15 feet or less. For stacks with a larger diameter, four sampling ports, each 90 degrees apart, shall be installed. For emissions units for which a complete application to construct is filed on or after December 1, 1980, at least two sampling ports, 90 degrees apart, shall be installed at each sampling location on all circular stacks that have an outside diameter of 10 feet or less. For stacks with larger diameters, four sampling ports, each 90 degrees apart, shall be installed. On horizontal circular ducts, the ports shall be located so that the probe can enter the stack vertically, horizontally or at a 45 degree angle.

5. On rectangular ducts, the cross sectional area shall be divided into the number of equal areas in accordance with EPA Method 1. Sampling ports shall be provided which allow access to each sampling point. The ports shall be located so that the probe can be inserted perpendicular to the gas flow.

(d) Work Platforms.

1. Minimum size of the working platform shall be 24 square feet in area. Platforms shall be at least 3 feet wide.

2. On circular stacks with 2 sampling ports, the platform shall extend at least 110 degrees around the stack.

3. On circular stacks with more than two sampling ports, the work platform shall extend 360 degrees around the stack.

4. All platforms shall be equipped with an adequate safety rail (ropes are not acceptable), toeboard, and hinged floor-opening cover if ladder access is used to reach the platform. The safety rail directly in line with the sampling ports shall be removable so that no obstruction exists in an area 14 inches below each sample port and 6 inches on either side of the sampling port.

APPENDIX SS-1, STACK SAMPLING FACILITIES (version dated 10/07/96)
(continued)

(e) Access to Work Platform.

1. Ladders to the work platform exceeding 15 feet in length shall have safety cages or fall arresters with a minimum of 3 compatible safety belts available for use by sampling personnel.
2. Walkways over free-fall areas shall be equipped with safety rails and toeboards.

(f) Electrical Power.

1. A minimum of two 120-volt AC, 20-amp outlets shall be provided at the sampling platform within 20 feet of each sampling port.
2. If extension cords are used to provide the electrical power, they shall be kept on the plant's property and be available immediately upon request by sampling personnel.

(g) Sampling Equipment Support.

1. A three-quarter inch eyebolt and an angle bracket shall be attached directly above each port on vertical stacks and above each row of sampling ports on the sides of horizontal ducts.
 - a. The bracket shall be a standard 3 inch x 3 inch x one-quarter inch equal-legs bracket which is 1 and one-half inches wide. A hole that is one-half inch in diameter shall be drilled through the exact center of the horizontal portion of the bracket. The horizontal portion of the bracket shall be located 14 inches above the centerline of the sampling port.
 - b. A three-eighth inch bolt which protrudes 2 inches from the stack may be substituted for the required bracket. The bolt shall be located 15 and one-half inches above the centerline of the sampling port.
 - c. The three-quarter inch eyebolt shall be capable of supporting a 500 pound working load. For stacks that are less than 12 feet in diameter, the eyebolt shall be located 48 inches above the horizontal portion of the angle bracket. For stacks that are greater than or equal to 12 feet in diameter, the eyebolt shall be located 60 inches above the horizontal portion of the angle bracket. If the eyebolt is more than 120 inches above the platform, a length of chain shall be attached to it to bring the free end of the chain to within safe reach from the platform.
2. A complete monorail or dualrail arrangement may be substituted for the eyebolt and bracket.
3. When the sample ports are located in the top of a horizontal duct, a frame shall be provided above the port to allow the sample probe to be secured during the test.

[Rule 62-297.310(6), F.A.C.]

Unified Emission Factors for Open Molding of Composites

July 23, 2001

Emission Rate in Pounds of Styrene Emitted per Ton of Resin or Gelcoat Processed

Styrene content in resin/gelcoat, % ⁽¹⁾	<33 ⁽²⁾	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	>50 ⁽²⁾

Covered-Cure after Roll-Out	Non-VSR process emission factor [listed above] x (0.80 for Manual <or> 0.85 for Mechanical)																			
Covered-Cure without Roll-Out	Non-VSR process emission factor [listed above] x (0.50 for Manual <or> 0.55 for Mechanical)																			

Emission Rate in Pounds of Methyl Methacrylate Emitted per Ton of Gelcoat Processed

MMA content in gelcoat, % ⁽⁶⁾	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	≥20
Gel coat application ⁽⁷⁾	15	30	45	60	75	90	105	120	135	150	165	180	195	210	225	240	255	270	285	0.75 x %MMA x 2000

Notes

- 1 Including styrene monomer content as supplied, plus any extra styrene monomer added by the molder, but before addition of other additives such as powders, fillers, glass,...etc.
- 2 Formulas for materials with styrene content < 33% are based on the emission rate at 33% (constant emission factor expressed as percent of available styrene), and for styrene content > 50% on the emission rate based on the extrapolated factor equations; these are not based on test data but are believed to be conservative estimates. The value for "% styrene" in the formulas should be input as a fraction. For example, use the input value 0.30 for a resin with 30% styrene content by wt.
- 3 The VSR reduction factor is determined by testing each resin/suppressant formulation according to the procedures detailed in the *CFA Vapor Suppressant Effectiveness Test*.
- 4 SEE the *CFA Controlled Spray Handbook* for a detailed description of the controlled spray procedures.
- 5 The effect of vapor suppressants on emissions from filament winding operations is based on the *Dow Filament Winding Emissions Study*.
- 6 Including MMA monomer content as supplied, plus any extra MMA monomer added by the molder, but before addition of other additives such as powders, fillers, glass,...etc.
- 7 Based on gelcoat data from *NMMA Emission Study*.
- 8 SEE the July 17, 2001 EECS report *Emission Factors for Non-Atomized Application of Gel Coats used in the Open Molding of Composites* for a detailed description of the non-atomized gelcoat testing.
- 9 Use the equation ((0.4506 x %styrene) - 0.0505) x 2000 for gelcoats with styrene contents between 19% and 32% by wt.; use the equation 0.185 x %styrene x 2000 for gelcoats with less than 19% styrene content by wt.

APPENDIX A-1, ABBREVIATIONS, ACRONYMS, CITATIONS, AND IDENTIFICATION NUMBERS (version dated 2/5/97)

Abbreviations and Acronyms:

°F: Degrees Fahrenheit
BACT: Best Available Control Technology
CFR: Code of Federal Regulations
DEP: State of Florida, Department of Environmental Protection
DARM: Division of Air Resource Management
EPA: United States Environmental Protection Agency
F.A.C.: Florida Administrative Code
F.S.: Florida Statute
ISO: International Standards Organization; ISO refers to those conditions at 288 degree Kelvin, 60 percent relative humidity, and 101.3 kilopascals pressure.
LAT: Latitude
LONG: Longitude
MMBtu: million British thermal units
MW: Megawatt
ORIS: Office of Regulatory Information Systems
SOA: Specific Operating Agreement
UTM: Universal Transverse Mercator

Citatio

ns:

The following examples illustrate the methods used in this permit to abbreviate and cite the references of rules, regulations, permit numbers, and ID numbers.

Code of Federal Regulations:

Example: [40 CFR 60.334]

Where:	40	reference to	Title 40
	CFR	reference to	Code of Federal Regulations
	60	reference to	Part 60
	60.334	reference to	Regulation 60.334

Florida Administrative Code (F.A.C.) Rules:

Example: [Rule 62-213, F.A.C.]

Where:	62	reference to	Title 62
	62-213	reference to	Chapter 62-213
	62-213.205	reference to	Rule 62-213.205, F.A.C.

Identification Numbers:

Facility Identification (ID) Number:

**APPENDIX A-1, ABBREVIATIONS, ACRONYMS, CITATIONS, AND
IDENTIFICATION NUMBERS
(continued)**

Example: Facility ID No.: 1050221

Where:

105 = 3-digit number code identifying the facility is located in Polk County
0221 = 4-digit number assigned by state database.

Permit Numbers:

Example: 1050221-002-AV, or
1050221-001-AC

Where:

AC = Air Construction Permit
AV = Air Operation Permit (Title V Source)
105 = 3-digit number code identifying the facility is located in Polk
County
0221 = 4-digit number assigned by permit tracking database
001 or 002 = 3-digit sequential project number assigned by permit
tracking database

Example: PSD-FL-185
PA95-01
AC53-208321

Where:

PSD = Prevention of Significant Deterioration Permit
PA = Power Plant Siting Act Permit
AC = old Air Construction Permit numbering

STATEMENT OF BASIS

ASA Manufacturing, Inc.
Facility ID No.: 0830104
Marion County

Title V Air Operation Permit Revision
DRAFT/PROPOSED Permit No.: 0830104-006-AV

The initial Title V Air Operation Permit for this facility was issued/effective on July 31, 2005. An Administrative Correction to change the renewal application due date was effective on September 30, 2005. This Title V operation permit revision is issued under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210 and 62-213. The above named permittee is hereby authorized to operate the facility shown on the application and approved drawing(s), plans, and other documents, attached hereto or on file with the permitting authority, in accordance with the terms and conditions of this permit.

The subject of this Department-initiated permit revision is to incorporate the revised NESHAP (MACT) 40 CFR 63 Subpart WWWW into the Title V permit.

The facility has one emission unit (Emission Unit ID No. 001) that consists of production of fiberglass drains/sumps for swimming pools, fiberglass wall panels for water parks and other miscellaneous fiberglass products inside a manufactured building.

Emission Unit ID No. 001 is limited to emit no more than 34.1 tons of styrene, 35.8 tons of total Hazardous Air Pollutants (HAPs) and 48.7 tons of total volatile organic compounds (VOCs) per any consecutive 12 month period, respectively. Compliance with these emission limitations is demonstrated by recordkeeping.

There are 2 stacks to disperse emissions and they each have an allowable minimum volumetric flow rate. Compliance with the volumetric flow rates is demonstrated by conducting EPA Method Nos. 1 and 2 testing on each stack each year.

Based on the initial Title V Air Operation Permit application received October 4, 2004, this facility is a major source of hazardous air pollutants (HAPs).

The reinforced fiberglass products manufacturing activities at this facility are regulated by 40 CFR 63 Subpart WWWW - National Emissions Standards for Reinforced Plastic Composites Production), which is adopted and incorporated by reference in Rule 62-204.800, F.A.C.

Also included in this permit are miscellaneous insignificant emissions units and/or activities.

Compliance Assurance Monitoring (CAM) is not applicable at this facility, since there are no control devices.

P.E. CERTIFICATE STATEMENT

PERMITTEE

A.S.A. MFG, Inc.

Draft Air Permit No. 0830104-006-AV

Project Type: AV02

Permit Description: Title V revision to incorporated revised MACT Subpart WWWW requirements.

I HEREBY CERTIFY that the air pollution control engineering features described in the above referenced application and subject to the proposed permit conditions provide reasonable assurance of compliance with applicable provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Chapters 62-4 and 62-204 through 62-297. However, I have not evaluated and I do not certify aspects of the proposal outside of my area of expertise (including, but not limited to, the electrical, mechanical, structural, hydrological and meteorological features).
