

MEMORANDUM

DATE: October 28th 2008

TO: Grayco 484 Ready Mix (0830142) compliance file

FROM: Malik Pickering

SUBJECT: Facility Status

While in Marion County on an inspection/ visible emissions audit, I went to see if I could find this facility with the help of Jerry Little. Jerry is the supervisor of the facility(Prestige Gunitite) that I inspected on 10/25/08 . I asked him for directions to this facility, which he never heard of, but he pointed me in the right direction anyway. When I got there, there was no ready mix plant in sight. Just residential homes. After I conducted a file review,I also see that past inspectors also never found the facility and said that it was never built. I recommend that this facility be deactivated in arms.

This facility was inactivated in ARMS by a Compliance Manager on 10/28/08.
