Your application for this project has been received and reviewed for completeness. The following items are needed to complete your application.

1. Pages from the application (2,3,10,etc) state the purpose is to renew the Title V permit and **add conditions for the finishing line #4, from construction permit 08301370-003-AC**. Please provide documentation showing compliance with permit 0830137-003-AC such as a compliance test and record keeping for production line #4. If finishing line #4 cannot be tested in the near future, such as within 90 days, then change the application to simply a renewal of title v permit 0830137-002-AV. Please consider extending permit 0830137-003-AC past December 1, 2006 to accompany the time to issue the Title V permit.
2. My supervisor, Mr Kozlov, has asked the permitting section to evaluate USEPA TRI Report and compare to emissions quantities within the permit application. The TRI report shows only emissions of xylene of 17.47 tons and your recordkeeping show 2005 emissions of 220 tons. Please describe the other 200 tons of emissions and why they are not on the TRI report.

Pursuant to Rule 62-4.055, the applicant shall have ninety days after the Department mails a timely request for additional information to submit that information to the Department. **If an applicant requires more than ninety days in which to respond to a request for additional information, the applicant may notify the Department in writing of the circumstances, at which time the application shall be held in active status for one additional period of up to ninety days.** Additional extensions shall be granted for good cause shown by the applicant. A showing that the applicant is making a diligent effort to obtain the requested additional information shall constitute good cause. Failure of an applicant to provide the timely requested information by the applicable deadline shall result in denial of the application.

If you have any questions, please fax me at 407.897.5963 or write to me at the above address.

Sincerely,

Alan Zahm, P.E.
