Danny,

I was at the facility on 9/29/2009 with Joe Panetta. Business demands are down due to economic reasons and all VOC, HAP, and Styrene emissions are well under their permitted limits. All resin and gelcoat containers were properly sealed and all solvent washings are collected and sealed in containers. The facility kept good housekeeping practices and no objectionable odors were detected.

I do not have any concerns, changes, or additions with the Title V renewal application.

James
